## Federated Hermes International Growth Fund

---

A Portfolio of Federated Hermes Adviser Series

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus and other information about the Fund, including the Statement of Additional Information and most recent reports to shareholders, online at [FederatedHermes.com/us/FundInformation](https://FederatedHermes.com/us/FundInformation). You can also get this information at no cost by calling 1-800-341-7400, by sending an email request via Contact Us on [FederatedHermes.com/us](https://FederatedHermes.com/us), or from a financial intermediary through which Shares of the Fund may be bought or sold. The Fund's Prospectus and Statement of Additional Information, both dated July 31, 2023, are incorporated by reference into this Summary Prospectus.

---

A mutual fund seeking to provide long-term capital appreciation.

As with all mutual funds, the Securities and Exchange Commission (SEC) has not approved or disapproved these securities or passed upon the adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

**Not FDIC Insured • May Lose Value • No Bank Guarantee**

# Fund Summary Information

## Federated Hermes International Growth Fund (the "Fund")

### RISK/RETURN SUMMARY: INVESTMENT OBJECTIVE

The Fund's investment objective seeks to provide long-term capital appreciation. The objective may be changed by the Fund's Board of Trustees (the "Trustees") without shareholder approval.

### RISK/RETURN SUMMARY: FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold, and sell Institutional Shares (IS) and Class R6 Shares (R6) of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.**

#### Shareholder Fees (fees paid directly from your investment)

	IS	R6
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)...	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of original purchase price or redemption proceeds, as applicable) .....	None	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends (and other Distributions) (as a percentage of offering price) .....	None	None
Redemption Fee (as a percentage of amount redeemed, if applicable) .....	None	None
Exchange Fee .....	None	None

#### Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	IS	R6
Management Fee .....	0.75%	0.75%
Distribution (12b-1) Fee .....	None	None
Other Expenses .....	0.16% <sup>1</sup>	0.15%
Total Annual Fund Operating Expenses .....	0.91%	0.90%
Fee Waivers and/or Expense Reimbursements <sup>2</sup> .....	(0.06)%	(0.06)%
Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements .....	0.85%	0.84%

1 The Fund may incur and pay certain service fees (shareholder services/account administration fees) on its IS class of up to a maximum of 0.25%. No such fees are currently incurred and paid by the IS class of the Fund. The IS class of the Fund will not incur and pay such fees until such time as approved by the Trustees.

2 The Adviser and certain of its affiliates on their own initiative have agreed to waive certain amounts of their respective fees and/or reimburse expenses. Total annual fund operating expenses (excluding acquired fund fees and expenses, tax reclaim recovery expenses, interest expense, extraordinary expenses and proxy-related expenses, paid by the Fund, if any) paid by the Fund's IS and R6 classes (after the voluntary waivers and/or reimbursements) will not exceed 0.84% and 0.83% (the "Fee Limit"), respectively, up to but not including the later of (the "Termination Date"): (a) September 1, 2024; or (b) the date of the Fund's next effective Prospectus. While the Adviser and its affiliates currently do not anticipate terminating or increasing these additional arrangements prior to the Termination Date, these additional arrangements may only be terminated or the Fee Limit increased prior to the Termination Date with the agreement of the Trustees.

**Example**

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 for the time periods indicated and then redeem or hold all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that operating expenses remain the same. The Example does not reflect sales charges (loads) on reinvested dividends. If these sales charges (loads) were included, your costs would be higher. Although your actual costs and returns may be higher or lower, based on these assumptions your costs would be:

Share Class	1 Year	3 Years	5 Years	10 Years
IS	\$93	\$290	\$504	\$1,120
R6	\$92	\$287	\$498	\$1,108

**Portfolio Turnover**

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 46% of the average value of its portfolio.

## **RISK/RETURN SUMMARY: INVESTMENTS, RISKS AND PERFORMANCE**

### **What are the Fund's Main Investment Strategies?**

The Fund pursues its investment objective to provide long-term capital appreciation by investing primarily in a portfolio of equity securities that are tied economically to a number of countries throughout the world and typically invests in three or more countries outside of the United States (U.S.). The Fund has broad discretion to invest in equity securities of any market capitalization and issuers located or doing business throughout the world, including in both developed and developing or emerging markets. However, the Fund principally invests in companies with a market capitalization in excess of \$500 million, and the Fund does not expect to make additional investments in developing or emerging markets if it would cause the Fund to have a greater than 10% overweight position to developing or emerging markets as compared to the exposure of the MSCI ACWI ex USA Growth Index to such markets. The Fund may make significant investments (e.g., more than 25% of the Fund's portfolio) in issuers located or doing business in a single country.

The Fund's investments in equity securities may include, for example, common stocks, American Depositary Receipts or other U.S. listings of foreign common stocks. The Fund may use closed-end funds and derivative instruments to gain broad exposure to markets and/or a particular index. Derivative instruments include, but are not limited to, financial futures, as well as currency futures and currency forward contracts. For example, the Fund may use derivative contracts to increase or decrease the portfolio's exposure to the investment(s) underlying the derivative instruments in an attempt to benefit from changes in the value of the underlying investment(s), to obtain premiums from the sale of derivative contracts, to realize gains from trading a derivative contract or to hedge against potential losses. There can be no assurance that the Fund's use of derivatives contracts will work as intended.

Federated Global Investment Management Corp.'s (the "Adviser") investment process seeks to identify companies with robust and sustainable growth rates, high-quality balance sheets, and management teams with clearly defined growth strategies. In allocating the Fund's assets, the Adviser also incorporates information on the economic and financial market conditions within each country. The Adviser's proprietary quantitative model drives country allocation, while individual stocks are selected through a qualitative process that incorporates a multi-factor approach to find companies with sustainable growth characteristics. The Adviser seeks to control risk by seeking diversification across sectors and using both fundamental and statistical models to evaluate potential volatility. The Adviser's portfolio construction process seeks to combine the best investment candidates within the Adviser's recommended framework of country allocations.

The Fund utilizes an active trading approach. The Adviser may choose to sell a holding when, for example, in the Adviser's view, it no longer represents an attractive investment or to take advantage of what it considers to be a better investment opportunity.

## What are the Main Risks of Investing in the Fund?

All mutual funds take investment risks. Therefore, it is possible to lose money by investing in the Fund. The primary factors that may reduce the Fund's returns include:

- **Stock Market Risk.** The value of equity securities in the Fund's portfolio will fluctuate and, as a result, the Fund's Share price may decline suddenly or over a sustained period of time. Information publicly available about a company, whether from the company's financial statements or other disclosures or from third parties, or information available to some but not all market participants, can affect the price of a company's shares in the market. Among other factors, equity securities may decline in value because of an increase in interest rates or changes in the stock market. Recent and potential future changes in industry and/or economic trends, as well as changes in monetary policy made by central banks and/or their governments, also can affect the level of interest rates and contribute to the development of or increase in volatility, illiquidity, shareholder redemptions and other adverse effects (such as a decline in a company's stock price), which could negatively impact the Fund's performance.
- **Small-Cap Company Risk.** The Fund may invest in small capitalization (or "small-cap") companies. Small-cap companies may have less liquid stock, a more volatile share price, unproven track records, a limited product or service base, and limited access to capital. The above factors could make small-cap companies more likely to fail than larger companies, and increase the volatility of the Fund's portfolio, performance and Share price.
- **Mid-Cap Company Risk.** The Fund may invest in mid-capitalization (or "mid-cap") companies. Mid-cap companies often have narrower markets, limited managerial and financial resources, more volatile performance and greater risk of failure, compared to larger, more established companies. These factors could increase the volatility of the Fund's portfolio, performance and Share price.
- **Focused Investment Risk.** To the extent that the Fund focuses its investments in the securities of a particular issuer or companies in a particular country, group of countries, region, market, industry, group of industries, sector, or asset class, the Fund's exposure to various risks may be heightened, including price volatility and adverse economic, market, political, or regulatory occurrences affecting that issuer, country, group of countries, region, market, industry, group of industries, sector, or asset class.
- **Large Shareholder Risk.** A significant percentage of the Fund's shares may be owned or controlled by a large shareholder, such as other funds or accounts, including those of which the Adviser or an affiliate of the Adviser may have investment discretion. Accordingly, the Fund can be subject to the potential for large scale inflows and outflows as a result of purchases and redemptions made by significant shareholders. These inflows and outflows could be significant and, if frequently occurring, could negatively affect the Fund's net asset value and performance and could cause the Fund to buy or

sell securities at inopportune times in order to meet purchase or redemption requests. Investments in the Fund by other investment companies also can create conflicts of interests for the Adviser to the Fund and the investment adviser to the acquiring fund. For example, a conflict of interest can arise due to the possibility that the investment adviser to the acquiring fund could make a decision to redeem the acquiring fund's investment in the Fund. In the case of an investment by an affiliated fund, a conflict of interest can arise if, because of the acquiring fund's investment in the Fund, the Fund is able to garner more assets from third-party investors, thereby growing the Fund and increasing the management fees received by the Adviser, which could also be the investment adviser to the acquiring fund.

- **Risk Related to the Economy.** The value of the Fund's portfolio may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets. Economic, political and financial conditions, industry or economic trends and developments or public health risks, such as epidemics or pandemics, may, from time to time, and for varying periods of time, cause the Fund to experience volatility, illiquidity, shareholder redemptions, or other potentially adverse effects.
- **Risk of Foreign Investing.** The foreign markets in which the Fund invests may be subject to economic or political conditions which are less favorable than those of the United States and may lack financial reporting standards or regulatory requirements comparable to those applicable to U.S. companies.
- **Risk of Investing in Depositary Receipts and Domestically Traded Securities of Foreign Issuers.** Because the Fund may invest in American Depositary Receipts and other domestically traded securities of foreign companies, whether in the United States or in foreign local markets, the Fund's Share price may be more affected by foreign economic and political conditions, taxation policies and accounting and auditing standards than would otherwise be the case.
- **Currency Risk.** Exchange rates for currencies fluctuate daily. Accordingly, the Fund may experience increased volatility with respect to the value of its Shares and its returns as a result of its exposure to foreign currencies through direct holdings of such currencies or holdings of non-U.S. dollar-denominated securities.
- **European Union and Eurozone Related Risk.** A number of countries in the European Union (EU), including certain countries within the EU that have adopted the euro (Eurozone), have experienced, and may continue to experience, severe economic and financial difficulties. Additional countries within the EU may also fall subject to such difficulties. These events could negatively affect the value and liquidity of the Fund's investments in euro-denominated securities and derivatives contracts, securities of issuers located in the EU or with significant exposure to EU issuers or countries.
- **Risk of Investing in Emerging Market Countries.** Securities issued or traded in emerging markets generally entail greater risks than securities issued or traded in developed markets. Emerging market countries may have

relatively unstable governments and may present the risk of nationalization of businesses, expropriation, confiscatory taxation or, in certain instances, reversion to closed market, centrally planned economies.

- **Risk Related to Investing for Growth.** Due to their relatively high valuations, growth stocks are typically more volatile than value stocks. For instance, the price of a growth stock may experience a larger decline on a forecast of lower earnings, a negative fundamental development, or an adverse market development. Further, growth stocks may not pay dividends or may pay lower dividends than value stocks. This means they depend more on price changes for returns and may be more adversely affected in a down market compared to value stocks that pay higher dividends.
- **Liquidity Risk.** The securities in which the Fund invests may be less readily marketable and may be subject to greater fluctuation in price than other securities.
- **Interest Rate Risk.** Prices of fixed-income securities generally fall when interest rates rise. The longer the duration of a fixed-income security, the more susceptible it is to interest rate risk. Recent and potential future changes in monetary policy made by central banks and/or their governments are likely to affect the level of interest rates.
- **Custodial Services and Related Investment Costs.** Custodial services and other costs relating to investment in international securities markets generally are more expensive due to differing settlement and clearance procedures than those of the United States.
- **Risk of Investing in Derivative Contracts.** Derivative contracts involve risks different from, or possibly greater than, risks associated with investing directly in securities and other traditional investments. Specific risk issues related to the use of such contracts include valuation and tax issues, increased potential for losses and/or costs to the Fund and a potential reduction in gains to the Fund. Each of these issues is described in greater detail in this Prospectus. Derivative contracts may also involve other risks described in this Prospectus, such as stock market, interest rate, credit, currency and liquidity risks.
- **Issuer Credit Risk.** It is possible that interest or principal on securities will not be paid when due. Such non-payment or default may reduce the value of the Fund's portfolio holdings, its share price and its performance.
- **Counterparty Credit Risk.** Credit risk includes the possibility that a party to a transaction involving the Fund will fail to meet its obligations. This could cause the Fund to lose money or to lose the benefit of the transaction or prevent the Fund from selling or buying other securities to implement its investment strategy.
- **Quantitative Modeling Risk.** The Fund employs quantitative models as a management technique. These models examine multiple economic factors using various proprietary and third-party data. The results generated by quantitative analysis may perform differently than expected and may

negatively affect Fund performance for various reasons (for example, human judgment, data imprecision, software or other technology malfunctions, or programming inaccuracies).

- **Technology Risk.** The Adviser uses various technologies in managing the Fund consistent with its investment objective and strategy described in this Prospectus. For example, proprietary and third-party data and systems are utilized to support decision making for the Fund. Data imprecision, software or other technology malfunctions, programming inaccuracies and similar circumstances may impair the performance of these systems, which may negatively affect Fund performance.

Shares offered by this Prospectus are not deposits or obligations of any bank, are not endorsed or guaranteed by any bank and are not insured or guaranteed by the U.S. government, the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

## **PERFORMANCE: BAR CHART AND TABLE**

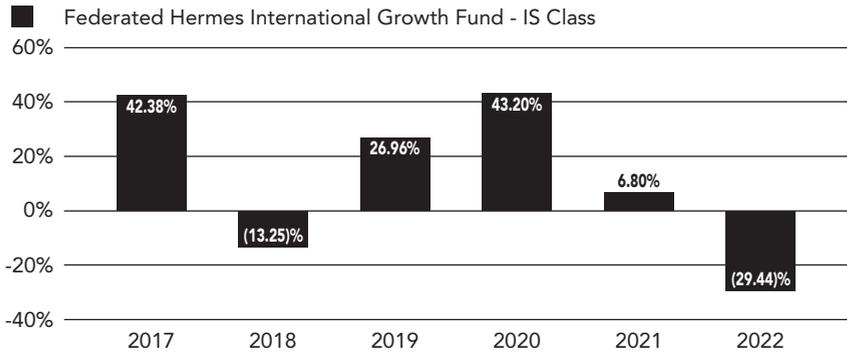

### **Risk/Return Bar Chart**

The Fund is the legal entity successor to the PNC International Growth Fund (“Predecessor Fund”), a portfolio of PNC Funds, pursuant to a tax-free reorganization that took place on November 15, 2019. Pursuant to the reorganization, the Fund is the legal entity survivor and the Predecessor Fund is the accounting and tax survivor of the reorganization. Accordingly, the performance information, including information on fees and expenses and financial information provided in this prospectus for periods prior to the reorganization (the Fund’s commencement of investment operations) is historical information for the Predecessor Fund. The Predecessor Fund was managed by the same portfolio management team as the Fund, had an identical investment objective and substantially identical strategies, policies, and restrictions. Given the above, unless specifically stated otherwise, subsequent references in this section to the Fund should be read to include the Predecessor Fund.

For periods prior to the reorganization (the Fund’s commencement of investment operations), the performance of the Fund’s IS class is the historical performance of the Predecessor Fund’s I class. The performance of the Predecessor Fund’s I class has not been adjusted to reflect the expenses applicable to the Fund’s IS class. The total returns of the IS class would have been substantially similar to the annual returns for the I class over the same period because the classes are invested in the same portfolio of securities and would differ only to the extent the classes do not have the same expenses.

The bar chart and performance table below are intended to help you analyze the Fund’s investment risks in light of its historical returns. The bar chart shows the variability of the Fund’s IS class total returns on a calendar year-by-year basis. The Average Annual Total Return table shows returns averaged over the stated periods, and includes comparative performance information. *The Fund’s performance will fluctuate, and past performance (before and after taxes) is not*

necessarily an indication of future results. Updated performance information for the Fund is available under the “Products” section at [FederatedHermes.com/us](https://FederatedHermes.com/us) or by calling 1-800-341-7400.

The Fund’s IS class total return for the six-month period from January 1, 2023 to June 30, 2023, was 7.61%.

Within the periods shown in the bar chart, the Fund’s IS class highest quarterly return was 31.97% (quarter ended June 30, 2020). Its lowest quarterly return was (18.97)% (quarter ended March 31, 2020).

### Average Annual Total Return Table

The Fund’s R6 class commenced operations on August 26, 2021. For the periods prior to the commencement of operations of the Fund’s R6 class, the performance information shown below is for the Fund’s IS class. Returns for the Fund’s R6 class would be substantially similar to returns of the Fund’s IS class because each share class is invested in the same portfolio of securities and returns would differ only to the extent that the two classes do not have the same expenses. The performance of the IS class has not been adjusted to reflect the expenses applicable to the R6 class, since the R6 class has a lower expense ratio than the expense ratio of the IS class.

In addition to Return Before Taxes, Return After Taxes is shown for the Fund’s IS class to illustrate the effect of federal taxes on Fund returns. After-tax returns are shown only for the IS class and after-tax returns for the R6 class will differ from those shown for the IS class. *Actual after-tax returns depend on each investor’s personal tax situation, and are likely to differ from those shown.* After-tax returns are calculated using a standard set of assumptions. The stated returns assume the highest historical **federal** income and capital gains tax rates. These after-tax returns do **not** reflect the effect of any applicable **state and local** taxes. After-tax returns are not relevant to investors holding Shares through a 401(k) plan, an Individual Retirement Account (IRA) or other tax-advantaged investment plans.

(For the Period Ended December 31, 2022)

	1 Year	5 Year	Since Inception
<b>IS:</b>			
<b>Inception Date:</b>			<b>02/29/2016</b>
Return Before Taxes	(29.44)%	3.52%	8.47%
Return After Taxes on Distributions	(29.91)%	2.11%	7.34%
Return After Taxes on Distributions and Sale of Fund Shares	(17.33)%	2.68%	6.76%
<b>R6:</b>			
<b>Inception Date:</b>			<b>02/29/2016</b>
Return Before Taxes	(29.42)%	3.53%	8.49%
<b>MSCI ACWI ex USA Growth Index<sup>1</sup></b> (reflects no deduction for fees, expenses or taxes)	(23.05)%	1.49%	4.68%
<b>Morningstar Foreign Large Growth Funds Average<sup>2</sup></b>	(25.29)%	2.11%	6.13%

- 1 The MSCI All Country World (ACWI) ex USA Growth Index is designed to measure the performance of growth companies within developed and emerging equity markets, excluding the U.S. and frontier markets.
- 2 Morningstar figures represent the average of the total returns reported by all mutual funds designated by Morningstar as falling into the respective category indicated. They do not reflect sales charges.

## FUND MANAGEMENT

The Fund's Investment Adviser is Federated Global Investment Management Corp.

Martin C. Schulz, Head of International Equity Group; Senior Portfolio Manager, managed the predecessor fund to the Fund, the PNC International Growth Fund, since February 2016, and has continued to manage the Fund as an employee of the Adviser since November 2019.

Calvin Y. Zhang, Senior Portfolio Manager, managed the predecessor fund to the Fund, the PNC International Growth Fund, since February 2016, and has continued to manage the Fund as an employee of the Adviser since November 2019.

## PURCHASE AND SALE OF FUND SHARES

You may purchase, redeem or exchange Shares of the Fund on any day the New York Stock Exchange is open. Shares may be purchased through a financial intermediary firm that has entered into a Fund selling and/or servicing agreement with the Distributor or an affiliate ("Financial Intermediary") or directly from the Fund, by wire or by check. Please note that certain purchase restrictions may apply. Redeem or exchange Shares through a financial intermediary or directly from the Fund by telephone at 1-800-341-7400 or by mail.

**IS Class**

The minimum initial investment amount for the Fund's IS class is generally \$1,000,000 and there is no minimum subsequent investment amount. Certain types of accounts are eligible for lower minimum investments. The minimum investment amount for Systematic Investment Programs is \$50.

**R6 Class**

There are no minimum initial or subsequent investment amounts required. The minimum investment amount for Systematic Investment Programs is \$50.

**TAX INFORMATION****IS Class**

The Fund's distributions are taxable as ordinary income or capital gains except when your investment is through a 401(k) plan, an Individual Retirement Account or other tax-advantaged investment plan.

**R6 Class**

The Fund's distributions are taxable as ordinary income or capital gains except when your investment is through a tax-advantaged investment plan.

**PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES****IS Class**

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and/or its related companies may pay the intermediary for the sale of Fund Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

**R6 Class**

Class R6 Shares do not make any payments to financial intermediaries, either from Fund assets or from the investment adviser and its affiliates.
