

## **Federated Hermes achieves shareholder approval related to the Federated Hermes MDT Large Cap Growth ETF**

(PITTSBURGH, Pa., Aug. 23, 2024) — Federated Hermes, Inc. (NYSE: FHI), a global leader in active investing, today announced that the Federated Hermes ETF Trust, on behalf of its portfolio, Federated Hermes MDT Large Cap Growth ETF (NYSE: FLCG), which seeks long-term capital appreciation by investing primarily in common stocks of large capitalization (large-cap) U.S. companies with higher forecasted growth values relative to the market, has obtained approval by majority shareholder consent action to change from a diversified company to a non-diversified company.

The change was approved by written consent in lieu of a shareholder meeting and no proxy or solicitation was necessary. The change will take effect on or about Sept. 16, 2024.

The Fund pursues its investment objective, in part, by utilizing an actively managed large cap growth approach by selecting most of its investments from companies listed in the Russell 1000® Growth Index (the "Index"), although the Fund is not designed to track the overall composition or returns of the Index. The approved change to the Fund's diversification classification is intended to provide the Fund with greater long-term flexibility in executing its investment objective at times when the weightings of individual issuers in the Index exceed the diversification limits under the Investment Company Act of 1940. The change in diversification policy is not expected to substantially affect the Fund's pursuit of its investment objective, rather enabling the Fund's adviser to continue actively managing the Fund's investment strategy using the Fund's quantitative model.

Investors can view fund and portfolio information in the Products section of [FederatedHermes.com/us](https://FederatedHermes.com/us).

Certain statements in this press release, such as those related to the effective date of the policy change, the intended purpose behind the diversification policy change, and the intended effect of the policy change on the Fund's principal investment strategies, constitute or may constitute forward-looking statements, which involve known and unknown risks, uncertainties and other factors that may cause the actual results, levels of activity, performance or achievements of the Fund to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such

forward-looking statements. Any forward-looking statement, and the Fund's level of business activity and financial results, are inherently subject to significant business, market, economic, competitive, regulatory and other risks and uncertainties, many of which are difficult to predict and beyond the Fund's and its investment adviser's control. Risks and uncertainties could vary significantly depending on various factors, such as market conditions, investment performance and investor behavior. Other risks and uncertainties include the risk factors discussed in the Fund's registration statement, including its prospectus and statement of additional information, as filed with the Securities and Exchange Commission. As a result, no assurance can be given as to future results, levels of activity, performance or achievements, and none of the Fund, its investment adviser, or any other person assumes responsibility for the accuracy and completeness, or updating, of such statements in the future.

Fund shares are bought and sold on an exchange at market price (not NAV) and are not individually redeemed from the Fund. However, shares may be redeemed at NAV directly by certain authorized broker-dealers (Authorized Participants) in very large creation/redemption units. Investors purchasing and selling at market price may pay brokerage commissions which will reduce returns. Market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates the current NAV per share. NAVs are calculated using prices as of 4 p.m. Eastern Time.
