

# Federated Hermes Government Obligations Fund

## Cash Series Shares

Nasdaq symbol: GFSXX | Cusip number: 608919684 | Newspaper listing: GovObCS

6/30/23

### Product highlights

- Complies with Rule 2a-7 definition of a government money market fund.
- Not subject to liquidity fees or redemption gates.
- Pursues current income consistent with stability of principal and liquidity.
- Invests primarily in short-term U.S. Treasury and government securities, and repurchase agreements collateralized by U.S. Treasury and government agency securities for a higher yield potential than a Treasury-exclusive portfolio.
- Holds AAAM, Aaa-mf and AAAMmf ratings from Standard & Poor's, Moody's and Fitch, respectively.
- Gives investors more time to complete daily cash processing and initiate late-day deposit transactions through 5 p.m. ET cut-off time for purchases and redemptions.

### Fund performance

Net yield (%)		Total return (%)											
7-day	4.14	1-year	2.88										
Annualized yields (%)													
	July	Aug	Sept	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	June	
7-day	0.96	1.32	2.03	2.10	2.79	3.31	3.38	3.64	3.89	3.91	4.14	4.14	

**Performance quoted represents past performance, which is no guarantee of future results. Investment return will vary. An investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, contact us or visit [FederatedHermes.com/us](https://FederatedHermes.com/us).**

Although not contractually obligated to do so, the advisor and/or certain fund service providers waived all or a portion of their fees or reimbursed the fund for certain operating expenses. These voluntary waivers and reimbursements may be modified or terminated at any time; accordingly, the fund's expenses may vary (i.e., increase or decrease) during the fund's fiscal year. These waivers increase income to the fund and result in a higher return to investors.

Otherwise, the 7-day yield would have been 3.96% and total return would have been lower.

**Total return** represents the change in value of an investment after reinvesting all income and capital gains. Yield quotations more closely reflect the current earnings of the fund than the total return quotation.

Rule 2a-7 requires that money market funds maintain at least 10% daily liquidity assets and at least 30% weekly liquidity assets. Both requirements are 'point of purchase' requirements. Thus, it is possible that money market funds may, at any given time, have liquidity percentages reflecting less than the 10% and 30% thresholds. In such circumstances, the portfolio manager will be required to purchase securities to meet the requisite liquidity thresholds prior to purchasing longer-dated securities. Additionally, the SEC requirements for what may be defined as 'daily' and 'weekly' differs from the standard maturities used in calculating the 'Effective Maturity Schedule.' Therefore, the percentages in the 2a-7 Liquidity table will generally not equal the amounts shown in the 'Effective Maturity Schedule.'

### Portfolio manager commentary

In January, U.S. Treasury Secretary Janet Yellen announced that the federal government's statutory debt limit had been reached and that the Treasury Department was forced to implement "extraordinary measures" to meet its obligations. Yellen warned that the "X date"—the day it exhausts its cash balance held at the Federal Reserve—could come in June. As in past cases, lawmakers pushed the negotiations to the brink before finally voting to suspend the limit until January 2025. The immediate result was that the Treasury embarked on plans to issue a massive amount of securities to replenish its coffers. Some estimates put that amount as high as \$1 trillion, based on the need to make whole the federal accounts in which it redeemed or suspended investments, service the national debt and fund government spending. The preponderance of the issuance will come in bills, a process that started as the second quarter drew to a close.

In the first of two Federal Open Market Committee (FOMC) meetings during the quarter, policymakers disregarded the debt ceiling debate and raised the fed funds target range by 25 basis points. That lifted it to a 16-year high of 5-5.25%. The rationale was that restricting the economy to fight

inflation was critical despite the uncertainty. Most measures of inflation continued to decrease, but remained stubbornly above the Fed's 2% target, and the labor market and consumer spending remained strong.

Intriguingly, at its June FOMC meeting the Fed made a different decision after the resolution of the debt limit debate, declining to change the policy range after 10 straight hikes. This announcement was paired with policymaker projections that rates likely will continue to rise. As the quarter closed, public comments by Fed Chair Jerome Powell suggested the tightening cycle that began in March 2022 was not over.

At the end of the month, yields on 1-, 3-, 6- and 12-month U.S. Treasuries were 5.14%, 5.32%, 5.45% and 5.42%, respectively; the 1-, 3-, 6- and 12-month Bloomberg Short-Term Bank Yield Index rates (BSBY) were 5.21%, 5.47%, 5.67% and 5.93%, respectively; the 1-, 3-, 6- and 12-month London interbank offered rates were 5.26%, 5.53%, 5.81% and 6.04%, respectively. Since US\$ LIBOR rates are no longer being reported, this is the last time they will appear on this update.

*You could lose money by investing in the fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time.*

*The fund has not elected to be subject to the liquidity fees and gates requirement at this time.*

*Performance shown is for Cash Series Shares. The fund offers additional share classes whose performance will vary due to differences in charges and expenses. Please consult your financial institution regarding your eligibility to purchase these classes.*

### A word about risk

Fund shares are not guaranteed by the U.S. government. Current and future portfolio holdings are subject to risk.

### Definitions

**Net yields** are based on the average daily income dividend and average net asset value for the 7 days ended on the date of calculation. The 7-day net annualized yield is based on the average net income per share for the 7 days ended on the date of calculation and the offering price on that date.

**The fund is a managed portfolio** and its holdings are subject to change.

**The holdings percentages** are based on net assets at the close of business on 6/30/23 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes.

**Weighted average maturity** is the mean average of the periods of time remaining until the securities held in the fund's portfolio (a) are scheduled to be repaid, (b) would be repaid upon a demand by the fund or (c) are scheduled to have their interest rate readjusted to reflect current market rates. Securities with adjustable rates payable upon demand are treated as maturing on the earlier of the two dates if their scheduled maturity is 397 days or less, and the later of the two dates if their scheduled maturity is more than 397 days. The mean is weighted based on the percentage of the amortized cost of the portfolio invested in each period.

**Weighted average life** is calculated in the same manner as the Weighted average maturity (WAM), but is based solely on the periods of time remaining until the securities held in the fund's portfolio (a) are scheduled to be repaid or (b) would be repaid upon a demand by the fund without reference to when interest rates of securities within the fund are scheduled to be readjusted.

**Repurchase agreements** consist of a financial institution selling securities to a fund and agreeing to repurchase them at a mutually agreed upon price and time.

### Ratings and rating agencies

Ratings are based on an evaluation of several factors, including credit quality, diversification and maturity of assets in the portfolio, as well as management strength and operational capabilities. A money market fund rated AAAM by Standard & Poor's is granted after evaluating a number of factors, including credit quality, market price, exposure and management. Money market funds rated Aaa-mf by Moody's are judged to be of an investment quality similar to Aaa-rated fixed income obligations, that is, they are judged to be of the best quality. Fitch's money market fund ratings are an assessment of a money market fund's capacity to preserve principal and provide liquidity through limiting credit, market and liquidity risk. For more information on credit ratings, visit [standardandpoors.com](http://standardandpoors.com), [moodys.com](http://moodys.com) and [fitchratings.com](http://fitchratings.com).

Ratings are subject to change and do not remove market risk.

Credit ratings do not provide assurance against default or other loss of money and can change.
