Investment objective and strategy

Liquidity and income in line with current market rates to the extent consistent with the preservation of capital. Investments limited to types of money market instruments, provided they are denominated in US dollars and have a remaining maturity of 397 days or less. Will be managed in a way to maintain an overall weighted average maturity not to exceed 60 days and a weighted average life of 120 days or less. Will only invest in either securities which have been rated (or whose issuers have been rated) in the highest short-term rating category by a US nationally recognized statistical rating organization or in unrated securities that have been determined by the investment manager or sub-advisor to be of comparable quality.

Investment manager's report

President Trump has tested the bulwark protecting the Federal Reserve from political interference and found it as sturdy as ever. His insults of Chair Powell are one thing, but claiming he had the authority to fire him is another. That stance threatened the Federal Reserve's (Fed) independent stature and was serious enough to earn a slapdown by the bond market. But when the administration dismissed the leaders of two independent agencies, concern arose Trump might try an end-around to replace the Federal Reserve Board of Governors, which, of course, includes Powell. Thankfully, the Supreme Court stepped in. While it affirmed that the White House could dismiss the directors in question, it proactively shut the door on any similar attempt with the central bank. That ruling came on May 22, though as far as the Fed is concerned, it might as well have happened on July 4. The fact that the high court issued this carve-out without being specifically asked about it should convince Trump that he has no case. This doesn't mean he will stop. He recently met with Powell at the White House to say the chair is, "making a mistake by not lowering interest rates." The June 18 Federal Open Market Committee (FOMC) meeting is all but certain to result in no rate change. It is equally clear that Trump will continue to criticize Powell. An updated Summary of Economic Projections is always notable, and the FOMC will release one at the meeting, but it might not hold as much insight as usual. So long as the fog that is the administration's fiscal and trade policy obscures the state of the economy, Fed voters are likely to reiterate their "wait-and-see" position. At the end of the month, yields on 1-, 3-, 6- and 12-month US Treasuries were 4.28%, 4.34%, 4.31% and 4.10%, respectively.

About Federated Hermes

A financial industry pioneer since 1955, Federated Hermes, Inc. ("Federated Hermes," formerly, "Federated Investors, Inc.") is one of the largest US investment managers. Known for our stability, diligence and diverse product line, Federated Hermes takes the long view, believing that doing business the right way over time will present opportunity for future growth. We apply the same approach to managing our international undertakings, which began in 1984 with the launch of one of the first international equity funds. Since then Federated Hermes has established a host of international funds and offices, including Hermes Fund Managers Ireland Limited in Dublin to manage Irish domiciled UCITS, Federated Hermes (UK) LLP (formerly Federated Investors (UK) LLP), to manage UK-domiciled UCITS, as well as the Federated Hermes Short-Term Daily U.S. Dollar Fund, Ltd., based in the Cayman Islands. Highly experienced investment professionals direct our operations, and we continually look to increase our robust global footprint through organic growth and strategic acquisitions.
