Investment objective and strategy

Liquidity and income in line with current market rates to the extent consistent with the preservation of capital. Investments limited to types of money market instruments, provided they are denominated in US dollars and have a remaining maturity of 397 days or less. Will be managed in a way to maintain an overall weighted average maturity not to exceed 60 days and a weighted average life of 120 days or less. Will only invest in either securities which have been rated (or whose issuers have been rated) in the highest short-term rating category by a US nationally recognized statistical rating organization or in unrated securities that have been determined by the investment manager or sub-advisor to be of comparable quality.

Investment manager's report

The Federal Reserve's annual central-bank symposium at Jackson Hole, Wyo. is essentially a Federal Open Market Committee (FOMC) meeting minus an actual decision, with statements coming from interviews with many members and remarks by the chair. The conference that took place last week was remarkably similar to last year's, with tough talk about slaying inflation and projections of the next policy action. But unlike 2022, when the rate path was extraordinarily steep, Chair Jerome Powell seemed to equivocate, outlining the conditions that would prompt the Fed to consider further hikes without promising any. The conditions are, of course, economic data. But one got the feeling he was returning to the tactic of providing forward guidance. The markets once again are disregarding Fed speak, pricing in no fewer than four quarter-point cuts in 2024. Powell's real message was to disabuse investors of this view. In so many words, expect higher for longer. This outlook could translate to another quarter-point hike rate, more likely at the November FOMC meeting than September's. It's important to remember the Fed usually is biased to its current direction. It prefers long ramps to switchbacks. The last thing policymakers want is to reverse direction if they ease too soon and inflation rises again-losing credibility and effectiveness in the process. This is probably why Powell pushed back on the recent speculation the Fed might raise its inflation target higher than 2% because of various structural shifts in the global economy. He wants the markets to stop looking for justification for fighting the Fed. At the end of the month, yields on 1-, 3-, 6- and 12-month U.S. Treasuries were 5.39%, 5.46%, 5.51% and 5.40%, respectively; the 1-, 3-, 6- and 12-month Bloomberg Short-Term Bank Yield Index rates (BSBY) were 5.38%, 5.57%, 5.78% and 5.98%, respectively.

About Federated Hermes

A financial industry pioneer since 1955, Federated Hermes, Inc. ("Federated Hermes," formerly, "Federated Investors, Inc.") is one of the largest US investment managers. Known for our stability, diligence and diverse product line, Federated Hermes takes the long view, believing that doing business the right way over time will present opportunity for future growth. We apply the same approach to managing our international undertakings, which began in 1984 with the launch of one of the first international equity funds. Since then Federated Hermes has established a host of international funds and offices, including Hermes Fund Managers Ireland Limited in Dublin to manage Irish domiciled UCITS, Federated Hermes (UK) LLP (formerly Federated Investors (UK) LLP), to manage UK-domiciled UCITS, as well as the Federated Hermes Short-Term Daily U.S. Dollar Fund, Ltd., based in the Cayman Islands. Highly experienced investment professionals direct our operations, and we continually look to increase our robust global footprint through organic growth and strategic acquisitions.
