

Federated Hermes Kaufmann Small Cap Fund

Seeking growth through IPOs and innovation
(FKASX, FKAIX, FKALX)

Federated Hermes Kaufmann: An intensive, bottom-up focus on growth

Investors are drawn to growth funds for many reasons. One primary reason is the pursuit of capital appreciation, the ability to grow assets over a long period. The true power of growth investing rests with the ability to compound earnings at an above-average rate. The challenge is identifying those stocks capable of doing so over at least a three- to five-year time horizon.

This underscores the value of Federated Hermes Kaufmann's emphasis on pursuing exceptional, long-term growth opportunities at the best possible price—whether by uncovering up-and-coming companies through intensive research, increasing positions in great companies when the overall market stumbles or identifying strong potential at the initial public offering (IPO) stage.

The Federated Hermes Kaufmann team uncovers growth opportunities through:

- On-the-ground research**
 The Kaufmann team participates in more than 3,500 meetings with management teams and ancillary businesses each year
- Access to the IPO market**
 Of the 156 holdings in the fund, 66 were first purchased at IPO (38.62% of the fund)
- Relationships with several investment banks**
 Further strengthens the Kaufmann team's ability to participate in the difficult-to-access IPO market

Mutual funds are subject to risks and fluctuate in value.

International investing involves special risks including currency risk, increased volatility, political risks and differences in auditing and other financial standards.

Investing in IPOs involves special risks such as limited liquidity and increased volatility.

The fund may invest in small capitalization (or "small-cap") companies. Small-cap companies may have less liquid stock, a more volatile share price, unproven track records, a limited product or service base and limited access to capital. The above factors could make small-cap companies more likely to fail than larger companies and increase the volatility of the fund's portfolio, performance and share price. Suitable securities of small-cap companies also can have limited availability and cause capacity constraints on investment strategies for funds that invest in them.

The holdings percentages are based on net assets and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change.
