Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after-tax returns, contact us or visit FederatedHermes.com/us. Maximum offering price figures reflect the maximum sales charge of 5.5% for A Shares. See the prospectus for other fees and expenses that apply to a continued investment in the fund. Total returns for periods of less than one year are cumulative.

* The fund's expense ratio is from the most recent prospectus. The expense ratio may reflect voluntary fee waivers and/or expense reimbursements determined by the fund's Advisor and its affiliates. The voluntary waivers and/or reimbursements, if applicable, are in effect up to but not including the later of 1/1/25 or the date of the fund's next effective prospectus.

Distinguishing characteristics

Transparent and accountable process

- Capital efficiency and transparency are built into the compensation structure
- Bonus pool is allocated according to individual's contribution to results
- Incentivized to optimize capital

Tenured team, differentiated portfolio

Team follows same 35-year philosophy and process used since inception of the Kaufmann strategy

- Distinguished professionals with specialized industry ties; organized for full accountability
- Continuity of team allows for constructive problem solving
- Seeking a differentiated, large-cap portfolio

Extensive research, long-term results

Independent, proprietary research focuses on:

- Exceptional business models
- Positive inflections of business momentum
- Clear pathway to free cash flow growth

Past performance is no guarantee of future results.

Sector weightings (%)

Totals may not add up to 100% due to rounding.

The index position were small hedges we invested in given macro uncertainty.

Portfolio composition is based on net assets at the close of business on 9/30/24 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change.

Highlights

- Global equity markets were positive during the quarter as central banks began lowering rates as inflation slowed globally
- Growth stocks underperformed value stocks during the quarter, reversing a multi-quarter trend
- Stock selection and sector weighting contributed to positive relative performance
- The Financials and Health Care sectors positively contributed to relative performance

Looking back

During the third quarter of 2024, the US economy and most significant Western economies saw economic growth moderate slightly. Inflation continued to moderate at a tepid pace as fiscal stimuli slowed and geopolitical issues appeared contained. The global inflationary pressures easing are enabling central banks to reverse their monetary tightening policies and begin an easing path going forward. The bond markets have begun to price in lower relative rates and a more dovish Federal Reserve stance in 2024 has boosted US and global equities this year. The US indexes that were up the most during the last quarter were smaller cap stocks represented by the Russell 2000 Index returning 9.27%, followed by mid cap stocks represented by the Russell Mid Cap Index returning 9.21%, followed by the Biotech Index represented by the S&P Biotech Index returning 6.59%, followed by large cap companies represented by the Russell 1000 Index returning 6.08%, followed by the S&P 500 Index returning 5.89%, finally followed by Technology heavy index NASDAQ composite returning 2.76%. Mid Cap Growth Stocks underperformed Mid cap value stocks during the quarter.

During the third quarter, the portfolio team added new equity positions of the following select new holdings: Texas Roadhouse(new), EyePoint Pharmaceuticals (new), Procept BioRobotics (new), Phatham Pharmaceuticals (new), UCB SA (new), Vera Therapeutics (new), Zenas Biopharma (IPO), TrexCo Inc (new), Novanta Inc (new), Rubrik Inc (new).

Also during the quarter, the portfolio subtracted or reduced the following equity positions in pursuit of better opportunities: Dexcom, Inc, Veeva Systems, Inc, Blue Owl Capital, Alnylam Pharmaceuticals and London Stock exchange.

Capital markets activities during the second quarter:

The fund invested in one IPO during the quarter: Zenas Biopharma Inc.

The fund participated in six secondary offerings during the quarter: Ideaya Biosciences, Inc, JD.com, Vaxcyte Inc, Viking Holdings Ltd, Centessa Pharmaceuticals Ltd and Moncler SPA.

Performance

Federated Hermes Kaufmann Fund (Institutional Shares) returned 7.53% at NAV in the third quarter. That compares with its benchmark the Russell Midcap Growth Index, which returned 6.54% during the same period.

Performance contributors

- Stocks that made a positive contribution to performance: Argenx-SE, Hamilton Lane Inc, Quanta Services Inc, Verona Pharma Plc and Tran Technologies Plc

Performance detractors

- Stocks that detracted from performance included New Fortress Energy Inc, DexCom Inc, CrowdStrike Holdings Inc, Elastic NV and Ideaya Biosciences

Performance quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after-tax returns, contact us or visit FederatedHermes.com/us.

How we are positioned

As the US economy enters the last quarter of 2024, many headwinds have turned to tailwinds, such as Central Banks rotating from tightening monetary policy to easing. While there is some encouraging macro momentum, there are persistent worries such as global elections, geopolitical uncertainty as well as rising oil prices. These questions are likely to endure into 2024, which could cause market uncertainty. One indicator of investor caution would be the continued quiet IPO activity since the peak in 2021. After a record-breaking year in 2021, US IPO issuance remained quiet with 71 IPOs priced in 2022. In 2023, the market showed some signs of recovering with 108 IPOs raising \$20 billion, according to Renaissance Capital. That IPO momentum has continued into the third quarter, with 106 IPOs pricing in the US, raising \$24.7 billion. Despite the macro uncertainties, the Kaufmann team continues to focus on its goal of finding and investing in companies that have little dependence on the economy, good or bad, to generate significant sales and earnings growth.

At the end of the quarter, the fund had approximately 74% of the portfolio invested in four sectors: Industrials, Health Care, Consumer and Financials. The sector weightings of the portfolio is a byproduct of our bottom-up stock selection strategy with a team of sector-specialist portfolio managers. We seek to find companies that have company-specific catalysts for growth rather than develop macro themes to construct sector weightings. The strategy's consistent growth bias has allowed the portfolio to produce the following statistics: average sales growth last twelve months of 23%, operating margins of 20% and median earnings growth for the last year of 20%, this compares to the Russell Midcap Growth Index of: average sales growth 19%, median operating margins 17% and median earnings growth of 16%.

Federated Hermes Kaufmann Fund

Investors should carefully consider the fund's investment objectives, risks, charges and expenses before investing. To obtain a summary prospectus or a prospectus containing this and other information, contact us or visit [FederatedHermes.com/us](https://www.federatedhermes.com/us). Please carefully read the summary prospectus or the prospectus before investing.

The fund is the successor to the Kaufmann Fund, Inc. (Kaufmann Fund) pursuant to a reorganization that took place on April 23, 2001. Prior to that date, the fund had no investment operations. Accordingly, for periods prior to that date, the performance information is that of the Kaufmann Fund, adjusted to reflect the maximum sales charge applicable to the fund's A Shares.

The fund's Institutional Shares commenced operations on December 29, 2016. For the period prior to the commencement of operations of the Institutional Shares, the performance information shown is for R Shares adjusted to remove any voluntary waiver of fund expenses related to the fund's R Shares that occurred during the period prior to the commencement of the fund's Institutional Shares.

A word about risk

Mutual funds are subject to risks and fluctuate in value.

Small company stocks may be less liquid and subject to greater price volatility than large capitalization stocks.

International investing involves special risks, including currency risk, increased volatility, political risks and differences in auditing and other financial standards.

Investing in IPOs involves special risks such as limited liquidity and increased volatility.

Definitions

Alpha shows how much or how little return is generated, given the risk a portfolio takes. A portfolio with an alpha greater than 0 has earned more than expected given its beta—meaning the portfolio has generated excess return without increasing risk. A portfolio with a negative alpha is producing a lower return than would be expected given its risk.

Beta measures a portfolio's volatility relative to the market. A beta greater than 1.00 suggests the portfolio has historically been more volatile than the market as measured by the fund's benchmark. A beta less than 1.00 suggests the portfolio has historically had less volatility relative to the market.

Correlation is the degree to which one variable (here, the fund's returns) fluctuates relative to another (the returns of the fund's benchmark). Correlation ranges from 1.00, when two variables move identically in the same direction, to -1.00, when two variables move identically in the opposite direction.

R-squared indicates what percentage of a portfolio's movement in performance is explained by movement in performance of the market. R-squared ranges from 0 to 100, and a score of 100 suggests that all movements of a portfolio's performance are completely explained by movements in the market as measured by the fund's benchmark.

Standard deviation is a historical measure of the variability of returns relative to the average annual return. A higher number indicates higher overall volatility.

Weighted median P/E (LTM—latest 12 months) is a ratio comparing share price to earnings per share using data from the previous 12 months.

Weighted median P/E (NTM—next 12 months) is a ratio comparing share price to earnings-per-share using estimated data for the next 12 months.

Weighted median market cap is the calculation representing the median market capitalization of the stocks in the portfolio, weighted by the amount of each stock.

Russell 1000[®] Index measures the performance of the large-cap segment of the US equity universe. It is a subset of the Russell 3000[®] Index and includes approximately 1000 of the largest securities based on a combination of their market cap and current index membership. The Russell 1000[®] represents approximately 92% of the US market. The

Russell 1000[®] Index is constructed to provide a comprehensive and unbiased barometer for the large-cap segment and is completely reconstituted annually to ensure new and growing equities are reflected.

Russell 2000[®] Index measures the performance of the small-cap segment of the US equity universe. The Russell 2000 is a subset of the Russell 3000[®] Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. The Russell 2000[®] Index is constructed to provide a comprehensive and unbiased small-cap barometer and is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set.

Russell Midcap[®] Growth Index measures the performance of the mid-cap growth segment of the US equity universe. It includes those Russell Midcap[®] Index companies with higher price-to-book ratios and higher forecasted growth values. It is constructed to provide a comprehensive and unbiased barometer of the mid-cap growth market. The index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true mid-cap growth market.

Russell Midcap[®] Index measures the performance of the mid-cap segment of the US equity universe. The Russell Midcap[®] Index is a subset of the Russell 1000[®] Index. It includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. The Russell Midcap[®] Index represents approximately 27% of the total market capitalization of the Russell 1000 companies.

S&P 500[®] Index is an unmanaged capitalization-weighted index of 500 stocks designated to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Indexes are unmanaged and cannot be invested in directly.
