Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after-tax returns, contact us or visit FederatedHermes.com/us. Maximum offering price figures reflect the maximum sales charge of 5.5% for A Shares. See the prospectus for other fees and expenses that apply to a continued investment in the fund. Total returns for periods of less than one year are cumulative.

* The fund's expense ratio is from the most recent prospectus. The expense ratio may reflect voluntary fee waivers and/or expense reimbursements determined by the fund's Advisor and its affiliates. The voluntary waivers and/or reimbursements, if applicable, are in effect up to but not including the later of 1/1/24 or the date of the fund's next effective prospectus.

Distinguishing characteristics

Transparent and accountable process

- Capital efficiency and transparency are built into the compensation structure
- Bonus pool is allocated according to individual's contribution to results
- Incentivized to optimize capital

Tenured team, differentiated portfolio

Team follows same 35-year philosophy and process used since inception of the Kaufmann strategy

- Distinguished professionals with specialized industry ties; organized for full accountability
- Continuity of team allows for constructive problem solving
- Seeking a differentiated, large-cap portfolio

Extensive research, long-term results

Independent, proprietary research focuses on:

- Exceptional business models
- Positive inflections of business momentum
- Clear pathway to free cash flow growth

Past performance is no guarantee of future results.

Sector weightings (%)

Totals may not add up to 100% due to rounding.

The index position were small hedges we invested in given macro uncertainty.

Portfolio composition is based on net assets at the close of business on 6/30/23 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change.

Highlights

- Global equity markets continued to rally on the prospects of central banks slowing or pausing rate hikes in the near future
- Growth stocks outperformed value stocks during the quarter
- Stock selection helped with relative performance versus the benchmark
- The Health Care sector positively contributed to the fund's performance

Looking back

During the second quarter of 2023, the U.S. economy and most significant westernized economies saw economic growth continuing to slow as rising rates and inflation took their toll on economic activity. Inflationary pressures persisted due to the impact of record monetary and fiscal stimulus as well as the Eastern European conflict along with regulatory restrictions causing supply disruptions. These inflationary pressures have caused most global central banks to pursue aggressive monetary tightening policies in 2022 that have continued into 2023. This pressure seemed to ease a bit as some economic statistics showed potential signs of inflation peaking and heading lower. This led to global equities continuing their surge in the second quarter of 2023, especially equities most sensitive to rates, such as technology stocks. The U.S. indexes that were up the most during the quarter were led by the technology and growth-related stocks represented by the NASDAQ Composite Index, which returned 13.05%, followed by the S&P 500 Index (8.74%), followed by large cap stocks represented by the Russell Large-Cap Index (8.58%), followed by small cap stocks represented by the Russell 2000 Index (5.19%), finally followed by the mid-cap stocks represented by the Russell Midcap Index (4.76%). Mid-cap growth stocks outperformed mid-cap value stocks during the quarter.

During the quarter, the portfolio team added new equity positions of the following select new holdings: Agnico Eagle Mines Ltd., Newmont Corporation, Quanta Services, Barrick Gold Corporation, Trane Technologies, ABB Ltd. (new), Alphabet Inc. (new), Pinterest Inc. (new), Universal Music Group NV (new), Kenvue Inc. (new IPO) AstraZeneca PLC (new), Establishment Labs Holdings (new) Fusion Pharmaceuticals (new), Lantheus Holdings (new), Minerva Neurosciences, Regulus Therapeutics (new), Tela Bio Inc. (new), Vaxcyte Inc. (new), Comfort Systems USA (new), GXO Logistics Inc. (new), Generac Holdings Inc. (new), HashiCorp Inc. (new), Microsoft Corporation (new) and Taiwan Semiconductor Manufacturing Company Ltd. (new).

Also during the quarter, the portfolio subtracted or reduced the following equity positions in pursuit of better opportunities: Argenx SE, Mercury Systems Inc., Avidity Biosciences (exited), GDS Holdings Inc. (exited), Union Pacific Corporation (exited), KKR & Company (exited).

Capital markets activities during the quarter:

The fund participated in one IPO in the quarter as the IPO market remained very quiet during the quarter after still recovering from the record year in 2021: Kenvue Inc.

The fund participated in nine secondary offerings during the quarter: Tela Bio Inc., Vaxcyte Inc., Ideaya Biosciences, Establishment Labs Holdings, Morphic Holdings Inc., London Stock Exchange Group PLC, Zentalis Pharmaceuticals LLC, Moonlake Immunotherapeutics and Guardant Health Inc.

Performance

The Federated Hermes Kaufmann Fund returned 6.06% (Institutional Shares at NAV) for the three months ended June 30, 2023. That compares with its benchmark, the Russell Midcap Growth Index, which returned 6.23% during the same period.

Performance contributors

- Stocks that made a positive contribution to performance included CoStar Group Inc., Legend Biotech Corporation, Dynavax Technologies Corporation, Amphastar Pharmaceuticals and Eli Lilly and Company

Performance detractors

- Stocks that detracted from performance included GDS Holdings Ltd., Newmont Corporation, Sarepta Therapeutics Inc., Alibaba Group Holdings Ltd. and Barrick Gold Corporation

Performance quoted represents past performance, which is no guarantee of future results. How we are positioned

As the U.S. economy continues through 2023, many headwinds persist, from global monetary tightening to inflation to geopolitical uncertainty. These questions among others are likely to endure throughout the year, which could cause market uncertainty. One indicator of investor caution would be the continued quiet IPO activity since the peak in 2021. After a record-breaking year in 2021, the 2022 U.S. IPO issuance remained quiet with 71 IPOs priced in 2022; however, in 2023, the market has shown some signs of recovering, with 52 IPOs raising \$9 billion according to Renaissance Capital. Despite the macro uncertainties, the Kaufmann team continues to be focused on finding and investing in companies that have little dependence on the economy, good or bad, to generate significant sales and earnings growth.

This quarter, the fund had approximately 63% of the portfolio invested in four sectors: Industrials, Health Care, Consumer and Financials. The sector weightings of the portfolio are a byproduct of our bottom-up stock selection strategy with a team of sector-specialist portfolio managers. These sectors also have historically provided good opportunities for bottom-up growth investors. We seek to find companies that have company-specific catalysts for growth rather than develop macro themes to construct sector weightings. The strategy's consistent growth bias has allowed the portfolio to produce the following statistics: average sales growth last 12 months of 30%, operating margins of 23% and median earnings growth for the last year of 17%. This compares to the Russell Midcap Growth Index as follows: average sales growth of 23%, median operating margins of 20% and median earnings growth of 15%.

Federated Hermes Kaufmann Fund

Investors should carefully consider the fund's investment objectives, risks, charges and expenses before investing. To obtain a summary prospectus or a prospectus containing this and other information, contact us or visit [FederatedHermes.com/us](https://www.federatedhermes.com/us). Please carefully read the summary prospectus or the prospectus before investing.

The fund is the successor to the Kaufmann Fund, Inc. (Kaufmann Fund) pursuant to a reorganization that took place on April 23, 2001. Prior to that date, the fund had no investment operations. Accordingly, for periods prior to that date, the performance information is that of the Kaufmann Fund, adjusted to reflect the maximum sales charge applicable to the fund's A Shares.

The fund's Institutional Shares commenced operations on December 29, 2016. For the period prior to the commencement of operations of the Institutional Shares, the performance information shown is for R Shares adjusted to remove any voluntary waiver of fund expenses related to the fund's R Shares that occurred during the period prior to the commencement of the fund's Institutional Shares.

A word about risk

Mutual funds are subject to risks and fluctuate in value.

Small company stocks may be less liquid and subject to greater price volatility than large capitalization stocks.

International investing involves special risks, including currency risk, increased volatility, political risks and differences in auditing and other financial standards.

Investing in IPOs involves special risks such as limited liquidity and increased volatility.

Definitions

Alpha shows how much or how little return is generated, given the risk a portfolio takes. A portfolio with an alpha greater than 0 has earned more than expected given its beta—meaning the portfolio has generated excess return without increasing risk. A portfolio with a negative alpha is producing a lower return than would be expected given its risk.

Beta measures a portfolio's volatility relative to the market. A beta greater than 1.00 suggests the portfolio has historically been more volatile than the market as measured by the fund's benchmark. A beta less than 1.00 suggests the portfolio has historically had less volatility relative to the market.

Correlation is the degree to which one variable (here, the fund's returns) fluctuates relative to another (the returns of the fund's benchmark). Correlation ranges from 1.00, when two variables move identically in the same direction, to -1.00, when two variables move identically in the opposite direction.

R-squared indicates what percentage of a portfolio's movement in performance is explained by movement in performance of the market. R-squared ranges from 0 to 100, and a score of 100 suggests that all movements of a portfolio's performance are completely explained by movements in the market as measured by the fund's benchmark.

Standard deviation is a historical measure of the variability of returns relative to the average annual return. A higher number indicates higher overall volatility.

Weighted median P/E (LTM—latest 12 months) is a ratio comparing share price to earnings per share using data from the previous 12 months.

Weighted median P/E (NTM—next 12 months) is a ratio comparing share price to earnings-per-share using estimated data for the next 12 months.

Weighted median market cap is the calculation representing the median market capitalization of the stocks in the portfolio, weighted by the amount of each stock.

Russell 1000® Index measures the performance of the large-cap segment of the U.S. equity universe. It is a subset of the Russell 3000® Index and includes approximately 1000 of the largest securities based on a combination of their market cap and current index membership. The Russell 1000® represents approximately 92% of the U.S. market. The

Russell 1000® Index is constructed to provide a comprehensive and unbiased barometer for the large-cap segment and is completely reconstituted annually to ensure new and growing equities are reflected.

Russell 2000® Index measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000 is a subset of the Russell 3000® Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. The Russell 2000® Index is constructed to provide a comprehensive and unbiased small-cap barometer and is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set.

Russell Midcap® Growth Index measures the performance of the mid-cap growth segment of the U.S. equity universe. It includes those Russell Midcap® Index companies with higher price-to-book ratios and higher forecasted growth values. It is constructed to provide a comprehensive and unbiased barometer of the mid-cap growth market. The index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true mid-cap growth market.

Russell Midcap® Index measures the performance of the mid-cap segment of the U.S. equity universe. The Russell Midcap® Index is a subset of the Russell 1000® Index. It includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. The Russell Midcap® Index represents approximately 27% of the total market capitalization of the Russell 1000 companies.

S&P 500® Index is an unmanaged capitalization-weighted index of 500 stocks designated to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Indexes are unmanaged and cannot be invested in directly.
