Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after-tax returns, contact us or visit FederatedHermes.com/us. Maximum offering price figures reflect the maximum sales charge of 5.5% for A Shares. See the prospectus for other fees and expenses that apply to a continued investment in the fund. Total returns for periods of less than one year are cumulative.

* The fund's expense ratio is from the most recent prospectus. The expense ratio may reflect voluntary fee waivers and/or expense reimbursements determined by the fund's Advisor and its affiliates. The voluntary waivers and/or reimbursements, if applicable, are in effect up to but not including the later of 1/1/25 or the date of the fund's next effective prospectus.

Distinguishing characteristics

Transparent and accountable process

- Capital efficiency and transparency are built into the compensation structure
- Bonus pool is allocated according to individual's contribution to results
- Incentivized to optimize capital

Tenured team, differentiated portfolio

Team follows same 35-year philosophy and process used since inception of the Kaufmann strategy

- Distinguished professionals with specialized industry ties; organized for full accountability
- Continuity of team allows for constructive problem solving
- Seeking a differentiated, small-cap portfolio

Extensive research, long-term results

Independent, proprietary research focuses on:

- Exceptional business models
- Positive inflections of business momentum
- Clear pathway to free cash flow growth

Past performance is no guarantee of future results.

Sector weightings (%)

Totals may not add up to 100% due to rounding.

The index position were small hedges we invested in given macro uncertainty.

Portfolio composition is based on net assets at the close of business on 12/31/23 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change.

Highlights

- Global equity markets rallied into year-end as markets began to price in the prospects of a dovish central bank posture along with a low likelihood of a U.S. recession
- Growth stocks outperformed value stocks during the quarter continuing the year-long trend
- Stock selection led to relative underperformance
- The health care sector negatively contributed to the fund's performance on a relative basis

Looking back

During the fourth quarter of 2023, the U.S. economy and most significant westernized economies saw economic growth continuing to slow as rising rates and inflation took its toll on economic activity. Inflation moderated as fiscal stimuli slowed and geopolitical issues seemed contained. The global inflationary pressures directionally are enabling central banks to halt their monetary tightening policies that have persisted during 2022-2023. The bond markets reacted to slower inflation and lower economic activity, bringing rates down from their highs boosting equities into December 2023. The U.S. indexes that were up the most during the last quarter were small cap stocks represented by the Russell 2000 Index, which returned 14.02%; followed by the Nasdaq Composite, which returned 13.84%; followed by mid cap stocks represented by the Russell Midcap Index, which returned 12.80%; followed by large cap stocks represented by the Russell 1000 Index, which returned 11.95%; followed by the S&P 500 Index, which returned 11.68%. Large cap growth stocks outperformed large cap value stocks during the quarter, continuing the year long trend.

During the quarter, the portfolio team added new positions of the following equity positions to the portfolio: Reservoir Media Inc. (new), Birkenstock Holdings Inc. (IPO), DraftKings Inc. (new), DreamFinders Homes Inc. (new), Dyne Therapeutics (new), Xenon Pharmaceuticals (new), Zealand Pharmaceuticals (new), Braze Inc. (new), Klaviyo Inc. (new), Teradata Corp. (new) and Confluent Inc.

Also during the quarter, the portfolio exited or reduced the following equity positions in pursuit of better opportunities: Okta Inc., Novata, Rogers Inc., Matador Resources and Scotts Inc.

Capital markets activities during the quarter: The small cap fund participated in one IPOs in the quarter as the IPO market remained very quiet during the quarter as the market still recovers from the 2021 record breaking year: Birkenstock Holdings Inc.

The team was active in the secondary equity markets during the quarter. The fund participated in five secondary offers and the following is a select list of secondary offerings during the quarter: Ultragenyx Pharmaceuticals, Ideaya Biosciences, Verve Therapeutics, Xenon Pharmaceuticals and 89Bio Inc.

Performance

The Federated Hermes Kaufmann Small Cap Fund (Institutional Shares) returned 10.94% at NAV for the three months ended December 29, 2023. That compares with its benchmark, the Russell 2000 Growth Index, which returned 12.75% during the same period.

Performance contributors

- Stocks that made a positive contribution to performance: Wingstop Inc., Amphastar Pharmaceuticals, Rhythm Pharmaceutical, Hamilton Lane Inc. and Planet Fitness Inc.

Performance detractors

- Stocks that detracted ArGEN-x Se, Structure Therapeutics Inc., Sarepta Therapeutics, Chart industries and Legend Biotech Corp.

Performance quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after-tax returns, contact us or visit FederatedHermes.com/us.

How we are positioned

As the U.S. economy finishes 2023, many headwinds persist from global monetary tightening to inflation to geopolitical uncertainty. These questions among others are likely to endure into 2024, which could cause market uncertainty. One indicator of investor caution would be the continued quiet IPO activity since the peak in 2021. After a record-breaking year in 2021, U.S. IPO issuance slowed, with 71 IPOs priced in 2022. However, in 2023, the market showed some signs of recovering with 108 IPOs raising \$20 billion according to Renaissance Capital. Despite the macro uncertainties, the Kaufmann team continues to be focused on its goal of finding and investing in companies that have little dependence on the economy, good or bad, to generate significant sales and earnings growth.

This quarter the fund had approximately 72% of the portfolio invested in four sectors: Information Technology, Health Care, Consumer and Industrials. The sector weightings of the portfolio are a byproduct of our bottom-up stock selection strategy with a team of sector-specialist portfolio managers. These sectors also have historically provided good opportunities for bottom-up growth investors. We seek to find companies that have company-specific catalysts for growth rather than develop macro themes to construct sector weightings. The strategy's consistent growth bias has allowed the portfolio to produce the following statistics: average sales growth last 12 months of 33%, operating margins of 20% and median earnings growth for the last year of 13%. This compares to the Russell 2000 Growth Index as follows: average sales growth of 28%, median operating margins of 14% and median earnings growth of 7%.

Federated Hermes Kaufmann Small Cap Fund

Investors should carefully consider the fund's investment objectives, risks, charges and expenses before investing. To obtain a summary prospectus or a prospectus containing this and other information, contact us or visit [FederatedHermes.com/us](https://www.federatedhermes.com/us). Please carefully read the summary prospectus or the prospectus before investing.

The fund's R6 Shares commenced operations on September 1, 2017. For the period prior to the commencement of operations of the R6 Shares, the performance information shown is for the fund's A Shares adjusted to reflect the expenses of the fund's R6 Shares for each year for which the Fund's R6 Shares expenses would have exceeded the actual expenses paid by the fund's A Shares. The performance information has also been adjusted to reflect any applicable differences between the sales loads and charges imposed on the purchase and redemption of R6 Shares and A Shares, as well as the removal of any voluntary waivers/reimbursements of fund expenses that may have occurred during the periods prior to the commencement of operations of the R6 Shares.

The fund's Institutional Shares commenced operations on December 30, 2015. For the period prior to the commencement of operations for the Institutional Shares, the performance information shown is for the A Shares adjusted to reflect the expenses of the Institutional Shares for each year for which the expenses of the Institutional Shares would have exceeded the actual expenses paid by the fund's A Shares. The performance information has also been adjusted to reflect any applicable differences between the sales loads and charges imposed on the purchase and redemption of Institutional and A Shares, as well as the removal of any voluntary waivers/reimbursements of fund expenses that may have occurred during the periods prior to the commencement of operations of the Institutional Shares.

A word about risk

Mutual funds are subject to risks and fluctuate in value.

International investing involves special risks, including currency risk, increased volatility, political risks and differences in auditing and other financial standards.

Investing in IPOs involves special risks such as limited liquidity and increased volatility.

The fund may invest in small capitalization (or "smallcap") companies. Small-cap companies may have less liquid stock, a more volatile share price, unproven track records, a limited product or service base and limited access to capital. The above factors could make small-cap companies more likely to fail than larger companies and increase the volatility of the fund's portfolio, performance and price. Suitable securities of small-cap companies also can have limited availability and cause capacity constraints on investment strategies for funds that invest in them.

Definitions

Alpha shows how much or how little return is generated, given the risk a portfolio takes. A portfolio with an alpha greater than 0 has earned more than expected given its beta—meaning the portfolio has generated excess return without increasing risk. A portfolio with a negative alpha is producing a lower return than would be expected given its risk.

Beta measures a portfolio's volatility relative to the market. A beta greater than 1.00 suggests the portfolio has historically been more volatile than the market as measured by the fund's benchmark. A beta less than 1.00 suggests the portfolio has historically had less volatility relative to the market.

R-squared indicates what percentage of a portfolio's movement in performance is explained by movement in performance of the market. R-squared ranges from 0 to 100, and a score of 100 suggests that all movements of a portfolio's performance are completely explained by movements in the market as measured by the fund's benchmark.

Standard deviation is a historical measure of the variability of returns relative to the average annual return. A higher number indicates higher overall volatility.

Weighted median P/E (LTM—latest 12 months) is a ratio comparing share price to earnings per share using data from the previous 12 months.

Weighted median P/E (NTM—next 12 months) is a ratio comparing share price to earnings-per-share using estimated data for the next 12 months.

Weighted median market cap is the calculation representing the median market capitalization of the stocks in the portfolio, weighted by the amount of each stock.

Russell 1000® Index measures the performance of the large-cap segment of the U.S. equity universe. It is a subset of the Russell 3000® Index and includes approximately 1000 of the largest securities based on a combination of their market cap and current index membership. The Russell 1000® represents approximately 92% of the U.S. market. The

Russell 1000® Index is constructed to provide a comprehensive and unbiased barometer for the large-cap segment and is completely reconstituted annually to ensure new and growing equities are reflected.

Russell 2000® Growth Index measures the performance of the small-cap growth segment of the U.S. equity universe. It includes those Russell 2000® Index companies with higher price-to-value ratios and higher forecasted growth values. The Russell 2000® Growth Index is constructed to provide a comprehensive and unbiased barometer for the small-cap growth segment. The Index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set and that the represented companies continue to reflect growth characteristics.

Russell 2000® Index measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000 is a subset of the Russell 3000® Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. The Russell 2000® Index is constructed to provide a comprehensive and unbiased small-cap barometer and is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set.

Russell Midcap® Index measures the performance of the mid-cap segment of the U.S. equity universe. The Russell Midcap® Index is a subset of the Russell 1000® Index. It includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. The Russell Midcap® Index represents approximately 27% of the total market capitalization of the Russell 1000 companies.

S&P 500® Index is an unmanaged capitalization-weighted index of 500 stocks designated to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Indexes are unmanaged and cannot be invested in directly.
