**This report describes changes made to the Fund during the reporting period.**

### What were the Fund costs for the last year?

(based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class R6 Shares	\$67	0.66%

### Management's Discussion of Fund Performance

The following discussion compares the performance of the Fund to a blended index comprised of 55% Bloomberg US Leveraged Loan Index; 30% ICE BofA 1-Year US Treasury Note Index; 15% ICE BofA US Dollar 1-Month Deposit Offered Rate Constant Maturity Index (the "Blended Index") to show how the Fund's performance compares to the returns of similar investments for the reporting period. See the Average Annual Total Returns table below for the returns of the Fund and related indexes including the Bloomberg US Aggregate Bond Index, a required broad-based index which represents the overall U.S. fixed-income market. The Fund seeks to provide total return consistent with current income and low interest rate volatility by investing primarily in a strategic mix of floating-rate fixed-income investments: domestic investment-grade, domestic noninvestment-grade and foreign fixed-income.

#### Top Contributors to Performance

- The Fund's investment grade holdings significantly outperformed their Blended Index component through positive security selection, creating the strongest contributor to relative performance.
- The Fund's Project and Trade Finance holdings also significantly outperformed their Blended Index component, producing a meaningful positive relative contribution despite being underweight the sector versus the Blended Index.
- The Fund's overweight allocation to bank loans was a positive contributor to relative performance as bank loans were the highest performing sector within the Blended Index; within the Fund's bank loan holdings, security selection drove outperformance versus the Blended Index.

#### Top Detractors from Performance

- The Fund's cash holdings detracted from performance relative to the Blended Index because cash had the lowest return of all the Fund's investments.

## Fund Performance

**Keep in mind that the Fund's past performance is not a good predictor of how the Fund will perform in the future. The graph and table do not reflect the deduction of taxes that a shareholder would pay on fund distributions or redemption of fund shares.**

Cumulative Performance: 3/31/2016 to 3/31/2026
