## Federated Hermes Kaufmann Fund II

---

A Portfolio of Federated Hermes Insurance Series

A mutual fund seeking capital appreciation by investing principally in common stocks.

As with all mutual funds, the Securities and Exchange Commission (SEC) has not approved or disapproved these securities or passed upon the adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

Fund Shares are available exclusively as a funding vehicle for life insurance companies writing variable life insurance policies and variable annuity contracts. They are subject to investment limitations that do not apply to other mutual funds available directly to the general public. Therefore, any comparison of these two types of mutual funds would be inappropriate. This Prospectus should be accompanied by the Prospectuses for such variable contracts.

# Fund Summary Information

## Federated Hermes Kaufmann Fund II (the "Fund")

### RISK/RETURN SUMMARY: INVESTMENT OBJECTIVE

The Fund's investment objective is capital appreciation.

### RISK/RETURN SUMMARY: FEES AND EXPENSES

Note: The table below and the Example that follows it relate exclusively to the Primary Shares (P) of the Fund. They do not reflect any additional fees or expenses that may be imposed by separate accounts of insurance companies or in connection with any variable annuity or variable life insurance contract. If these had been included, your costs would be higher.

This table describes the fees and expenses that you may pay if you buy, hold and sell P class of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.**

#### Shareholder Fees (fees paid directly from your investment)

	P
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price) .....	N/A
Maximum Deferred Sales Charge (Load) (as a percentage of original purchase price or redemption proceeds, as applicable) .....	N/A
Maximum Sales Charge (Load) Imposed on Reinvested Dividends (and other Distributions) (as a percentage of offering price) .....	N/A
Redemption Fee (as a percentage of amount redeemed, if applicable) .....	N/A
Exchange Fee .....	N/A

#### Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	P
Management Fee .....	1.30%
Distribution (12b-1) Fee .....	0.00% <sup>1</sup>
Other Expenses .....	0.27% <sup>2</sup>
Total Annual Fund Operating Expenses .....	1.57%
Fee Waivers and/or Expense Reimbursements .....	(0.02)% <sup>3</sup>
Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements .....	1.55%

1 The Fund has adopted a Distribution (12b-1) Plan for its P class pursuant to which the P class of the Fund may incur and pay a Distribution (12b-1) fee of up to a maximum amount of 0.25%. No such fee is currently incurred and paid by the P class of the Fund. The P class of the Fund will not incur and pay such a Distribution (12b-1) fee until such time as approved by the Fund's Board of Trustees (the "Trustees").

2 The Fund may incur and pay administrative service fees on its P class of up to a maximum amount of 0.25%. No such fees are currently incurred and paid by the P class of the Fund. The P class of the Fund will not incur and pay such fees until such time as approved by the Trustees.

3 The Adviser and certain of its affiliates, on their own initiative, have agreed to waive certain amounts of their respective fees and/or reimburse expenses. Effective May 1, 2024, total annual fund operating expenses (excluding acquired fund fees and expenses, interest expense, extraordinary expenses, and proxy-related expenses, if any) paid by the Fund's P class (after the voluntary waivers and/or reimbursements) will not exceed 1.54% (the "Fee Limit") up to but not including the later of (the "Termination Date"): (a) May 1, 2025; or (b) the date of the Fund's next effective Prospectus. While the Adviser and its affiliates currently do not anticipate terminating or increasing these arrangements prior to the Termination Date, these arrangements may only be terminated or the Fee Limit increased prior to the Termination Date with the agreement of the Trustees.

#### Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 for the time periods indicated and then redeem or hold all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that operating expenses remain the same. The Example does not reflect sales charges (loads) on reinvested dividends. If these sales charges (loads) were included, your costs would be higher. Although your actual costs and returns may be higher or lower, based on these assumptions your costs would be:

1 Year	\$ 160
3 Years	\$ 496
5 Years	\$ 855
10 Years	\$1,867

### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 56% of the average value of its portfolio.

### RISK/RETURN SUMMARY: INVESTMENTS, RISKS AND PERFORMANCE

#### What are the Fund’s Main Investment Strategies?

In seeking to achieve its objective, the Fund invests a majority of its assets in the common stocks of small- and medium-sized companies that are traded on national securities exchanges, the NASDAQ stock market and on the over-the-counter market. Up to 30% of the Fund’s net assets may be invested in foreign securities. When investing in foreign securities, the Fund’s Adviser and Sub-Adviser (collectively, “Adviser”) may emphasize investment in a particular country or group of countries which may subject the Fund to the risks of investing in such country or group of countries to a greater extent than if the Fund’s foreign security exposure was diversified over a greater number of countries. The Adviser’s process for selecting investments is bottom-up and growth-oriented.

The Fund may invest in fixed-income securities, American Depositary Receipts (ADRs) and use derivative contracts (such as, for example, futures contracts, options and swaps) and/or hybrid instruments to implement elements of its investment strategy. For example, the Fund may use derivative contracts or hybrid instruments to increase or decrease the portfolio’s exposure to the investment(s) underlying the derivative or hybrid instruments in an attempt to benefit from changes in the value of the underlying investment(s), to realize gains from trading a derivative contract or to hedge against potential losses. There can be no assurances the Fund’s use of derivative contracts and/or hybrid instruments will work as intended.

#### What are the Main Risks of Investing in the Fund?

All mutual funds take investment risks. Therefore, it is possible to lose money by investing in the Fund. The primary factors that may reduce the Fund’s returns include:

- **Stock Market Risk.** The value of equity securities in the Fund’s portfolio will fluctuate and, as a result, the Fund’s Share price may decline suddenly or over a sustained period of time. Information publicly available about a company, whether from the company’s financial statements or other disclosures or from third parties, or information available to some but not all market participants, can affect the price of a company’s shares in the market. Among other factors, equity securities may decline in value because of an increase in interest rates or changes in the stock market. Recent and potential future changes in industry and/or economic trends, as well as changes in monetary policy made by central banks and/or their governments, also can affect the level of interest rates and contribute to the development of or increase in volatility, illiquidity, shareholder redemptions and other adverse effects (such as a decline in a company’s stock price), which could negatively impact the Fund’s performance.
- **Risk Related to Investing for Growth.** Due to their relatively high valuations, growth stocks are typically more volatile than value stocks. For instance, the price of a growth stock may experience a larger decline on a forecast of lower earnings, a negative fundamental development, or an adverse market development. Further, growth stocks may not pay dividends or may pay lower dividends than value stocks. This means they depend more on price changes for returns and may be more adversely affected in a down market compared to value stocks that pay higher dividends.
- **Mid-Cap Company Risk.** The Fund may invest in mid-capitalization (or “mid-cap”) companies. Mid-cap companies often have narrower markets, limited managerial and financial resources, more volatile performance and greater risk of failure, compared to larger, more established companies. These factors could increase the volatility of the Fund’s portfolio, performance and Share price.

- **Small-Cap Company Risk.** The Fund may invest in small capitalization (or “small-cap”) companies. Small-cap companies may have less liquid stock, a more volatile share price, unproven track records, a limited product or service base and limited access to capital. The above factors could make small-cap companies more likely to fail than larger companies, and increase the volatility of the Fund’s portfolio, performance and Share price.
- **Focused Investment Risk.** To the extent that the Fund focuses its investments in the securities of a particular issuer or companies in a particular country, group of countries, region, market, industry, group of industries, sector, or asset class, the Fund’s exposure to various risks may be heightened, including price volatility and adverse economic, market, political, or regulatory occurrences affecting that issuer, country, group of countries, region, market, industry, group of industries, sector, or asset class.
- **Liquidity Risk.** Liquidity risk refers to the possibility that the Fund may not be able to sell a security or close out a derivative contract when it wants to. If this happens, the Fund will be required to continue to hold the security or keep the position open, and the Fund could incur losses. OTC derivative contracts generally carry greater liquidity risk than exchange-traded contracts.
- **Risk of Foreign Investing.** Because the Fund invests in securities issued by foreign companies and national governments, the Fund’s Share price may be more affected by foreign economic and political conditions, taxation policies and accounting and auditing standards than could otherwise be the case.
- **Risk of Investing in ADRs and Domestically Traded Securities of Foreign Issuers.** Because the Fund may invest in ADRs and other domestically traded securities of foreign companies, the Fund’s Share price may be more affected by foreign economic and political conditions, taxation policies and accounting and auditing standards than would otherwise be the case.
- **Custodial Services and Related Investment Costs.** Custodial services and other costs relating to investment in international securities markets generally are more expensive due to differing settlement and clearance procedures than those of the United States. The inability of the Fund to make intended securities purchases due to settlement problems could cause the Fund to miss attractive investment opportunities. In addition, security settlement and clearance procedures in some emerging market countries may not fully protect the Fund against loss of its assets.
- **Currency Risk.** Exchange rates for currencies fluctuate daily. Foreign securities are normally denominated and traded in foreign currencies. As a result, the value of the Fund’s foreign investments and the value of the Shares may be affected favorably or unfavorably by changes in currency exchange rates relative to the U.S. dollar.
- **European Union and Eurozone Related Risk.** A number of countries in the European Union (EU), including certain countries within the EU that have adopted the euro (Eurozone) have experienced, and may continue to experience, severe economic and financial difficulties. Additional countries within the EU may also fall subject to such difficulties. These events could negatively affect the value and liquidity of the Fund’s investments in euro-denominated securities and derivatives contracts, securities of issuers located in the EU or with significant exposure to EU issuers or countries.
- **Risk of Investing in Derivative Contracts and Hybrid Instruments.** Derivative contracts and hybrid instruments involve risks different from, or possibly greater than, risks associated with investing directly in securities and other traditional investments. Specific risk issues related to the use of such contracts and instruments include valuation issues, increased potential for losses and/or costs to the Fund and a potential reduction in gains to the Fund. Each of these issues is described in greater detail in this Prospectus. Derivative contracts and hybrid instruments may also involve other risks described in this Prospectus, such as stock market, credit, currency, liquidity and leverage risks.
- **Credit Risk.** Credit risk includes the possibility that a party to a transaction (such as a derivative transaction) involving the Fund will fail to meet its obligations. This could cause the Fund to lose money or the benefit of the transaction or prevent the Fund from selling or buying other securities to implement its investment strategy.
- **Initial Public Offerings (IPOs) Risk.** IPOs are initial public offerings of equity securities. Securities issued in IPOs have no trading history, and there may only be limited information about the companies. In addition, the prices of securities sold in IPOs may be highly volatile and may rise or fall shortly after an IPO.
- **Leverage Risk.** Leverage risk is created when an investment (such as a derivative transaction) exposes the Fund to a level of risk that exceeds the amount invested. Changes in the value of such an investment magnify the Fund’s risk of loss and potential for gain.

- **Interest Rate Risk.** Prices of fixed-income securities generally fall when interest rates rise. The longer the duration of a fixed-income security, the more susceptible it is to interest rate risk. Recent and potential future changes in monetary policy made by central banks and/or their governments are likely to affect the level of interest rates.
- **Risk Related to the Economy.** The value of the Fund’s portfolio may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets. Economic, political and financial conditions, industry or economic trends and developments or public health risks, such as epidemics or pandemics, may, from time to time, and for varying periods of time, cause the Fund to experience volatility, illiquidity, shareholder redemptions, or other potentially adverse effects.
- **Technology Risk.** The Adviser uses various technologies in managing the Fund, consistent with its investment objective and strategy described in this Prospectus. For example, proprietary and third-party data and systems are utilized to support decision-making for the Fund. Data imprecision, software or other technology malfunctions, programming inaccuracies and similar circumstances may impair the performance of these systems, which may negatively affect Fund performance.

The Shares offered by this Prospectus are not deposits or obligations of any bank, are not endorsed or guaranteed by any bank and are not insured or guaranteed by the U.S. government, the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

**PERFORMANCE: BAR CHART AND TABLE**

**Risk/Return Bar Chart**

The bar chart and performance table below reflect historical performance data for the Fund and are intended to help you analyze the Fund’s investment risks in light of its historical returns. The bar chart shows the variability of the Fund’s P class total returns on a calendar year-by-year basis. The Average Annual Total Return Table shows returns *averaged* over the stated periods, and includes comparative performance information. *The Fund’s performance will fluctuate, and past performance is not necessarily an indication of future results.* For current performance information, contact your insurance company.

The total returns shown in the bar chart above are based upon net asset value and do not reflect the charges and expenses of a variable annuity or variable life insurance contract. If contract charges or fees had been included, the returns shown would have been lower.

Within the periods shown in the bar chart, the Fund’s P class highest quarterly return was 29.20% (quarter ended June 30, 2020). Its lowest quarterly return was (18.68)% (quarter ended June 30, 2022).

**Average Annual Total Return Table**

Return Before Taxes is shown for the Fund’s P class.

(For the Period Ended December 31, 2023)

Share Class	1 Year	5 Years	10 Years
<b>P Class:</b>			
Return Before Taxes	15.23%	7.31%	8.66%
<b>Russell Midcap® Growth Index</b> <sup>1</sup> (reflects no deduction for fees, expenses or taxes)	25.87%	13.82%	10.57%
<b>Morningstar Variable Underlying Mid-Cap Growth Funds Average</b> <sup>2</sup>	21.65%	12.74%	9.47%

- 1 The Russell Midcap® Growth Index measures the performance of the mid-cap growth segment of the U.S. equity universe. It includes those Russell Midcap® Index companies with higher price-to-book ratios and higher forecasted growth values. The Russell Midcap® Growth Index is constructed to provide a comprehensive and unbiased barometer of the mid-cap growth market. The Russell Midcap® Growth Index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true mid-cap growth market. The Russell Midcap® Growth Index is not adjusted to reflect sales charges, expenses or other fees that the Securities and Exchange Commission requires to be reflected in the Fund's performance. The index is unmanaged and, unlike the Fund, is not affected by cash flows. It is not possible to invest directly in an index.*
- 2 Morningstar figures represent the average of the total returns reported by all the mutual funds designated by Morningstar as falling into the respective category indicated. They do not reflect sales charges.*

## **FUND MANAGEMENT**

The Fund's Investment Adviser ("Adviser") is Federated Equity Management Company of Pennsylvania. The Fund's Sub-Adviser is Federated Global Investment Management Corp. The Fund is managed by an investment team under the leadership of Hans P. Utsch and John Ettinger, Co-Heads of the Federated Hermes Kaufmann Growth Equity Team. The following individuals are currently responsible for the day-to-day management of the Fund's portfolio:

Hans P. Utsch, Senior Portfolio Manager, has been the Fund's portfolio manager since April 2002.

John Ettinger, Senior Portfolio Manager, has been the Fund's portfolio manager since April 2014 and a member of the Fund's investment management team since April 2002.

Mark Bauknight, Senior Portfolio Manager, has been the Fund's portfolio manager since October 2003 and a member of the Fund's investment management team since April 2002.

Tom M. Brakel, Senior Portfolio Manager, has been the Fund's portfolio manager since July 2012 and a member of the Fund's investment management team since October 2003.

Barbara Miller, Senior Portfolio Manager, has been the Fund's portfolio manager since April 2014 and a member of the Fund's investment management team since April 2002.

Steven Abrahamson, Senior Portfolio Manager, has been the Fund's portfolio manager since April 2014 and a member of the Fund's investment management team since April 2002.

Stephen DeNichilo, Senior Portfolio Manager, has been the Fund's portfolio manager since December 2014 and a member of the Fund's investment management team since February 2012.

Aditi Singhanian, Portfolio Manager, has been the Fund's portfolio manager since April 2023 and a member of the Fund's investment management team since April 2018.

## **PURCHASE AND SALE OF FUND SHARES**

Shares are used solely as an investment vehicle for separate accounts of participating insurance companies offering variable annuity contracts and variable life insurance policies. The general public has access to the Fund only by purchasing a variable annuity contract or variable life insurance policy (thus becoming a contract owner). Shares are not sold directly to the general public.

Shares of the Fund can be purchased or redeemed by participating insurance companies on any day the New York Stock Exchange (NYSE) is open.

## **TAX INFORMATION**

The Fund expects, based on its investment objectives and strategies, that its distributions, if any, will consist of ordinary income, capital gains or some combination of both. Because shares of the Fund must be purchased through variable annuity contracts or variable life insurance contracts, such distribution will be exempt from current taxation if left to accumulate within the variable contract. You should ask your own tax advisor for more information on your own tax situation, including possible state or local taxes.

## **PAYMENTS TO INSURANCE COMPANIES OR QUALIFYING DEALERS**

Fund Shares are generally available only through participating insurance companies offering variable annuity contracts and variable life insurance policies. Life insurance policies and variable annuities are generally purchased through a broker-dealer or other financial intermediary. The Fund and/or its related companies may make payments to the participating insurance companies for services; some of the payments may go to broker-dealers and other intermediaries. These payments may create a conflict of interest for an intermediary, or be a factor in the participating insurance companies' decision to include the Fund as an underlying investment option in a variable contract. Ask your salesperson or visit your financial intermediary's website for more information.

## What are the Fund's Investment Strategies?

The Fund's investment objective is to provide capital appreciation. While there is no assurance that the Fund will achieve its investment objective, it endeavors to do so by following the principal strategies and policies described in this Prospectus. The Fund's Statement of Additional Information (SAI) provides information about the Fund's non-principal strategies.

In seeking to meet its objective, the Fund invests a majority of its assets in the stocks of small- and medium-sized companies that are traded on national securities exchanges, the NASDAQ stock market and on the over-the-counter market. Up to 30% of the Fund's net assets may be invested in foreign securities. Solely for purposes of complying with this policy, an issuer's security will be considered to be a foreign security if the security is denominated in a foreign currency or purchased on a securities exchange outside the United States. Certain securities not included in this definition of foreign securities may still be subject to risks of foreign investing that are described in this Prospectus. For example, an issuer that is organized in an offshore jurisdiction but who has its principal place of business and/or whose securities are traded principally on a securities exchange in the United States will not be considered a foreign security for purposes of this policy but may still be subject to risks associated with foreign securities. When investing in foreign securities, the Fund's Adviser may emphasize investment in a particular country or group of countries which may subject the Fund to the risks of investing in such country or group of countries to a greater extent than if the Fund's foreign security exposure was diversified over a greater number of countries.

When deciding which securities to buy, the Fund considers:

- the growth prospects of existing products and new product development;
- the economic outlook of the industry;
- the price of the security and its estimated fundamental value; and
- relevant market, economic and political environments.

The Fund's Adviser uses a bottom-up approach to portfolio management. There is an emphasis on individual stock selection rather than trying to time the highs and lows of the market or concentrating in certain industries or sectors. This hands-on approach means that in addition to sophisticated computer analysis, the Adviser may conduct in-depth meetings with management, industry analysts and consultants. Through this interaction with companies, the Adviser seeks to develop a thorough knowledge of the dynamics of the businesses in which the Fund invests.

The Fund assesses individual companies from the perspective of a long-term investor. It buys stocks of companies that it believes:

- are profitable and leaders in the industry;
- have distinct products and services which address substantial markets;
- can rapidly grow annual earnings over the next three to five years; and/or
- have superior proven management and solid balance sheets.

Typically, the Fund sells an individual security when the company fails to meet expectations, there is a deterioration of underlying fundamentals or the intermediate and long-term prospects become poor.

The Fund may also seek capital appreciation by buying securities in initial public offerings. The Fund will participate in such offerings without regard to the issuer's market capitalization. The Adviser may select initial public offerings based on its fundamental analysis of the issuer.

The Fund may loan up to 30% of its total assets in the form of its portfolio securities to unaffiliated broker/dealers, banks or other recognized institutional borrowers to generate additional income. The Fund receives cash, U.S. Treasury obligations and/or other liquid securities as collateral. The Fund also may invest up to 15% of its net assets in illiquid securities.

The Fund may use derivative contracts and/or hybrid instruments to implement elements of its investment strategy. The types of derivatives that the Fund may use include, among others, futures contracts, options and swaps. For example, the Fund may use derivative contracts or hybrid instruments to increase or decrease the portfolio's exposure to the investment(s) underlying the derivative or hybrid instrument in an attempt to benefit from changes in the value of the underlying investment(s). Additionally, by way of example, the Fund may use derivative contracts in an attempt to:

- obtain premiums from the sale of derivative contracts;
- realize gains from trading a derivative contract; or
- hedge against potential losses.

There can be no assurance that the Fund's use of derivative contracts or hybrid instruments will work as intended.

## **PORTFOLIO TURNOVER**

The Fund actively trades its portfolio securities in an attempt to achieve its investment objective. Active trading will cause the Fund to have an increased portfolio turnover rate and increase the Fund's trading costs, which may have an adverse impact on the Fund's performance. An active trading strategy will likely result in the Fund generating more short-term capital gains or losses. Short-term gains are generally taxed at a higher rate than long-term gains. Any short-term losses are used first to offset short-term gains.

## **TEMPORARY INVESTMENTS**

The Fund may temporarily depart from its principal investment strategies by investing its assets in shorter-term debt securities and similar obligations or holding cash. It may do this in response to unusual circumstances, such as: adverse market, economic or other conditions (for example, to help avoid potential losses, or during periods when there is a shortage of appropriate securities); to maintain liquidity to meet shareholder redemptions; or to accommodate cash inflows. It is possible that such investments could affect the Fund's investment returns and/or the ability to achieve the Fund's investment objectives.

## **What are the Fund's Principal Investments?**

The following provides general information on the Fund's principal investments. The Fund's Statement of Additional Information (SAI) provides information about the Fund's non-principal investments and may provide additional information about the Fund's principal investments.

## **EQUITY SECURITIES**

Equity securities represent a share of an issuer's earnings and assets after the issuer pays its liabilities. The Fund cannot predict the income it will receive from equity securities because issuers generally have discretion as to the payment of any dividends or distributions. However, equity securities offer greater potential for appreciation than many other types of securities, because their value increases directly with the value of the issuer's business. The following describes the principal types of equity securities in which the Fund principally invests:

### **Common Stocks**

Common stocks are the most prevalent type of equity security. Common stocks receive the issuer's earnings after the issuer pays its creditors and any preferred stockholders. As a result, changes in an issuer's earnings directly influence the value of its common stock.

### **Initial Public Offerings**

The Fund may invest in securities issued in initial public offerings (IPOs). The Fund will participate in such offerings without regard to the issuer's market capitalization and will select IPO securities based on the Adviser's fundamental analysis of the issuer. The Adviser generally will limit its investments in IPO securities to those listed on a U.S. stock exchange. Investments in IPO securities may be speculative in nature, may be volatile and may involve significant gains or losses. Although companies can be any age or size at the time of their IPO, they are often smaller and have a limited operating history, which involves a greater potential for the value of their securities to decline following the IPO. IPO securities are subject to many of the same risks of investing in companies with smaller market capitalizations. The market value of recently issued IPO securities may fluctuate considerably due to factors such as the absence of a prior public market, unseasoned trading and speculation, a potentially small number of securities available for trading, limited information about the issuer and other factors. These fluctuations could impact the Fund's NAV and return earned on the Fund's shares.

### **Foreign Securities**

An issuer's security will be considered to be a foreign security if the security is denominated in a foreign currency or purchased on a securities exchange outside the United States. Certain securities not included in this definition of foreign securities may still be subject to risks of foreign investing that are described in this Prospectus. For example, an issuer that is organized in a non-U.S. jurisdiction but who has its principal place of business or whose securities are traded principally on a securities exchange in the United States will not be considered a foreign security for purposes of this definition but may still be subject to risks associated with foreign securities. Foreign securities are primarily denominated in foreign currencies. Along with the risks normally associated with domestic securities of the same type, foreign securities are subject to currency risks and risks of foreign investing. Trading in certain foreign markets is also subject to liquidity risks.

## **ADRs and Domestically Traded Securities of Foreign Issuers (Types of Foreign Equity Securities)**

American Depositary Receipts (ADRs), which are traded in U.S. markets, represent interests in underlying securities issued by a foreign company and not traded in the United States. ADRs provide a way to buy shares of foreign-based companies in the United States rather than in overseas markets. ADRs are also traded in U.S. dollars, eliminating the need for foreign exchange transactions. The Fund may also invest in securities issued directly by foreign companies and traded in U.S. dollars in U.S. markets.

## **Foreign Exchange Contracts**

In order to convert U.S. dollars into the currency needed to buy a foreign security, or to convert foreign currency received from the sale of a foreign security into U.S. dollars, the Fund may enter into spot currency trades. In a spot trade, the Fund agrees to exchange one currency for another at the current exchange rate. The Fund may also enter into derivative contracts in which a foreign currency is an underlying asset. The exchange rate for currency derivative contracts may be higher or lower than the spot exchange rate. Use of these derivative contracts may increase or decrease the Fund's exposure to currency risks.

## **ILLIQUID INVESTMENTS**

Illiquid investments are investments that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. These may include private placements, repurchase agreements that the Fund cannot dispose of within seven days and securities eligible for resale under Rule 144A of the Securities Act of 1933.

## **FIXED-INCOME SECURITIES**

Fixed-income securities pay interest, dividends or distributions at a specified rate. The rate may be a fixed percentage of the principal or may be adjusted periodically. In addition, the issuer of a fixed-income security must repay the principal amount of the security, normally within a specified time. Fixed-income securities provide more regular income than equity securities. However, the returns on fixed-income securities are limited and normally do not increase with the issuer's earnings. This limits the potential appreciation of fixed-income securities as compared to equity securities.

A security's yield measures the annual income earned on a security as a percentage of its price. A security's yield will increase or decrease depending upon whether it costs less (a "discount") or more (a "premium") than the principal amount. If the issuer may redeem the security before its scheduled maturity, the price and yield on a discount or premium security may change based upon the probability of an early redemption. Securities with higher risks generally have higher yields.

## **DERIVATIVE CONTRACTS**

Derivative contracts are financial instruments that derive their value from underlying securities, commodities, currencies, indices, or other assets or instruments, including other derivative contracts (each a "Reference Instrument" and collectively, "Reference Instruments"). The most common types of derivative contracts are swaps, futures and options, and major asset classes include interest rates, equities, commodities and foreign exchange. Each party to a derivative contract may sometimes be referred to as a "counterparty." Some derivative contracts require payments relating to an actual, future trade involving the Reference Instrument. These types of derivatives are frequently referred to as "physically settled" derivatives. Other derivative contracts require payments relating to the income or returns from, or changes in the market value of, a Reference Instrument. These types of derivatives are known as "cash-settled" derivatives since they require cash payments in lieu of delivery of the Reference Instrument.

Many derivative contracts are traded on exchanges. In these circumstances, the relevant exchange sets all the terms of the contract except for the price. Parties to an exchange-traded derivative contract make payments through the exchange. Most exchanges require traders to maintain margin accounts through their brokers to cover their potential obligations to the exchange. Parties to the contract make (or collect) daily payments to the margin accounts to reflect losses (or gains) in the value of their contracts. This protects traders against a potential default by their counterparty. Trading contracts on an exchange also allows traders to hedge or mitigate certain risks or carry out more complex trading strategies by entering into offsetting contracts.

The Fund may also trade derivative contracts over-the-counter (OTC), meaning off-exchange, in transactions negotiated directly between the Fund and an eligible counterparty, which may be a financial institution. OTC contracts do not necessarily have standard terms, so they may be less liquid and more difficult to close out than exchange-traded derivative contracts. In addition, OTC contracts with more specialized terms may be more difficult to value than exchange-traded contracts, especially in times of financial stress.

The market for swaps and other OTC derivatives was largely unregulated prior to the enactment of federal legislation known as the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”). Regulations enacted by the Commodity Futures Trading Commission (the “CFTC”) under the Dodd-Frank Act require the Fund to clear certain types of swap contracts (including certain interest rate and credit default swaps) through a central clearinghouse known as a derivatives clearing organization (DCO).

To clear a swap through a DCO, the Fund will submit the contract to, and post margin with, a futures commission merchant (FCM) that is a clearinghouse member. The Fund may enter into the swap with a counterparty other than the FCM and arrange for the contract to be transferred to the FCM for clearing or enter into the contract with the FCM itself. If the Fund must centrally clear a transaction, the CFTC’s regulations also generally require that the swap be executed on a registered exchange (either a designated contract market (DCM) or swap execution facility (SEF)). Central clearing is presently required only for certain swaps; the CFTC is expected to impose a mandatory central clearing requirement for additional derivative instruments over time.

DCOs, DCMs, SEFs and FCMs are all subject to regulatory oversight by the CFTC. In addition, certain derivative market participants that act as market makers and engage in a significant amount of “dealing” activity are also required to register as swap dealers with the CFTC. Among other things, swap dealers are subject to minimum capital requirements and business conduct standards and must also post and collect initial and variation margin on uncleared swaps with certain of their counterparties. Because of this, if the Fund enters into uncleared swaps with any swap dealers, it may be subject to initial and variation margin requirements that could impact the Fund’s ability to enter into swaps in the OTC market, including making transacting in uncleared swaps significantly more expensive.

At this point in time, most of the Dodd-Frank Act has been fully implemented, though a small number of remaining rulemakings are unfinished or are subject to phase-in periods. Any future regulatory or legislative activity would not necessarily have a direct, immediate effect upon the Fund, though it is within the realm of possibility that, upon implementation of these measures or any future measures, they could potentially limit or completely restrict the ability of the Fund to use these instruments as a part of its investment strategy, increase the costs of using these instruments or make them less effective.

Depending on how the Fund uses derivative contracts and the relationships between the market value of a derivative contract and the Reference Instrument, derivative contracts may increase or decrease the Fund’s exposure to the risks of the Reference Instrument and may also expose the Fund to liquidity and leverage risks. OTC contracts also expose the Fund to credit risks in the event that a counterparty defaults on the contract, although this risk may be mitigated by submitting the contract for clearing through a DCO, or certain other factors, such as collecting margin from the counterparty.

As discussed above, a counterparty’s exposure under a derivative contract may in some cases be required to be secured with initial and/or variation margin (a form of “collateral”).

The Fund may invest in a derivative contract if it is permitted to own, invest in, or otherwise have economic exposure to the Reference Instrument. The Fund is not required to own a Reference Instrument in order to buy or sell a derivative contract relating to that Reference Instrument. The Fund may trade in the following specific types and/or combinations of derivative contracts:

#### **Futures Contracts (A Type of Derivative)**

Futures contracts provide for the future sale by one party and purchase by another party of a specified amount of a Reference Instrument at a specified price, date and time. Entering into a contract to buy a Reference Instrument is commonly referred to as buying a contract or holding a long position in the asset. Entering into a contract to sell a Reference Instrument is commonly referred to as selling a contract or holding a short position in the Reference Instrument. Futures contracts are considered to be commodity contracts. The Adviser has claimed an exclusion from the definition of the term “commodity pool operator” under the Commodity Exchange Act with respect to the Fund, and therefore is not subject to registration or regulation as a commodity pool operator under the Act with respect to the Fund. Futures contracts traded OTC are frequently referred to as forward contracts. The Fund can buy or sell financial futures (such as index futures and security futures), as well as currency futures and currency forward contracts.

#### **Option Contracts (A Type of Derivative)**

Option contracts (also called “options”) are rights to buy or sell a Reference Instrument for a specified price (the “exercise price”) during, or at the end of, a specified period. The seller (or “writer”) of the option receives a payment, or premium, from the buyer, which the writer keeps regardless of whether the buyer uses (or exercises) the option. A call option gives the holder (buyer) the right to buy the Reference Instrument from the seller (writer) of the option. A put option gives the holder the right to sell the Reference Instrument to the writer of the option. Options may be bought or sold on a wide variety of Reference Instruments. Options that are written on futures contracts will be subject to margin requirements similar to those applied to futures contracts.

### **Swap Contracts (A Type of Derivative)**

A swap contract (also known as a “swap”) is a type of derivative contract in which two parties agree to pay each other (swap) the returns derived from Reference Instruments. Swaps do not always involve the delivery of the Reference Instruments by either party, and the parties might not own the Reference Instruments underlying the swap. The payments are usually made on a net basis so that, on any given day, the Fund would receive (or pay) only the amount by which its payment under the contract is less than (or exceeds) the amount of the other party’s payment. Swap agreements are sophisticated instruments that can take many different forms and are known by a variety of names. Common types of swaps in which the Fund may invest include interest rate swaps, caps and floors, total return swaps, credit default swaps and currency swaps.

### **OTHER INVESTMENTS, TRANSACTIONS, TECHNIQUES**

#### **Derivatives Regulation and Asset Coverage**

The regulation of the U.S. and non-U.S. derivatives markets has undergone substantial change in recent years and such change may continue. In addition, effective August 19, 2022, Rule 18f-4 (the “Derivatives Rule”) under the Investment Company Act of 1940, as amended (the “1940 Act”), replaced the asset segregation framework previously used by funds to comply with limitations on leverage imposed by the 1940 Act. The Derivatives Rule generally mandates that a fund either limit derivatives exposure to 10% or less of its net assets, or in the alternative implement: (i) limits on leverage calculated based value-at-risk (VAR); (ii) a written derivatives risk management program (DRMP) administered by a derivatives risk manager appointed by the Fund’s Board, including a majority of the independent Board members, that is periodically reviewed by the Board; and (iii) new reporting and recordkeeping requirements.

As the Fund’s derivative exposure, if any, is 10% or less of its net assets, excluding certain currency and interest rate hedging transactions, the Fund is classified as a limited derivatives user under the Derivatives Rule and will not be subject to the full requirements of the Derivatives Rule as noted above, including VAR testing and stress testing and certain Board reporting requirements. However, the Fund is still required to implement written compliance policies and procedures reasonably designed to manage its derivatives risks and monitor its derivatives exposure daily.

#### **Hybrid Instruments**

Hybrid instruments combine elements of two different kinds of securities or financial instruments (such as a derivative contract). Frequently, the value of a hybrid instrument is determined by reference to changes in the value of a Reference Instrument (that is a designated security, commodity, currency, index or other asset or instrument including a derivative contract). The Fund may use hybrid instruments only in connection with permissible investment activities. Hybrid instruments can take on many forms including, but not limited to, the following forms. First, a common form of a hybrid instrument combines elements of a derivative contract with those of another security (typically a fixed-income security). In this case all or a portion of the interest or principal payable on a hybrid security is determined by reference to changes in the price of a Reference Instrument. Second, a hybrid instrument may also combine elements of a fixed-income security and an equity security. Third, hybrid instruments may include convertible securities with conversion terms related to a Reference Instrument.

Depending on the type and terms of the hybrid instrument, its risks may reflect a combination of the risks of investing in the Reference Instrument with the risks of investing in other securities, currencies and derivative contracts. Thus, an investment in a hybrid instrument may entail significant risks in addition to those associated with traditional investments or the Reference Instrument. Hybrid instruments are also potentially more volatile than traditional securities or the Reference Instrument. Moreover, depending on the structure of the particular hybrid, it may expose the Fund to leverage risks or carry liquidity risks.

#### **Securities Lending**

The Fund may lend portfolio securities to borrowers that the Adviser deems creditworthy. In return, the Fund receives cash or liquid securities from the borrower as collateral. The borrower must furnish additional collateral if the market value of the loaned securities increases. Also, the borrower must pay the Fund the equivalent of any dividends or interest received on the loaned securities.

The Fund will reinvest cash collateral in securities that qualify as an acceptable investment for the Fund. However, the Fund must pay interest to the borrower for the use of cash collateral. An acceptable investment into which the Fund may reinvest cash collateral includes, among other acceptable investments, securities of affiliated money market funds (including affiliated institutional prime money market funds with a “floating” net asset value that can impose redemption fees and liquidity gates, impose certain operational impediments to investing cash collateral, and, if net asset value decreases, result in the Fund having to cover the decrease in the value of the cash collateral.)

Loans are subject to termination at the option of the Fund or the borrower. The Fund will not have the right to vote on securities while they are on loan. However, the Fund will attempt to terminate a loan in an effort to reacquire the securities in time to vote on matters that are deemed to be material by the Adviser. There can be no assurance that the Fund will have sufficient notice of such matters to be able to terminate the loan in time to vote thereon. The Fund may pay administrative and custodial fees in connection with a loan and may pay a negotiated portion of the interest earned on the cash collateral to a securities lending agent or broker. Securities lending activities are subject to interest rate risks, leverage risks and credit risks.

#### **Investing in Securities of Other Investment Companies**

The Fund may invest its assets in securities of other investment companies, including the securities of affiliated money market funds, as an efficient means of implementing its investment strategies, managing its uninvested cash and/or other investment reasons consistent with the Fund's investment objective and investment strategies. These other investment companies are managed independently of the Fund and incur additional fees and/or expenses which would, therefore, be borne indirectly by the Fund in connection with any such investment. These investments also can create conflicts of interests for the Adviser to the Fund and the investment adviser to the acquired fund. For example, a conflict of interest can arise due to the possibility that the Adviser to the Fund could make a decision to redeem the Fund's investment in the acquired fund. In the case of an investment in an affiliated fund, a conflict of interest can arise if, because of the Fund's investment in the acquired fund, the acquired fund is able to garner more assets, thereby growing the acquired fund and increasing the management fees received by the investment adviser to the acquired fund, which would either be the Adviser or an affiliate of the Adviser. However, the Adviser believes that the benefits and efficiencies of making investments in other investment companies should outweigh the potential additional fees and/or expenses and resulting conflicts of interest. The Fund may invest in money market securities directly.

#### **Additional Information Regarding the Security Selection Process**

As part of analysis in its security selection process, among other factors, the Adviser also evaluates whether environmental, social and governance factors could have a positive or negative impact on the risk profiles of many issuers in the universe of securities in which the Fund may invest. The Adviser may also consider information derived from active engagements conducted by its in-house stewardship team with certain issuers on environmental, social and governance topics. This qualitative analysis does not automatically result in including or excluding specific securities but may be used by Federated Hermes as an additional input in its primary analysis.

### **What are the Specific Risks of Investing in the Fund?**

The following provides general information on the risks associated with the Fund's principal investments. Any additional risks associated with the Fund's non-principal investments are described in the Fund's SAI. The Fund's SAI also may provide additional information about the risks associated with the Fund's principal investments.

#### **STOCK MARKET RISK**

The value of equity securities in the Fund's portfolio will rise and fall over time. These fluctuations could be a sustained trend or a drastic movement. Historically, the equity market has moved in cycles, and the value of the Fund's securities may fluctuate from day to day. The Fund's portfolio will reflect changes in prices of individual portfolio stocks or general changes in stock valuations. Consequently, the Fund's Share price may decline. The Adviser attempts to manage market risk by limiting the amount the Fund invests in each company's equity securities. However, diversification will not protect the Fund against widespread or prolonged declines in the stock market.

Information publicly available about a company, whether from the company's financial statements or other disclosures or from third parties, or information available to some but not all market participants, can affect the price of a company's shares in the market. The price of a company's shares depends significantly on the information publicly available about the company. The reporting of poor results by a company, the restatement of a company's financial statements or corrections to other information regarding a company or its business may adversely affect the price of its shares, as would allegations of fraud or other misconduct by the company's management. The Fund may also be disadvantaged if some market participants have access to material information not readily available to other market participants, including the Fund.

## **RISK RELATED TO INVESTING FOR GROWTH**

Due to their relatively high valuations, growth stocks are typically more volatile than value stocks. For instance, the price of a growth stock may experience a larger decline on a forecast of lower earnings, a negative fundamental development or an adverse market development. Further, growth stocks may not pay dividends or may pay lower dividends than value stocks. This means they depend more on price changes for returns and may be more adversely affected in a down market compared to value stocks that pay higher dividends.

## **MID-CAP COMPANY RISK**

The Fund may invest in mid-capitalization (or “mid-cap”) companies. Market capitalization is determined by multiplying the number of a company’s outstanding shares by the current market price per share. Mid-cap companies often have narrower markets and limited managerial and financial resources compared to larger, more established companies. The performance of mid-cap companies can be more volatile and they face greater risk of business failure, compared to larger, more established companies, which could increase the volatility of the Fund’s portfolio and performance. Shareholders should expect that the value of the Fund’s Shares will be more volatile than a fund that invests exclusively in large-cap companies.

## **SMALL-CAP COMPANY RISK**

The Fund may invest in small capitalization (or “small-cap”) companies. Market capitalization is determined by multiplying the number of a company’s outstanding shares by the current market price per share. Generally, the smaller the market capitalization of a company, the fewer the number of shares traded daily, the less liquid its stock and the more volatile its price. Companies with smaller market capitalizations also tend to have unproven track records, a limited product or service base and limited access to capital. Newer companies with unproven business strategies also tend to be smaller companies. The above factors increase risks and make these companies more likely to fail than companies with larger market capitalizations, and could increase the volatility of the Fund’s portfolio and performance. Shareholders should expect that the value of the Fund’s Shares will be more volatile than a fund that invests exclusively in mid-cap or large-cap companies.

## **FOCUSED INVESTMENT RISK**

To the extent that the Fund focuses its investments in the securities of a particular issuer or companies in a particular country, group of countries, region, market, industry, group of industries, sector, or asset class, the Fund’s exposure to various risks may be heightened, including price volatility and adverse economic, market, political, or regulatory occurrences affecting that issuer, country, group of countries, region, market, industry, group of industries, sector, or asset class.

## **LIQUIDITY RISK**

Trading opportunities are more limited for equity securities that are not widely held. This may make it more difficult to sell or buy a security at a favorable price or time. Consequently, the Fund may have to accept a lower price to sell a security, sell other securities to raise cash or give up an investment opportunity, any of which could have a negative effect on the Fund’s performance. Infrequent trading of securities may also lead to an increase in their price volatility.

Liquidity risk also refers to the possibility that the Fund may not be able to sell a security or close out a derivative contract when it wants to. If this happens, the Fund will be required to continue to hold the security or keep the position open, and the Fund could incur losses.

OTC derivative contracts generally carry greater liquidity risk than exchange-traded contracts. This risk may be increased in times of financial stress, if the trading market for OTC derivative contracts becomes restricted.

## **RISK OF FOREIGN INVESTING**

Foreign securities pose additional risks because foreign economic or political conditions may be less favorable than those of the United States. Securities in foreign markets may also be subject to taxation policies that reduce returns for U.S. investors.

Foreign companies may not provide information (including financial statements) as frequently or completely as companies in the United States. Foreign companies may also receive less coverage than U.S. companies by market analysts and the financial press. In addition, foreign countries may lack uniform accounting, auditing and financial reporting standards or regulatory requirements comparable to those applicable to U.S. companies. These factors may prevent the Fund and its Adviser from obtaining information concerning foreign companies that is as frequent, extensive and reliable as the information available concerning companies in the United States.

Foreign countries may have restrictions on foreign ownership of securities or may impose exchange controls, capital flow restrictions or repatriation restrictions which could adversely affect the liquidity of the Fund’s investments.

When the Fund's investment in foreign securities emphasizes a particular country or group of countries, the Fund may be significantly affected by the economic, political or regulatory developments affecting such country or group of countries. Additionally, natural disasters affecting such country or countries could have an adverse effect on the Fund's investment in companies located in such country.

#### **RISK OF INVESTING IN ADRS AND DOMESTICALLY TRADED SECURITIES OF FOREIGN ISSUERS**

Because the Fund may invest in ADRs and other domestically traded securities of foreign companies, the Fund's Share price may be more affected by foreign economic and political conditions, taxation policies and accounting and auditing standards than would otherwise be the case.

#### **CUSTODIAL SERVICES AND RELATED INVESTMENT COSTS**

Custodial services and other costs relating to investment in international securities markets generally are more expensive than in the United States. Such markets have settlement and clearance procedures that differ from those in the United States. In certain markets, there have been times when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct such transactions. The inability of the Fund to make intended securities purchases due to settlement problems could cause the Fund to miss attractive investment opportunities. Inability to dispose of a portfolio security caused by settlement problems could result in losses to the Fund due to a subsequent decline in value of the portfolio security. In addition, security settlement and clearance procedures in some emerging market countries may not fully protect the Fund against loss of its assets.

#### **CURRENCY RISK**

Exchange rates for currencies fluctuate daily. The combination of currency risk and market risks tends to make securities traded in foreign markets more volatile than securities traded exclusively in the United States. The Adviser and Sub-Adviser attempt to manage currency risk by limiting the amount the Fund invests in securities denominated in a particular currency. However, diversification will not protect the Fund against a general increase in the value of the U.S. dollar relative to other currencies.

Investing in currencies or securities denominated in a foreign currency entails risk of being exposed to a currency that may not fully reflect the strengths and weaknesses of the economy of the country or region utilizing the currency. Currency risk includes both the risk that currencies in which the Fund's investments are traded, or currencies in which the Fund has taken an active investment position, will decline in value relative to the U.S. dollar and, in the case of hedging positions, that the U.S. dollar will decline in value relative to the currency being hedged. In addition, it is possible that a currency (such as, for example, the euro) could be abandoned in the future by countries that have already adopted its use, and the effects of such an abandonment on the applicable country and the rest of the countries utilizing the currency are uncertain but could negatively affect the Fund's investments denominated in the currency. If a currency used by a country or countries is replaced by another currency, the Fund's Adviser and Sub-Adviser would evaluate whether to continue to hold any investments denominated in such currency, or whether to purchase investments denominated in the currency that replaces such currency, at the time. Such investments may continue to be held, or purchased, to the extent consistent with the Fund's investment objective(s) and permitted under applicable law.

Many countries rely heavily upon export-dependent businesses and any strength in the exchange rate between a currency and the U.S. dollar or other currencies can have either a positive or a negative effect upon corporate profits and the performance of investments in the country or region utilizing the currency. Adverse economic events within such country or region may increase the volatility of exchange rates against other currencies, subjecting the Fund's investments denominated in such country's or region's currency to additional risks.

#### **EUROPEAN UNION AND EUROZONE RELATED RISK**

A number of countries in the European Union (EU), including certain countries within the EU that have adopted the euro (Eurozone), have experienced, and may continue to experience, severe economic and financial difficulties. Additional countries within the EU may also fall subject to such difficulties. These events could negatively affect the value and liquidity of the Fund's investments in euro-denominated securities and derivatives contracts, securities of issuers located in the EU or with significant exposure to EU issuers or countries. If the euro is dissolved entirely, the legal and contractual consequences for holders of euro-denominated obligations and derivative contracts would be determined by laws in effect at such time. Such investments may continue to be held, or purchased, to the extent consistent with the Fund's investment objective(s) and permitted under applicable law. These potential developments, or market perceptions concerning these and related issues, could adversely affect the value of the Shares.

Certain countries in the EU have had to accept assistance from supra-governmental agencies such as the International Monetary Fund, the European Stability Mechanism (the “ESM”) or other supra-governmental agencies. The European Central Bank has also been intervening to purchase Eurozone debt in an attempt to stabilize markets and reduce borrowing costs. There can be no assurance that these agencies will continue to intervene or provide further assistance and markets may react adversely to any expected reduction in the financial support provided by these agencies. Responses to the financial problems by European governments, central banks and others including austerity measures and reforms, may not work, may result in social unrest and may limit future growth and economic recovery or have other unintended consequences.

In addition, one or more countries may withdraw from the EU, and one or more countries within the Eurozone may abandon the euro. The impact of these actions, especially if they occur in a disorderly fashion, could be significant and far-reaching. On January 31, 2020, the United Kingdom (UK) left the EU, commonly referred to as “Brexit,” and there commenced a transition period during which the EU and UK negotiated and agreed on the nature of their future relationship, with such agreements becoming effective on December 31, 2020. There is significant market uncertainty regarding Brexit’s ramifications, and the range and potential implications of possible political, regulatory, economic and market outcomes are difficult to predict. This long-term uncertainty may affect other countries in the EU and elsewhere and may cause volatility within the EU, triggering prolonged economic downturns in certain countries within the EU. In addition, Brexit may create additional and substantial economic stresses for the UK, including a contraction of the UK economy and price volatility in UK stocks, decreased trade, capital outflows, devaluation of the British pound, wider corporate bond spreads due to uncertainty and declines in business and consumer spending as well as foreign direct investment. Brexit may also adversely affect UK-based financial firms, including certain sub-advisers to the Federated Hermes Funds, that have counterparties in the EU or participate in market infrastructure (trading venues, clearinghouses, settlement facilities) based in the EU. These events and the resulting market volatility may have an adverse effect on the performance of the Fund.

#### **RISK OF INVESTING IN DERIVATIVE CONTRACTS AND HYBRID INSTRUMENTS**

The Fund’s exposure to derivative contracts and hybrid instruments (either directly or through its investment in another investment company) involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. First, changes in the value of the derivative contracts and hybrid instruments in which the Fund invests may not be correlated with changes in the value of the underlying Reference Instruments or, if they are correlated, may move in the opposite direction than originally anticipated. Second, while some strategies involving derivatives may reduce the risk of loss, they may also reduce potential gains or, in some cases, result in losses by offsetting favorable price movements in portfolio holdings. Third, there is a risk that derivative contracts and hybrid instruments may be erroneously priced or improperly valued and, as a result, the Fund may need to make increased cash payments to the counterparty. Fourth, a common provision in OTC derivative contracts permits the counterparty to terminate any such contract between it and the Fund, if the value of the Fund’s total net assets declines below a specified level over a given time period. Factors that may contribute to such a decline (which usually must be substantial) include significant shareholder redemptions and/or a marked decrease in the market value of the Fund’s investments. Any such termination of the Fund’s OTC derivative contracts may adversely affect the Fund (for example, by increasing losses and/or costs, and/or preventing the Fund from fully implementing its investment strategies). Fifth, the Fund may use a derivative contract to benefit from a decline in the value of a Reference Instrument. If the value of the Reference Instrument declines during the term of the contract, the Fund makes a profit on the difference (less any payments the Fund is required to pay under the terms of the contract). Any such strategy involves risk. There is no assurance that the Reference Instrument will decline in value during the term of the contract and make a profit for the Fund. The Reference Instrument may instead appreciate in value creating a loss for the Fund. Sixth, a default or failure by a CCP or an FCM (also sometimes called a “futures broker”), or the failure of a contract to be transferred from an Executing Dealer to the FCM for clearing, may expose the Fund to losses, increase its costs, or prevent the Fund from entering or exiting derivative positions, accessing margin, or fully implementing its investment strategies. The central clearing of a derivative and trading of a contract over a SEF could reduce the liquidity in, or increase costs of entering into or holding, any contracts. Finally, derivative contracts and hybrid instruments may also involve other risks described in this Prospectus such as stock market, interest rate, credit, currency, liquidity and leverage risks.

#### **CREDIT RISK**

Credit risk includes the possibility that a party to a transaction (such as a derivative transaction) involving the Fund will fail to meet its obligations. This could cause the Fund to lose the benefit of the transaction or prevent the Fund from selling or buying other securities to implement its investment strategy. Credit risk also includes the possibility that an issuer will default on a security by failing to pay interest or principal when due. If an issuer defaults, the Fund will lose money.

### **INITIAL PUBLIC OFFERINGS (IPOS) RISK**

IPOs are initial public offerings of equity securities. Securities issued in IPOs have no trading history, and there may only be limited information about the companies. IPO securities are subject to many of the same risks of investing in companies with smaller market capitalizations. The prices of securities sold in IPOs may be highly volatile and may rise or fall shortly after the IPO is complete due to the absence of a prior public market, unseasoned trading and speculation, the small number of shares available for trading, limited information about the issuer and other factors. Further, IPO shares can experience an immediate drop in value if the demand for the securities does not continue to support the offering price. While investments in companies that have recently gone public have the potential to produce substantial gains for the Fund, there is no assurance that the Fund will have access to profitable IPOs, that any particular IPO will be successful, or that any gains will be sustainable, and therefore investors should not rely on these past gains as an indication of future performance.

### **LEVERAGE RISK**

Leverage risk is created when an investment, which includes, for example, an investment in a derivative contract, exposes the Fund to a level of risk that exceeds the amount invested. Changes in the value of such an investment magnify the Fund's risk of loss and potential for gain. Investments can have these same results if their returns are based on a multiple of a specified index, security or other benchmark.

### **INTEREST RATE RISK**

Prices of fixed-income securities rise and fall in response to changes in interest rates. Generally, when interest rates rise, prices of fixed-income securities fall. However, market factors, such as the demand for particular fixed-income securities, may cause the price of certain fixed-income securities to fall while the prices of other securities rise or remain unchanged.

The longer the duration of a fixed-income security, the more susceptible it is to interest rate risk. The duration of a fixed-income security may be equal to or shorter than the stated maturity of a fixed-income security. Recent and potential future changes in monetary policy made by central banks and/or their governments are likely to affect the level of interest rates. Duration measures the price sensitivity of a fixed-income security given a change in interest rates. For example, if a fixed-income security has an effective duration of three years, a 1% increase in general interest rates would be expected to cause the security's value to decline about 3% while a 1% decrease in general interest rates would be expected to cause the security's value to increase about 3%.

### **RISK RELATED TO THE ECONOMY**

The value of the Fund's portfolio may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets based on negative developments in the U.S. and global economies. Economic, political and financial conditions, industry or economic trends and developments or public health risks, such as epidemics or pandemics, may, from time to time, and for varying periods of time, cause volatility, illiquidity or other potentially adverse effects in the financial markets, including the fixed-income market. The commencement, continuation or ending of government policies and economic stimulus programs, changes in monetary policy, increases or decreases in interest rates, or other factors or events that affect the financial markets, including the fixed-income markets, may contribute to the development of or increase in volatility, illiquidity, shareholder redemptions and other adverse effects which could negatively impact the Fund's performance. For example, the value of certain portfolio securities may rise or fall in response to changes in interest rates, which could result from a change in government policies, and has the potential to cause investors to move out of certain portfolio securities, including fixed-income securities, on a large scale. This may increase redemptions from funds that hold large amounts of certain securities and may result in decreased liquidity and increased volatility in the financial markets. Market factors, such as the demand for particular portfolio securities, may cause the price of certain portfolio securities to fall while the prices of other securities rise or remain unchanged.

### **TECHNOLOGY RISK**

The Adviser uses various technologies in managing the Fund, consistent with its investment objective(s) and strategy described in this Prospectus. For example, proprietary and third-party data and systems are utilized to support decision-making for the Fund. Data imprecision, software or other technology malfunctions, programming inaccuracies and similar circumstances may impair the performance of these systems, which may negatively affect Fund performance.

## What Do Shares Cost?

### **CALCULATION OF NET ASSET VALUE**

When the Fund receives your transaction request in proper form (as described in this Prospectus under the section entitled “How to Purchase and Redeem Shares”), it is processed at the next calculated net asset value of a Share (NAV). A Share’s NAV is determined as of the end of regular trading on the New York Stock Exchange (NYSE) (normally 4:00 p.m. Eastern time) each day the NYSE is open. The Fund calculates the NAV of each class by valuing the assets allocated to the Share’s class, subtracting the liabilities allocated to each class and dividing the balance by the number of Shares of the class outstanding. The NAV for each class of Shares may differ due to the level of expenses allocated to each class as well as a result of the variance between the amount of accrued investment income and capital gains or losses allocated to each class and the amount actually distributed to shareholders of each class.

Shares can be purchased or redeemed by participating insurance companies any day the NYSE is open.

When the Fund holds securities that trade principally in foreign markets on days the NYSE is closed, the value of the Fund’s assets may change on days you cannot purchase or redeem Shares. This may also occur when the U.S. markets for fixed-income securities are open on a day the NYSE is closed.

In calculating its NAV, the Fund generally values investments as follows:

- Equity securities listed on an exchange or traded through a regulated market system are valued at their last reported sale price or official closing price in their principal exchange or market.
- Fixed-income securities are fair valued using price evaluations provided by a pricing service approved by the Adviser.
- Derivative contracts listed on exchanges are valued at their reported settlement or closing price, except that options are valued at the mean of closing bid and ask quotations.
- Over-the-counter (OTC) derivative contracts are fair valued using price evaluations provided by a pricing service approved by the Adviser.

If any price, quotation, price evaluation or other pricing source is not readily available when the NAV is calculated, if the Fund cannot obtain price evaluations from a pricing service or from more than one dealer for an investment within a reasonable period of time as set forth in the Adviser’s valuation policies and procedures, or if information furnished by a pricing service, in the opinion of the Valuation Committee, is deemed not representative of the fair value of such security, the Fund uses the fair value of the investment determined in accordance with the procedures generally described below. There can be no assurance that the Fund could obtain the fair value assigned to an investment if it sold the investment at approximately the time at which the Fund determines its NAV per share.

Shares of other mutual funds are valued based upon their reported NAVs. The prospectuses for these mutual funds explain the circumstances under which they will use fair value pricing and the effects of using fair value pricing.

### **FAIR VALUATION AND SIGNIFICANT EVENTS PROCEDURES**

Pursuant to Rule 2a-5 under the Investment Company Act of 1940, as amended, the Board has designated the Adviser as the Fund’s valuation designee to perform the fair valuation determination for securities and other assets held by the Fund. The Adviser, acting through its “Valuation Committee,” is responsible for determining the fair value of investments for which market quotations are not readily available. The Valuation Committee is comprised of officers of the Adviser and certain of the Adviser’s affiliated companies and determines fair value and oversees the calculation of the NAV. The Valuation Committee is subject to Board oversight and certain reporting and other requirements intended to provide the Board the information it needs to oversee the Adviser’s fair value determinations.

The Valuation Committee is also authorized to use pricing services to provide fair price evaluations of the current fair value of certain investments for purposes of calculating the NAV. In the event that market quotations and price evaluations are not available for an investment, the Valuation Committee determines the fair value of the investment in accordance with procedures adopted by the Adviser as the valuation designee. The Board periodically reviews the fair valuations made by the Valuation Committee. The Board has also approved the Adviser’s fair valuation and significant events procedures as part of the Fund’s compliance program and will review any changes made to the procedures. The Fund’s SAI discusses the methods used by pricing services and the Valuation Committee in valuing investments.

Using fair value to price investments may result in a value that is different from an investment’s most recent closing price and from the prices used by other registered funds to calculate their NAVs. The application of the fair value procedures to an investment represents a good faith determination of such investment’s fair value. There can be no assurance that the Fund could obtain the fair value assigned to an investment if it sold the investment at approximately the time at which the Fund determines its NAV per share, and the actual value could be materially different.

The Adviser also has adopted procedures requiring an investment to be priced at its fair value whenever the Valuation Committee determines that a significant event affecting the value of the investment has occurred between the time as of which the price of the investment would otherwise be determined and the time as of which the NAV is computed. An event is considered significant if there is both an affirmative expectation that the investment's value will change in response to the event and a reasonable basis for quantifying the resulting change in value.

Examples of significant events that may occur after the close of the principal market on which a security is traded, or after the time of a price evaluation provided by a pricing service or a dealer, include:

- With respect to securities traded principally in foreign markets, significant trends in U.S. equity markets or in the trading of foreign securities index futures contracts;
- Political or other developments affecting the economy or markets in which an issuer conducts its operations or its securities are traded; and
- Announcements concerning matters such as acquisitions, recapitalizations or litigation developments or a natural disaster affecting the issuer's operations or regulatory changes or market developments affecting the issuer's industry.

The Adviser has adopted procedures whereby the Valuation Committee uses a pricing service to provide factors to update the fair value of equity securities traded principally in foreign markets from the time of the close of their respective foreign stock exchanges to the pricing time of the Fund. For other significant events, the Fund may seek to obtain more current quotations or price evaluations from alternative pricing sources. If a reliable alternative pricing source is not available, the Valuation Committee will determine the fair value of the investment. The Board periodically reviews fair valuations made in response to significant events.

The fair valuation of securities following a significant event can serve to reduce arbitrage opportunities for short-term traders to profit at the expense of long-term investors in the Fund. For example, such arbitrage opportunities may exist when the market on which portfolio securities are traded closes before the Fund calculates its NAV, which is typically the case with Asian and European markets. However, there is no assurance that these significant event procedures will prevent dilution of the NAV by short-term traders. See "Account and Share Information – Frequent Trading Policies" for other procedures the Fund employs to deter such short-term trading.

## How is the Fund Sold?

The Fund offers the following Share classes: Primary Shares (P) and Service Shares (S), each representing interests in a single portfolio of securities. This Prospectus relates only to Primary Shares. All Share classes have different expenses which affect their performance. Contact your insurance company or call 1-800-341-7400 for more information concerning the other class.

The Fund's Distributor, Federated Securities Corp. (the "Distributor"), markets the Shares described in this Prospectus to insurance companies as funding vehicles for variable annuity contracts and variable life insurance policies issued by the insurance companies. Under the Distributor's Contract with the Fund, the Distributor offers Shares on a continuous, best-efforts basis. The Distributor is a subsidiary of Federated Hermes, Inc. ("Federated Hermes," formerly Federated Investors, Inc.).

### **Intra-Fund Share Conversion Program**

A shareholder in the Fund's Shares may convert their Shares at net asset value to any other share class of the Fund if the shareholder meets the investment minimum and eligibility requirements for the share class into which the conversion is sought, as applicable. Such conversion of classes should not result in a realization event for tax purposes. Contact your financial intermediary or call 1-800-341-7400 to convert your Shares.

## Payments to Insurance Companies

The Fund and its affiliated service providers may pay fees as described below for services provided to the Fund.

### **RULE 12b-1 FEES**

The Board has adopted a Rule 12b-1 Plan, which allows payment of marketing fees of up to 0.25% of average net assets to the Distributor for the sale, distribution, administration and customer servicing of the Fund's Primary Shares. When the Distributor receives Rule 12b-1 Fees, it may pay some or all of them to financial intermediaries whose customers select the Shares as part of their variable contracts. The Fund's P class has no present intention of paying, accruing or incurring any Rule 12b-1 Fees until such time as approved by the Fund's Board of Trustees. If these Shares were to pay marketing fees on an ongoing basis, your investment cost may be higher over time than other shares with different marketing fees.

## ADMINISTRATIVE SERVICE FEES

The Fund may pay Administrative Service Fees of up to 0.25% of average net assets to insurance companies for providing services to shareholders and maintaining shareholder accounts. The P class of the Fund has no present intention of paying, accruing or incurring any such fee until such time as approved by the Fund's Board of Trustees.

## ADDITIONAL PAYMENTS

The Distributor may pay out of its own resources amounts to certain insurance companies that support the sale of Shares or provide services to Fund shareholders. The amounts of these payments could be significant, and may create an incentive for the insurance company or its employees or associated persons to recommend or sell Shares of the Fund to you. Not all insurance companies receive such payments, and the amount of compensation may vary by insurance company. In some cases, such payments may be made by or funded from the resources of companies affiliated with the Distributor (including the Adviser). These payments are not reflected in the fees and expenses listed in the fee table section of the Fund's Prospectus and described above because they are not paid by the Fund.

These payments are negotiated and may be based on such factors as the number or value of Shares that the insurance company sells or may sell; the value of client assets invested; or the type and nature of services or support furnished by the insurance company; or the Fund's and/or other Federated Hermes funds' relationship with the insurance company. These payments may be in addition to payments, as described above, made by the Fund to the insurance company. In connection with these payments, the insurance company may elevate the prominence or profile of the Fund and/or other Federated Hermes funds within the insurance company's organization by, for example, placement on a list of preferred or recommended funds, and/or granting the Distributor preferential or enhanced opportunities to promote the funds in various ways within the insurance company's organization. You can ask your insurance company for information about any payments it receives from the Distributor or the Fund and any services provided, as well as about fees it charges.

## How to Purchase and Redeem Shares

Shares are used solely as the investment vehicle for separate accounts of participating insurance companies offering variable annuity contracts and variable life insurance policies. The general public has access to the Fund only by purchasing a variable annuity contract or variable life insurance policy (thus becoming a contract owner). Shares are not sold directly to the general public.

Purchase and redemption orders must be received by your participating insurance company by 4:00 p.m. (Eastern time). The purchase order will be processed at the NAV calculated on that day if the Fund receives your order from the participating insurance company in accordance with requirements of the Fund's Participation Agreement among the Fund, the Distributor and your participating insurance company. The Fund reserves the right to reject any purchase order.

Redemption proceeds normally are wired or mailed within one business day for each method of payment after receiving a timely request in proper form. Depending upon the method of payment, when shareholders receive redemption proceeds can differ. Payment may be delayed for up to seven days under certain circumstances (see "Limitations on Redemption Proceeds").

## METHODS THE FUND MAY USE TO MEET REDEMPTION REQUESTS

The Fund intends to pay Share redemptions in cash. To ensure that the Fund has cash to meet Share redemptions on any day, the Fund typically expects to hold a cash or cash equivalent reserve or sell portfolio securities.

In unusual or stressed circumstances, the Fund may generate cash in the following ways:

- **Inter-fund Borrowing and Lending.** The SEC has granted an exemption that permits the Fund and all other funds advised by subsidiaries of Federated Hermes ("Federated Hermes funds") to lend and borrow money for certain temporary purposes directly to and from other Federated Hermes funds. Inter-fund borrowing and lending is permitted only: (a) to meet shareholder redemption requests; (b) to meet commitments arising from "failed" trades; and (c) for other temporary purposes. All inter-fund loans must be repaid in seven days or less.
- **Committed Line of Credit.** The Fund participates with certain other Federated Hermes funds, on a several basis, in an up to \$500,000,000 unsecured, 364-day, committed, revolving line of credit (LOC) agreement. The LOC was made available to temporarily finance the repurchase or redemption of shares of the funds, failed trades, payment of dividends, settlement of trades and for other short-term, temporary or emergency general business purposes. The Fund cannot borrow under the LOC if an inter-fund loan is outstanding.
- **Redemption in Kind.** Although the Fund intends to pay Share redemptions in cash, it reserves the right to pay the redemption price in whole or in part by an "in-kind" distribution of the Fund's portfolio securities. Because the Fund has elected to be governed by Rule 18f-1 under the 1940 Act, the Fund is obligated to pay Share redemptions to any one shareholder in cash only up to the lesser of \$250,000 or 1% of the net assets represented by such Share class during any

90-day period. Redemptions in kind are made consistent with the procedures adopted by the Fund's Board, which generally include distributions of a pro rata share of the Fund's portfolio assets. Redemption in kind is not as liquid as a cash redemption. If redemption is made in kind, securities received may be subject to market risk and the shareholder could incur taxable gains and brokerage or other charges in converting the securities to cash.

#### **LIMITATIONS ON REDEMPTION PROCEEDS**

Unless provided otherwise in applicable variable annuity contracts, redemption proceeds normally are wired or mailed within one business day after receiving a request in proper form. Payment may be delayed for up to seven days:

- During periods of market volatility;
- When a shareholder's trade activity or amount adversely impacts the Fund's ability to manage its assets; or
- During any period when the Federal Reserve wire or applicable Federal Reserve banks are closed, other than customary weekend and holiday closings.

In addition, the right of redemption may be suspended, or the payment of proceeds may be delayed, during any period:

- When the NYSE is closed, other than customary weekend and holiday closings;
- When trading on the NYSE is restricted, as determined by the SEC; or
- In which an emergency exists, as determined by the SEC, so that disposal of the Fund's investments or determination of its NAV is not reasonably practicable.

## **Security and Privacy Protection**

#### **ONLINE ACCOUNT AND TELEPHONE ACCESS SECURITY**

Federated Hermes will not be responsible for losses that result from unauthorized transactions, unless Federated Hermes does not follow procedures designed to verify your identity. When initiating a transaction by telephone or online, shareholders should be aware that any person with access to your account and other personal information including PINs (Personal Identification Numbers) may be able to submit instructions by telephone or online. Shareholders are responsible for protecting their identity by using strong usernames and complex passwords which utilize combinations of mixed case letters, numbers and symbols, and change passwords and PINs frequently.

Using [FederatedHermes.com/us](https://FederatedHermes.com/us)'s Account Access website means you are consenting to sending and receiving personal financial information over the Internet, so you should be sure you are comfortable with the risks. You will be required to accept the terms of an online agreement and to establish and utilize a password in order to access online account services. The Transfer Agent has adopted security procedures to confirm that Internet instructions are genuine. The Transfer Agent will also send you written confirmation of share transactions. The Transfer Agent, the Fund and any of its affiliates will not be liable for losses or expenses that occur from fraudulent Internet instructions reasonably believed to be genuine.

The Transfer Agent or the Fund will employ reasonable procedures to confirm that telephone transaction requests are genuine, which may include recording calls, asking the caller to provide certain personal identification information, sending you written confirmation, or requiring other confirmation security procedures. The Transfer Agent, the Fund and any of its affiliates will not be liable for relying on instructions submitted by telephone that the Fund reasonably believes to be genuine.

#### **ANTI-MONEY LAUNDERING COMPLIANCE**

To help the government fight the funding of terrorism and money laundering activities, federal law requires financial institutions to obtain, verify and record information that identifies each new customer who opens a Fund account and to determine whether such person's name appears on governmental lists of known or suspected terrorists or terrorist organizations. Pursuant to the requirements under the USA PATRIOT Act, the information obtained will be used for compliance with the USA PATRIOT Act or other applicable laws, regulations and rules in connection with money laundering, terrorism or other illicit activities.

Information required includes your name, residential or business address, date of birth (for an individual), and other information that identifies you, including your social security number, tax identification number or other identifying number. The Fund cannot waive these requirements. The Fund is required by law to reject your Account Application if the required information is not provided. If, after reasonable effort, the Fund is unable to verify your identity or that of any other person(s) authorized to act on your behalf, or believes it has identified potentially suspicious, fraudulent or criminal activity, the Fund reserves the right to close your account and redeem your shares at the next calculated NAV without your permission. Any applicable contingent deferred sales charge (CDSC) will be assessed upon redemption of your shares.

The Fund has a strict policy designed to protect the privacy of your personal information. A copy of Federated Hermes' privacy policy notice was given to you at the time you opened your account. The Fund sends a copy of the privacy notice to you annually. You may also obtain the privacy notice by calling the Fund, or through [FederatedHermes.com/us](https://FederatedHermes.com/us).

## Account and Share Information

### **SPECIAL PROVISION FOR ABANDONED OR UNCLAIMED PROPERTY**

Certain states, including the State of Texas, have laws that allow shareholders to designate a representative to receive abandoned or unclaimed property (“escheatment”) notifications by completing and submitting a designation form that generally can be found on the official state website. If a shareholder resides in an applicable state, and elects to designate a representative to receive escheatment notifications, escheatment notices generally will be delivered as required by such state laws, including, as applicable, to both the shareholder and the designated representative. A completed designation form may be mailed to the Fund (if Shares are held directly with the Fund) or to the shareholder’s insurance company (if Shares are not held directly with the Fund). Shareholders should refer to relevant state law for the shareholder’s specific rights and responsibilities under his or her state’s escheatment law(s), which can generally be found on a state’s official website.

### **DIVIDENDS**

The Fund declares and pays any dividends annually to shareholders. Dividends are paid to all shareholders invested in the Fund on the record date. The record date is the date on which a shareholder must officially own Shares in order to earn a dividend.

Under the federal securities laws, the Fund is required to provide a notice to shareholders regarding the source of distributions made by the Fund if such distributions are from sources other than ordinary investment income. In addition, important information regarding the Fund’s distributions, if applicable, is available via the link to the Fund and share class name at [FederatedHermes.com/us/FundInformation](https://FederatedHermes.com/us/FundInformation).

### **TAX INFORMATION**

The Fund intends to comply with the diversification requirements imposed on variable contracts by the Internal Revenue Code and corresponding regulations. If the Fund fails to comply with these requirements, contracts invested in the Fund will not be treated as annuity, endowment or life insurance contracts under the Internal Revenue Code.

Contract owners should review the applicable contract prospectus for information concerning the federal income tax treatment of their contracts and distributions from the Fund to the separate accounts.

Contract owners are urged to consult their own tax advisers regarding the status of their contracts under state and local tax laws.

### **FREQUENT TRADING POLICIES**

Frequent or short-term trading into and out of the Fund can have adverse consequences for the Fund and shareholders who use the Fund as a long-term investment vehicle. Such trading in significant amounts can disrupt the Fund’s investment strategies (e.g., by requiring it to sell investments at inopportune times or maintain excessive short-term or cash positions to support redemptions) and increase brokerage and administrative costs. Investors engaged in such trading may also seek to profit by anticipating changes in the Fund’s NAV in advance of the time as of which NAV is calculated. This may be particularly likely where a Fund invests in high-yield securities or securities priced in foreign markets.

The Fund’s Board has approved policies and procedures intended to discourage excessive frequent or short-term trading of the Fund’s Shares. The Fund’s fair valuations procedures are intended in part to discourage short-term trading by reducing the potential for these strategies to succeed. See “What Do Shares Cost?” The Fund also monitors trading in Fund Shares in an effort to identify potential disruptive trading activity. The Fund monitors trades into and out of the Fund within a period of 30 days or less. The Fund may also monitor trades into and out of the Fund for potentially disruptive trading activity over periods longer than 30 days. The size of Share transactions subject to monitoring varies. Where it is determined that a shareholder has exceeded the detection amounts twice within a period of 12 months, the Fund will temporarily prohibit the shareholder from making further purchases or exchanges of Fund Shares. If the shareholder continues to exceed the detection amounts for specified periods the Fund will impose lengthier trading restrictions on the shareholder, up to and including permanently prohibiting the shareholder from making any further purchases or exchanges of Fund Shares. Because the Fund’s Shares are held exclusively by insurance company separate accounts, rather than directly by the individual contract owners of the separate accounts, the Fund is not in a position to determine directly whether a separate account’s purchase or sale of Fund Shares on any given day represents transactions by a single or multiple investors. It is also not able to determine directly whether multiple purchases and sales by a separate account over any given period represent the activity of the same or of different investors. However, where trading activity in an insurance company separate account exceeds the monitoring limits, the Fund will request the insurance company to

provide information on individual investor trading activity, and if such information is provided and if it is determined from this information that an investor has engaged in excessive short-term trading, the Fund will ask that the investor be prohibited from further purchases of Fund Shares. There can be no assurance that an insurance company will cooperate in prohibiting an investor from further purchases of Fund Shares, and there may be contractual limits on its ability to do so.

The Fund's frequent trading restrictions do not apply to purchases and sales of Fund Shares by other Federated Hermes funds. These funds impose the same frequent trading restrictions as the Fund at their shareholder level. In addition, allocation changes of the investing Federated Hermes fund are monitored, and the managers of the recipient fund must determine that there is no disruption to their management activity. The intent of this exception is to allow investing fund managers to accommodate cash flows and other activity that result from non-abusive trading in the investing fund, without being stopped from such trading because the aggregate of such trades exceeds the monitoring limits. Nonetheless, as with any trading in Fund Shares, purchases and redemptions of Fund Shares by other Federated Hermes funds could adversely affect the management of the Fund's portfolio and its performance.

The Fund will not restrict transactions made on a non-discretionary basis by certain asset allocation programs, wrap programs, fund of funds, collective funds or other similar accounts that have been pre-approved by Federated Hermes ("Approved Accounts"). The Fund will continue to monitor transactions by the Approved Accounts and will seek to limit or restrict even non-discretionary transactions by Approved Accounts that are determined to be disruptive or harmful to the Fund.

The Fund's objective is that its restrictions on short-term trading should apply to all shareholders that are subject to the restrictions, regardless of the number or type of accounts in which Shares are held. However, the Fund anticipates that limitations on its ability to identify trading activity to specific shareholders will mean that these restrictions may not be able to be applied uniformly in all cases.

Please refer to the prospectus for your variable insurance product contract to determine what policies or procedures may have been adopted by your insurance company to discourage frequent or short-term trading of the Fund and the other variable investment options offered under your contract. Whatever policies and procedures may have been adopted by your insurance company to discourage frequent or short-term trading, please note that the Fund is also used as an investment option for variable product contracts of other insurance companies. These other insurance companies may not have adopted policies and procedures to discourage frequent or short-term trading or may have different policies and procedures than those described in your variable insurance product prospectus.

To the extent that the policies and procedures of the Fund and/or participating insurance companies are not effective in discouraging frequent trading of Fund Shares, such trading may have the adverse consequences discussed above for the Fund and its long-term Shareholders. No matter how the Fund or a participating insurance company defines its limits on frequent trading of Fund Shares, other purchases and sales of Fund Shares may have adverse effects on the management of the Fund's portfolio and its performance.

#### **PORTFOLIO HOLDINGS INFORMATION**

Information concerning the Fund's portfolio holdings is available via the link to the Fund and share class name at [FederatedHermes.com/us/FundInformation](https://FederatedHermes.com/us/FundInformation). A complete listing of the Fund's portfolio holdings as of the end of each calendar quarter is posted on the website 30 days (or the next business day) after the end of the quarter and remains posted for six months thereafter. Summary portfolio composition information as of the close of each month is posted on the website 15 days (or the next business day) after month-end and remains posted until replaced by the information for the succeeding month. The summary portfolio composition information may include identification of the Fund's top 10 holdings, and a percentage breakdown of the portfolio by sector and asset class.

You may also access portfolio information as of the end of the Fund's fiscal quarters via the link to the Fund and share class name at [FederatedHermes.com/us](https://FederatedHermes.com/us). The Fund's Annual and Semi-Annual Shareholder Reports contain complete listings of the Fund's portfolio holdings as of the end of the Fund's second and fourth fiscal quarters. Fiscal quarter information is made available on the website within 70 days after the end of the fiscal quarter. This information is also available in reports filed with the SEC at the SEC's website at [sec.gov](https://sec.gov).

Each fiscal quarter, the Fund will file with the SEC a complete schedule of its monthly portfolio holdings on "Form N-PORT." The Fund's holdings as of the end of the third month of every fiscal quarter, as reported on Form N-PORT, will be publicly available on the SEC's website at [sec.gov](https://sec.gov) within 60 days of the end of the fiscal quarter upon filing. You may also access this information via the link to the Fund and share class name at [FederatedHermes.com/us](https://FederatedHermes.com/us).

In addition, from time to time (for example, during periods of unusual market conditions), additional information regarding the Fund's portfolio holdings and/or composition may be posted to [FederatedHermes.com/us](https://FederatedHermes.com/us). If and when such information is posted, its availability will be noted on, and the information will be accessible from, the home page of the website.

## Who Manages the Fund?

The Board governs the Fund. The Board selects and oversees the Adviser, Federated Equity Management Company of Pennsylvania. The Adviser manages the Fund's assets, including buying and selling portfolio securities. Federated Advisory Services Company (FASC), an affiliate of the Adviser, provides research, quantitative analysis, equity trading and transaction settlement and certain other support services to the Adviser. The fee for these services is paid by the Adviser and not by the Fund.

The address of the Adviser and FASC is 1001 Liberty Avenue, Pittsburgh, PA 15222-3779.

The Adviser has delegated daily management of some or all of the Fund assets to the Sub-Adviser, Federated Global Investment Management Corp., who is paid by the Adviser and not by the Fund, based on the portion of securities the Sub-Adviser manages. The Sub-Adviser's address is 101 Park Avenue, 41st Floor, New York, NY 10178.

The Adviser, Sub-Adviser and other advisory subsidiaries of Federated Hermes combined, advise approximately 101 registered investment companies spanning equity, fixed-income and money market mutual funds and also manage a variety of other pooled investment vehicles, private investment companies and customized separately managed accounts (including non-U.S./offshore funds). Federated Hermes' assets under management totaled approximately \$757.6 billion as of December 31, 2023. Federated Hermes was established in 1955 as Federated Investors, Inc. and is one of the largest investment managers in the United States with more than 2,000 employees. Federated Hermes provides investment products to more than 10,000 investment professionals and institutions.

The Adviser advises approximately 16 registered investment companies and also manages sub-advised funds. The Adviser's assets under management totaled approximately \$13.8 billion as of December 31, 2023.

The Sub-Adviser advises approximately 14 registered investment companies and also manages a variety of sub-advised, institutional and separately managed accounts (including non-U.S./offshore funds). The Sub-Adviser's assets under management totaled approximately \$13.6 billion as of December 31, 2023.

## PORTFOLIO MANAGEMENT INFORMATION

The Fund is managed by the Federated Hermes Kaufmann Growth Equity Team. Portfolio Managers and Investment Analysts are members of the Team and make investment decisions with respect to a portion of the Fund's portfolio, with the oversight of Hans P. Utsch and John Ettinger. The team members responsible for security selection make investment decisions or recommendations with respect to sectors or industries to which they are assigned.

Investment Team Member	Business Experience	Primary Role in Fund Management
<b>Hans P. Utsch</b>	Member of Fund's Investment Team since April 2002; Senior Portfolio Manager and Co-Head of Kaufmann Growth Equity Team; has been with the Adviser or an affiliate since 2001; formerly Chairman of the Board and Secretary of Edgemont Asset Management Corp., and President and Portfolio Manager to The Kaufmann Fund, Inc. (predecessor to the Kaufmann Fund) from 1984-2001; B.A., Amherst College; M.B.A., Columbia University.	Senior Portfolio Manager; security selection; and team oversight
<b>John Ettinger</b>	Member of the Fund's Investment Team since April 2002; Senior Portfolio Manager, Co-Head of the Kaufmann Growth Equity Team; has been with the Adviser or an affiliate since 2001; formerly Investment Analyst with Edgemont Asset Management Corp., Adviser to The Kaufmann Fund, Inc. (predecessor to the Kaufmann Fund) from 1996-2001; B.A., Duke University; received Chartered Financial Analyst designation.	Senior Portfolio Manager; sets investment strategy; security selection; and team oversight
<b>Mark Bauknight</b>	Member of the Fund's Investment Team since April 2002; Senior Portfolio Manager; has been with the Adviser or an affiliate since 2001; formerly Investment Analyst with Edgemont Asset Management Corp., Adviser to The Kaufmann Fund, Inc. (predecessor to the Kaufmann Fund) from 1997-2001; Two B.A. degrees, University of North Carolina at Chapel Hill; M.B.A., University of Oxford.	Senior Portfolio Manager; security selection; research and analytical support
<b>Tom M. Brakel</b>	Member of the Fund's Investment Team since October 2003; Senior Portfolio Manager; has been with the Adviser or an affiliate since 2003; formerly Analyst with New Vernon Associates from 2002-2003, BioPharma Fund from 2000-2002; Mehta Partners from 1998-1999; U.S. pharmaceutical experience includes six years at Organon Inc.; M.D., Erasmus University, The Netherlands; M.B.A., Stanford University.	Senior Portfolio Manager; sets investment strategy; security selection; research and analytical support
<b>Barbara Miller</b>	Member of the Fund's Investment Team since April 2002; Senior Portfolio Manager; has been with the Adviser or an affiliate since 2002; formerly Vice President and Equity Analyst with Goldman Sachs from 1999-2001 and Principal/Equity Analyst with Alex Brown & Sons from 1992-1999; B.A., Brown University; M.B.A., Harvard Business School.	Senior Portfolio Manager; security selection; research and analytical support

<b>Investment Team Member</b>	<b>Business Experience</b>	<b>Primary Role in Fund Management</b>
<b>Steven Abrahamson</b>	Member of the Fund's Investment Team since April 2002; Senior Portfolio Manager; has been with the Adviser or an affiliate since 2001; formerly Investment Analyst with Edgemont Asset Management Corp., Adviser to The Kaufmann Fund, Inc. (predecessor to the Kaufmann Fund) since 2001; B.S., Bucknell University; M.B.A., Duke University.	Senior Portfolio Manager; security selection; research and analytical support
<b>Stephen DeNichilo</b>	Member of the Fund's Investment team since February 2012; Senior Portfolio Manager; has been with the Adviser or an affiliate since 2012; formerly Senior Research Analyst with ACK Asset Management, LLC from 2010-2012 and Equity Research Analyst with Thomson, Horstmann & Bryant, Inc., from 2006-2010; B.S., Villanova University; M.B.A., Fordham University; received Chartered Financial Analyst designation.	Senior Portfolio Manager; security selection; research and analytical support
<b>Aditi Singhania</b>	Member of the Fund's Investment Team since April 2018; Portfolio Manager; has been with the Adviser or an affiliate since 2018; formerly Vice President, Research Analyst, Pharmaceuticals Equity Research, J.P. Morgan Chase; Biotech Equity Research Associate, Leerink Partners. Fachhochschule Bonn Rhein Sieg, Germany (bachelor thesis conducted at Harvard University); Ph.D., Columbia University.	Portfolio Manager; security selection; research and analytical support

The Fund's SAI provides additional information about the Portfolio Managers' compensation, management of other accounts and ownership of securities in the Fund.

#### **ADVISORY FEES**

The Fund's investment advisory contract provides for payment to the Adviser of an annual investment advisory fee of 1.30% of the Fund's average daily net assets. The Adviser may voluntarily waive a portion of its fee or reimburse the Fund for certain operating expenses. The Adviser and its affiliates have also agreed to certain "Fee Limits" as described in the footnote to the "Risk/Return Summary: Fees and Expenses" table found in the "Fund Summary" section of the Prospectus.

A discussion of the Board's review of the Fund's investment advisory and sub-advisory contracts is available in the Fund's Annual and Semi-Annual Shareholder Reports for the periods ended December 31 and June 30, respectively.

## **Financial Information**

#### **FINANCIAL HIGHLIGHTS**

The Financial Highlights will help you understand the Fund's financial performance for its past five fiscal years. Some of the information is presented on a per Share basis. Total returns represent the rate an investor would have earned (or lost) on an investment in the Fund, assuming reinvestment of any dividends and capital gains. The total return information shown in the Financial Highlights table does not reflect the fees and expenses of any separate account that may use the Fund as its underlying investment medium or of any variable insurance contract that may be funded in such a separate account. If these fees and expenses were included, the total return figures for all periods shown would be reduced.

This information has been audited by KPMG LLP, an independent registered public accounting firm, whose report, along with the Fund's audited financial statements, is included in the Annual Report.

## Financial Highlights – Primary Shares

(For a Share Outstanding Throughout Each Period)

	Year Ended December 31,

Net assets, end of period (000 omitted)	\$33,266	\$34,430	\$55,366	\$63,502	\$57,988
Portfolio turnover <sup>6</sup>	56%	41%	34%	45%	43%

1 Per share numbers have been calculated using the average shares method.

2 Based on net asset value. Total returns do not reflect any additional fees or expenses that may be imposed by separate accounts of insurance companies or in connection with any variable annuity or variable life insurance contract.

3 Amount does not reflect net expenses incurred by investment companies in which the Fund may invest.

4 This expense decrease is reflected in both the net expense and the net investment income ratios shown above. Amount does not reflect expense waiver/reimbursement recorded by investment companies in which the Fund may invest.

5 Represents less than 0.01%.

6 Securities that mature are considered sales for purposes of this calculation.

Further information about the Fund's performance is contained in the Fund's Annual Report, dated December 31, 2023, which can be obtained free of charge.

## Appendix A: Hypothetical Investment and Expense Information

The following chart provides additional hypothetical information about the effect of the Fund's expenses, including investment advisory fees and other Fund costs, on the Fund's assumed returns over a 10-year period. The chart shows the estimated expenses that would be incurred in respect of a hypothetical investment of \$10,000, assuming a 5% return each year, and no redemption of Shares. The chart also assumes that the Fund's annual expense ratio stays the same throughout the 10-year period and that all dividends and distributions are reinvested. The annual expense ratio used in the chart is the same as stated in the "Fees and Expenses" table of this Prospectus (and thus: (1) does not reflect any fee waiver or expense reimbursement currently in effect; and (2) does not reflect any additional fees or expenses that may be imposed by separate accounts of insurance companies in connection with any variable annuity or variable life insurance contract which, if included, would make your costs higher). Variable investment option returns, as well as fees and expenses, may fluctuate over time, and your actual investment returns and total expenses may be higher or lower than those shown below.

### FEDERATED HERMES KAUFMANN FUND II - P CLASS

**ANNUAL EXPENSE RATIO: 1.57%**

**MAXIMUM FRONT-END SALES CHARGE: N/A**

Year	Hypothetical Beginning Investment	Hypothetical Performance Earnings	Investment After Returns	Hypothetical Expenses	Hypothetical Ending Investment
1	\$10,000.00	\$500.00	\$10,500.00	\$159.69	\$10,343.00
2	\$10,343.00	\$517.15	\$10,860.15	\$165.17	\$10,697.76
