How is the Fund Organized?

The Fund is a non-diversified portfolio of Federated Hermes ETF Trust (the “Trust”). The Trust is an open-end, management investment company that was established under the laws of Delaware on August 24, 2011. The Trust may offer separate series of shares representing interests in separate portfolios of securities.

The Fund’s investment adviser is Federated MDTA LLC (the “Adviser”).

EXCHANGE LISTING AND TRADING

A discussion of exchange listing and trading matters associated with an investment in the Fund is contained in the Prospectus. The discussion below supplements, and should be read in conjunction with, such sections of the Prospectus.

The Fund issues and redeems Shares at net asset value (NAV) only in aggregations of a specified number of Shares (“Creation Units”), generally in exchange for a basket of securities (“Basket”), together with a specified cash payment, or, in certain circumstances, for an all cash payment. Unlike mutual funds, Shares are not individually redeemable.

Certain employees of the Adviser are responsible for interacting with market participants that transact in Baskets for one or more Creation Units. As part of these discussions, these employees may discuss with a market participant the securities the Fund is willing to accept in connection with a purchase (“creation”) of shares, and securities that the Fund will provide on a redemption of shares. The Adviser’s employees may also discuss portfolio holdings-related information with broker/dealers in connection with settling the Fund’s transactions, as may be necessary to conduct business in the ordinary course.

The Shares of the Fund are listed and traded on the Exchange identified on the cover of this SAI at prices that may differ from the Fund’s NAV. There can be no assurance that the Exchange requirements necessary to maintain the listing of the Shares of the Fund will continue to be met. The Exchange may, but is not required to, remove the Shares of the Fund from listing if, among other matters: (i) the Exchange becomes aware that the Fund is no longer eligible to operate in reliance on Rule 6c-11 under the 1940 Act to the extent such Fund’s listing is conditioned upon reliance on Rule 6c-11; (ii) following the initial 12-month period beginning at the commencement of trading of the Fund, there are fewer than 50 beneficial owners of Shares; or (iii) such other event shall occur or condition exist that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. The Exchange will remove the Shares of the Fund from listing and trading upon termination of the Fund.

Trading prices of Shares on the Exchange may differ from the Fund’s daily NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares.

The Fund is not sponsored, endorsed, sold, or promoted by the Exchange. The Exchange makes no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly or the ability of the Fund to achieve its objective. The Exchange has no obligation or liability in connection with the administration, marketing or trading of the Fund.

Additional Investment Strategies

The Fund’s principal investment strategies are described in the Fund’s Prospectus. As a non-principal investment strategy, the Fund may also invest in derivatives, such as options or futures, in a manner that is consistent with its investment objective.

The Fund may use derivative contracts and/or hybrid instruments to implement elements of its investment strategy. For example, the Fund may use derivative contracts and/or hybrid instruments to increase or decrease the portfolio’s exposure to the investment(s) underlying the derivative or hybrid in an attempt to benefit from changes in the value of the underlying investments. The Fund may also, for example, use derivative contracts to:

- obtain premiums from the sale of derivative contracts;
- realize gains from trading a derivative contract; or
- hedge against potential losses.

There can be no assurance that the Fund’s use of derivative contracts or hybrid instruments will work as intended. Derivative investments made by the Fund are included with in the Fund’s 80% policy and are calculated at market value.

Securities in Which the Fund Invests

The principal securities or other investments in which the Fund invests are described in the Fund’s Prospectus. The Fund also may invest in securities or other investments as non-principal investments for any purpose that is consistent with its investment objective. The following information is either additional information in respect of a principal security or other investment referenced in the Prospectus or information in respect of a non-principal security or other investment (in which case there is no related disclosure in the Prospectus).

SECURITIES DESCRIPTIONS AND TECHNIQUES

EQUITY SECURITIES

Equity securities represent a share of an issuer's earnings and assets, after the issuer pays its liabilities. The Fund cannot predict the income it will receive from equity securities because issuers generally have discretion as to the payment of any dividends or distributions. However, equity securities offer greater potential for appreciation than many other types of securities, because their value increases directly with the value of the issuer's business. The following describes the types of equity securities in which the Fund invests.

Preferred Stocks

Preferred stocks have the right to receive specified dividends or distributions before the issuer makes payments on its common stock. Some preferred stocks also participate in dividends and distributions paid on common stock. Preferred stocks may also permit the issuer to redeem the stock. The Fund may also treat such redeemable preferred stock as a fixed-income security.

Warrants

Warrants give the Fund the option to buy the issuer's equity securities at a specified price (the "exercise price") at a specified future date (the "expiration date"). The Fund may buy the designated securities by paying the exercise price before the expiration date. Warrants may become worthless if the price of the stock does not rise above the exercise price by the expiration date. This increases the market risks of warrants as compared to the underlying security. Rights are the same as warrants, except companies typically issue rights to existing stockholders.

FIXED-INCOME SECURITIES

Fixed-income securities pay interest, dividends or distributions at a specified rate. The rate may be a fixed percentage of the principal or may be adjusted periodically. In addition, the issuer of a fixed-income security must repay the principal amount of the security, normally within a specified time. Fixed-income securities provide more regular income than equity securities. However, the returns on fixed-income securities are limited and normally do not increase with the issuer's earnings. This limits the potential appreciation of fixed-income securities as compared to equity securities.

A security's yield measures the annual income earned on a security as a percentage of its price. A security's yield will increase or decrease depending upon whether it costs less (a "discount") or more (a "premium") than the principal amount. If the issuer may redeem the security before its scheduled maturity, the price and yield on a discount or premium security may change based upon the probability of an early redemption. Securities with higher risks generally have higher yields.

The following describes the types of fixed-income securities in which the Fund invests.

Treasury Securities (A Fixed-Income Security)

Treasury securities are direct obligations of the federal government of the United States. Treasury securities are generally regarded as having minimal credit risks.

Government Securities (A Fixed-Income Security)

Government securities are issued or guaranteed by a federal agency or instrumentality acting under federal authority. Some government securities, including those issued by Government National Mortgage Association ("Ginnie Mae"), are supported by the full faith and credit of the United States and are guaranteed only as to the timely payment of interest and principal.

Other government securities receive support through federal subsidies, loans or other benefits, but are not backed by the full faith and credit of the United States. For example, the U.S. Treasury is authorized to purchase specified amounts of securities issued by (or otherwise make funds available to) the Federal Home Loan Bank System, Federal Home Loan Mortgage Corporation ("Freddie Mac"), Federal National Mortgage Association ("Fannie Mae") and Tennessee Valley Authority in support of such obligations.

Some government agency securities have no explicit financial support and are supported only by the credit of the applicable agency, instrumentality or corporation. The U.S. government has provided financial support to Freddie Mac and Fannie Mae, but there is no assurance that it will support these or other agencies in the future.

Investors generally regard government securities as having minimal credit risks, but not as low as Treasury securities.

The Fund treats mortgage-backed securities guaranteed by a federal agency or instrumentality as government securities. Although such a guarantee helps protect against credit risk, it does not eliminate it entirely or reduce other risks.

Additional Information Related to Freddie Mac and Fannie Mae. The extreme and unprecedented volatility and disruption that impacted the capital and credit markets beginning in 2008 led to market concerns regarding the ability of Freddie Mac and Fannie Mae to withstand future credit losses associated with securities held in their investment portfolios, and on which they provide guarantees, without the direct support of the federal government. On September 7, 2008, Freddie Mac and Fannie Mae

were placed under the conservatorship of the Federal Housing Finance Agency (FHFA). Under the plan of conservatorship, the FHFA assumed control of, and generally has the power to direct, the operations of Freddie Mac and Fannie Mae, and is empowered to exercise all powers collectively held by their respective shareholders, directors and officers, including the power to: (1) take over the assets of and operate Freddie Mac and Fannie Mae with all the powers of the shareholders, the directors and the officers of Freddie Mac and Fannie Mae and conduct all business of Freddie Mac and Fannie Mae; (2) collect all obligations and money due to Freddie Mac and Fannie Mae; (3) perform all functions of Freddie Mac and Fannie Mae which are consistent with the conservator's appointment; (4) preserve and conserve the assets and property of Freddie Mac and Fannie Mae; and (5) contract for assistance in fulfilling any function, activity, action or duty of the conservator.

In connection with the actions taken by the FHFA, the Treasury has entered into certain preferred stock purchase agreements (SPAs) with each of Freddie Mac and Fannie Mae which establish the Treasury as the holder of a new class of senior preferred stock in each of Freddie Mac and Fannie Mae. The senior preferred stock was issued in connection with financial contributions from the Treasury to Freddie Mac and Fannie Mae. Although the SPAs are subject to amendment from time to time, currently the Treasury is obligated to provide such financial contributions up to an aggregate maximum amount determined by a formula set forth in the SPAs, and until such aggregate maximum amount is reached, there is not a specific end date to the Treasury's obligations.

The future status and role of Freddie Mac and Fannie Mae could be impacted by (among other things) the actions taken and restrictions placed on Freddie Mac and Fannie Mae by the FHFA in its role as conservator, the restrictions placed on Freddie Mac's and Fannie Mae's operations and activities under the SPAs, market responses to developments at Freddie Mac and Fannie Mae, downgrades or upgrades in the credit ratings assigned to Freddie Mac and Fannie Mae by nationally recognized statistical rating organizations (NRSROs) or ratings services, and future legislative and regulatory action that alters the operations, ownership, structure and/or mission of these institutions, each of which may, in turn, impact the value of, and cash flows on, any securities guaranteed by Freddie Mac and Fannie Mae.

In addition, the future of Freddie Mac and Fannie Mae, and other U.S. government-sponsored enterprises that are not backed by the full faith and credit of the U.S. government (GSEs), remains in question as the U.S. government continues to consider options ranging from structural reform, nationalization, privatization or consolidation, to outright elimination. The issues that have led to significant U.S. government support for Freddie Mac and Fannie Mae have sparked serious debate regarding the continued role of the U.S. government in providing mortgage loan liquidity.

Corporate Debt Securities (A Fixed-Income Security)

Corporate debt securities are fixed-income securities issued by businesses. Notes, bonds, debentures and commercial paper are the most prevalent types of corporate debt securities. The Fund may also purchase interests in bank loans to companies. The credit risks of corporate debt securities vary widely among issuers.

In addition, the credit risk of an issuer's debt security may vary based on its priority for repayment. For example, higher ranking ("senior") debt securities have a higher priority than lower ranking ("subordinated") securities. This means that the issuer might not make payments on subordinated securities while continuing to make payments on senior securities. In addition, in the event of bankruptcy, holders of senior securities may receive amounts otherwise payable to the holders of subordinated securities. Some subordinated securities, such as trust preferred and capital securities notes, also permit the issuer to defer payments under certain circumstances. For example, insurance companies issue securities known as surplus notes that permit the insurance company to defer any payment that would reduce its capital below regulatory requirements.

Commercial Paper (A Type of Corporate Debt Security)

Commercial paper is an issuer's obligation with a maturity of less than nine months. Companies typically issue commercial paper to pay for current expenditures. Most issuers constantly reissue their commercial paper and use the proceeds (or bank loans) to repay maturing paper. If the issuer cannot continue to obtain liquidity in this fashion, its commercial paper may default. The short maturity of commercial paper generally reduces both the market and credit risks as compared to other debt securities of the same issuer.

Demand Instruments (A Type of Corporate Debt Security)

Demand instruments are corporate securities that require the issuer or a third party, such as a dealer or bank (the "Demand Provider"), to repurchase the security for its face value upon demand. Some demand instruments are "conditional," so that the occurrence of certain conditions relieves the Demand Provider of its obligation to repurchase the security. Other demand instruments are "unconditional," so that there are no conditions under which the Demand Provider's obligation to repurchase the security can terminate. The Fund treats demand instruments as short-term securities, even though their stated maturity may extend beyond one year.

Mortgage-Backed Securities (A Fixed-Income Security)

An MBS is a type of pass-through security, which is a pooled debt obligation repackaged as interests that pass principal and interest through an intermediary to investors. In the case of MBS, the ownership interests are issued by a trust and represent participation interests in pools of adjustable and fixed-rate mortgage loans. MBS are most commonly issued or guaranteed by the U.S. government (or one of its agencies or instrumentalities). Unlike conventional debt obligations, MBS provide monthly payments derived from the monthly interest and principal payments (including any prepayments) made by the individual borrowers on the pooled mortgage loans. Most MBS make these payments monthly; however, certain MBS are backed by mortgage loans which do not generate monthly payments but rather generate payments less frequently.

The MBS acquired by the Fund could be secured by fixed-rate mortgages, adjustable-rate mortgages or hybrid adjustable-rate mortgages. Adjustable-rate mortgages are mortgages whose interest rates are periodically reset when market rates change. A hybrid adjustable-rate mortgage (“hybrid ARM”) is a type of mortgage in which the interest rate is fixed for a specified period and then resets periodically, or floats, for the remaining mortgage term. Hybrid ARMs are usually referred to by their fixed and floating periods. For example, a “5/1 ARM” refers to a mortgage with a five-year fixed interest rate period, followed by 25 annual interest rate adjustment periods.

Investments in MBS expose the Fund to interest rate, prepayment and credit risks.

Zero-Coupon Securities (A Fixed-Income Security)

Zero-coupon securities do not pay interest or principal until final maturity unlike debt securities that provide periodic payments of interest (referred to as a coupon payment). Investors buy zero-coupon securities at a price below the amount payable at maturity. The difference between the purchase price and the amount paid at maturity represents interest on the zero-coupon security. Investors must wait until maturity to receive interest and principal, which increases the interest rate and credit risks of a zero-coupon security. A zero-coupon step-up security converts to a coupon security before final maturity.

There are many forms of zero-coupon securities. Some are issued at a discount and are referred to as zero coupon or capital appreciation bonds. Others are created from interest bearing bonds by separating the right to receive the bond’s coupon payments from the right to receive the bond’s principal due at maturity, a process known as coupon stripping. Treasury STRIPs, IOs and POs are the most common forms of stripped zero-coupon securities. In addition, some securities give the issuer the option to deliver additional securities in place of cash interest payments, thereby increasing the amount payable at maturity. These are referred to as pay-in-kind or PIK securities.

Stripped Securities

As a non-principal strategy, the Fund may have the ability to purchase participations in trusts that hold U.S. Treasury and agency securities (such as TIGRs and CATs) and also may purchase Treasury receipts and other “stripped” securities that evidence ownership in either the future interest payments or the future principal payments of U.S. government obligations. These participations are issued at a discount to their “face value,” and may (particularly in the case of stripped mortgage-backed securities) exhibit greater price volatility than ordinary debt securities because of the manner in which their principal and interest are returned to investors.

Asset-Backed Securities (A Fixed-Income Security)

Asset-backed securities are payable from pools of obligations other than mortgages. Most asset-backed securities involve consumer or commercial debts with maturities of less than 10 years. However, almost any type of fixed-income assets (including other fixed-income securities) may be used to create an asset-backed security. Asset-backed securities may take the form of commercial paper, notes, or pass through certificates. Asset-backed securities have prepayment risks. Like CMOs, asset-backed securities may be structured like Floaters, Inverse Floaters, IOs and POs.

Bank Instruments (A Fixed-Income Security)

Bank instruments are unsecured interest bearing deposits with banks. Bank instruments include, but are not limited to, bank accounts, time deposits, certificates of deposit and banker’s acceptances. Yankee instruments are denominated in U.S. dollars and issued by U.S. branches of foreign banks. Eurodollar instruments are denominated in U.S. dollars and issued by non-U.S. branches of U.S. or foreign banks.

CONVERTIBLE SECURITIES

Convertible securities are fixed-income securities or preferred stocks that the Fund has the option to exchange for equity securities at a specified conversion price. The option allows the Fund to realize additional returns if the market price of the equity securities exceeds the conversion price. For example, the Fund may hold fixed-income securities that are convertible into shares of common stock at a conversion price of \$10 per share. If the market value of the shares of common stock reached \$12, the Fund could realize an additional \$2 per share by converting its fixed-income securities.

Convertible securities have lower yields than comparable fixed-income securities. In addition, at the time a convertible security is issued the conversion price exceeds the market value of the underlying equity securities. Thus, convertible securities may provide lower returns than non-convertible fixed-income securities or equity securities depending upon changes in the price of the underlying equity securities. However, convertible securities permit the Fund to realize some of the potential appreciation of the underlying equity securities with less risk of losing its initial investment.

The Fund treats convertible securities as both fixed-income and equity securities for purposes of its investment policies and limitations, because of their unique characteristics.

FOREIGN SECURITIES

Foreign securities are securities of issuers based outside the United States. To the extent a Fund invests in securities included in its applicable broad-based securities market index, the Fund may consider an issuer to be based outside the United States if the applicable index classifies the issuer as based outside the United States. Accordingly, the Fund may consider an issuer to be based outside the United States if the issuer satisfies at least one, but not necessarily all, of the following:

- it is organized under the laws of, or has its principal office located in, another country;
- the principal trading market for its securities is in another country;
- it (directly or through its consolidated subsidiaries) derived in its most current fiscal year at least 50% of its total assets, capitalization, gross revenue or profit from goods produced, services performed or sales made in another country; or
- it is classified by an applicable index as based outside the United States.

Foreign securities are primarily denominated in foreign currencies. Along with the risks normally associated with domestic securities of the same type, foreign securities are subject to currency risks and risks of foreign investing. Trading in certain foreign markets is also subject to liquidity risks.

Depository Receipts (A Type of Foreign Equity Security)

Depository receipts represent interests in underlying securities issued by a foreign company. Depository receipts are not traded in the same market as the underlying security. The foreign securities underlying American Depositary Receipts (ADRs) are traded outside the United States. ADRs provide a way to buy shares of foreign-based companies in the United States rather than in overseas markets. ADRs are also traded in U.S. dollars, eliminating the need for foreign exchange transactions. The foreign securities underlying European Depositary Receipts (EDRs), Global Depositary Receipts (GDRs) and International Depositary Receipts (IDRs), are traded globally or outside the United States. Depository receipts involve many of the same risks of investing directly in foreign securities, including currency risks and risks of foreign investing.

Foreign Exchange Contracts

In order to convert U.S. dollars into the currency needed to buy a foreign security, or to convert foreign currency received from the sale of a foreign security into U.S. dollars, the Fund may enter into spot currency trades. In a spot trade, the Fund agrees to exchange one currency for another at the current exchange rate. The Fund may also enter into derivative contracts in which a foreign currency is an underlying asset. The exchange rate for currency derivative contracts may be higher or lower than the spot exchange rate. Use of these derivative contracts may increase or decrease the Fund's exposure to currency risks.

Foreign Government Securities

Foreign government securities generally consist of fixed-income securities supported by national, state or provincial governments or similar political subdivisions. Foreign government securities also include debt obligations of supranational entities, such as international organizations designed or supported by governmental entities to promote economic reconstruction or development, international banking institutions and related government agencies. Examples of these include, but are not limited to, the International Bank for Reconstruction and Development (the "World Bank"), the Asian Development Bank, the European Investment Bank and the Inter-American Development Bank.

Foreign government securities also include fixed-income securities of quasi-governmental agencies that are either issued by entities owned by a national, state or equivalent government or are obligations of a political unit that are not backed by the national government's full faith and credit. Further, foreign government securities include mortgage-related securities issued or guaranteed by national, state or provincial governmental instrumentalities, including quasi-governmental agencies.

Emerging Market Securities

As a non-principal strategy, the Fund may also invest in emerging market countries or developing countries. Developing countries may impose restrictions on a Fund's ability to repatriate investment income or capital. Even where there is no outright restriction on repatriation of investment income or capital, the mechanics of repatriation may affect certain aspects of the operations of the Fund. For example, funds may be withdrawn from the People's Republic of China only in U.S. or Hong Kong dollars and only at an exchange rate established by the government once each week. Furthermore, some of the currencies in emerging markets have experienced devaluations relative to the U.S. dollar, and major adjustments have been made periodically in certain of such currencies. Certain developing countries face serious exchange constraints.

Governments of some developing countries exercise substantial influence over many aspects of the private sector. In some countries, the government owns or controls many companies, including the largest in the country. As such, government actions in the future could have a significant effect on economic conditions in developing countries in these regions, which could affect private sector companies, a portfolio and the value of its securities. Furthermore, certain developing countries are among the largest debtors to commercial banks and foreign governments. Trading in debt obligations issued or guaranteed by such governments or their agencies and instrumentalities involve a high degree of risk.

DERIVATIVE CONTRACTS

Derivative contracts are financial instruments that derive their value from underlying securities, commodities, currencies, indices or other assets or instruments, including other derivative contracts (each a “Reference Instrument” and collectively, “Reference Instruments”). The most common types of derivative contracts are swaps, futures and options, and the major asset classes include interest rates, equities, commodities and foreign exchange. Each party to a derivative contract may sometimes be referred to as a “counterparty.” Some derivative contracts require payments relating to an actual, future trade involving the Reference Instrument. These types of derivatives are frequently referred to as “physically settled” derivatives. Other derivative contracts require payments relating to the income or returns from, or changes in the market value of, a Reference Instrument. These types of derivatives are known as “cash settled” derivatives, since they require cash payments in lieu of delivery of the Reference Instrument.

Many derivative contracts are traded on exchanges. In these circumstances, the relevant exchange sets all the terms of the contract except for the price. Parties to an exchange-traded derivative contract make payments through the exchange. Most exchanges require traders to maintain margin accounts through their brokers to cover their potential obligations to the exchange. Parties to the contract make or collect daily payments to the margin accounts to reflect losses or gains, respectively, in the value of their contracts. This protects traders against a potential default by their counterparty. Trading contracts on an exchange also allows traders to hedge or mitigate certain risks or carry out more complex trading strategies by entering into offsetting contracts.

For example, the Fund could close out an open contract to buy an asset at a future date by entering into an offsetting contract to sell the same asset on the same date. If the offsetting sale price is more than the original purchase price, the Fund realizes a gain; if it is less, the Fund realizes a loss. Exchanges may limit the amount of open contracts permitted at any one time. Such limits may prevent the Fund from closing out a position. If this happens, the Fund will be required to keep the contract open (even if it is losing money on the contract), and to make any payments required under the contract (even if it has to sell portfolio securities at unfavorable prices to do so). Inability to close out a contract could also harm the Fund by preventing it from disposing of or trading any assets it has been using to secure its obligations under the contract.

The Fund may also trade derivative contracts over-the-counter (OTC), meaning off-exchange, in transactions negotiated directly between the Fund and an eligible counterparty, which may be a financial institution. OTC contracts do not necessarily have standard terms, so they may be less liquid and more difficult to close out than exchange-traded derivative contracts. In addition, OTC contracts with more specialized terms may be more difficult to value than exchange-traded contracts, especially in times of financial stress.

The market for swaps and other OTC derivatives was largely unregulated prior to the enactment of federal legislation known as the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”). Regulations enacted by the Commodity Futures Trading Commission (the “CFTC”) under the Dodd-Frank Act require the Fund to clear certain types of swap contracts (including certain interest rate and credit default swaps) through a central clearinghouse known as a derivatives clearing organization (DCO).

To clear a swap through a DCO, the Fund will submit the contract to, and post margin with, a futures commission merchant (FCM) that is a clearinghouse member. The Fund may enter into the swap with a counterparty other than the FCM and arrange for the contract to be transferred to the FCM for clearing or enter into the contract with the FCM itself. If the Fund must centrally clear a transaction, the CFTC’s regulations also generally require that the swap be executed on a registered exchange (either a designated contract market (DCM) or swap execution facility (SEF)). Central clearing is presently required only for certain swaps; the CFTC is expected to impose a mandatory central clearing requirement for additional derivative instruments over time.

DCOs, DCMs, SEFs and FCMs are all subject to regulatory oversight by the CFTC. In addition, certain derivative market participants that act as market makers, and engage in a significant amount of “dealing” activity are also required to register as swap dealers with the CFTC. Among other things, swap dealers are subject to minimum capital requirements and business conduct standards and must also post and collect initial and variation margin on uncleared swaps with certain of their counterparties. Because of this, if the Fund enters into uncleared swaps with any swap dealers, it may be subject to initial and variation margin requirements that could impact the Fund’s ability to enter into swaps in the OTC market, including making transacting in uncleared swaps significantly more expensive.

At this point in time, most of the Dodd-Frank Act has been fully implemented, though a small number of remaining rulemakings are unfinished or are subject to phase-in periods. Any future regulatory or legislative activity would not necessarily have a direct, immediate effect upon the Fund, though it is within the realm of possibility that, upon implementation of these measures or any future measures, they could potentially limit or completely restrict the ability of the Fund to use these instruments as a part of its investment strategy, increase the costs of using these instruments or make them less effective.

Depending on how the Fund uses derivative contracts and the relationships between the market value of a derivative contract and the Reference Instrument, derivative contracts may increase or decrease the Fund's exposure to the risks of the Reference Instrument and may also expose the Fund to liquidity and leverage risk. OTC contracts also expose the Fund to credit risk in the event that a counterparty defaults on the contract, although this risk may be mitigated by submitting the contract for clearing through a DCO, or certain other factors, such as collecting margin from the counterparty.

The Fund may invest in a derivative contract if it is permitted to own, invest in or otherwise have economic exposure to the Reference Instrument. The Fund is not required to own a Reference Instrument in order to buy or sell a derivative contract relating to that Reference Instrument. The Fund may trade in the following specific types and/or combinations of derivative contracts:

Futures Contracts (A Type of Derivative)

Futures contracts provide for the future sale by one party and purchase by another party of a specified amount of a Reference Instrument at a specified price, date and time. Entering into a contract to buy a Reference Instrument is commonly referred to as buying a contract or holding a long position in the asset. Entering into a contract to sell a Reference Instrument is commonly referred to as selling a contract or holding a short position in the Reference Instrument. Futures contracts are considered to be commodity contracts. The Adviser has claimed an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act with respect to the Fund, and therefore, is not subject to registration or regulation as a commodity pool operator under the Act with respect to the Fund. Futures contracts traded OTC are frequently referred to as forward contracts. The Fund can buy or sell financial futures (such as interest rate futures, index futures and security futures), as well as currency futures and currency forward contracts.

Interest Rate Futures

An interest-rate futures contract is an exchange-traded contract for which the Reference Instrument is an interest-bearing, fixed-income security or an inter-bank deposit. Two examples of common interest rate futures contracts are U.S. Treasury futures contracts and Eurodollar futures contracts. The Reference Instrument for a U.S. Treasury futures contract is a U.S. Treasury security. The Reference Instrument for a Eurodollar futures contract is the Secured Overnight Financing Rate (commonly referred to as SOFR); Eurodollar futures contracts enable the purchaser to obtain a fixed rate for the lending of funds over a stated period of time and the seller to obtain a fixed rate for a borrowing of funds over that same period.

Index Futures

An index futures contract is an exchange-traded contract to make or receive a payment based upon changes in the value of an index. An index is a statistical composite that measures changes in the value of designated Reference Instruments within the index.

Security Futures

A security futures contract is an exchange-traded contract to purchase or sell in the future a specific quantity of a security (other than a Treasury security) or a narrow-based securities index at a certain price. Presently, the only available security futures contracts use shares of a single equity security as the Reference Instrument. However, it is possible that in the future security futures contracts will be developed that use a single fixed-income security as the Reference Instrument.

Currency Futures and Currency Forward Contracts (Types of Futures Contracts)

A currency futures contract is an exchange-traded contract to buy or sell a particular currency at a specific price at some time in the future (commonly three months or more). A currency forward contract is not an exchange-traded contract and it represents an obligation to purchase or sell a specific currency at a future date, at a price set at the time of the contract and for a period agreed upon by the parties which may be either a window of time or a fixed number of days from the date of the contract. Currency futures and forward contracts are highly volatile, with a relatively small price movement potentially resulting in substantial gains or losses to the Fund. Additionally, the Fund may lose money on currency futures and forward contracts if changes in currency rates do not occur as anticipated or if the Fund's counterparty to the contract were to default.

Option Contracts (A Type of Derivative)

Option contracts (also called "options") are rights to buy or sell a Reference Instrument for a specified price (the "exercise price") during, or at the end of, a specified period. The seller (or "writer") of the option receives a payment, or premium, from the buyer, which the writer keeps regardless of whether the buyer uses (or exercises) the option. Options may be bought or sold on a wide variety of Reference Instruments. Options that are written on futures contracts will be subject to margin requirements similar to those applied to futures contracts.

The Fund may buy and/or sell the following types of options:

Call Options

A call option gives the holder (buyer) the right to buy the Reference Instrument from the seller (writer) of the option. The Fund may use call options in the following ways:

- Buy call options on a Reference Instrument in anticipation of an increase in the value of the Reference Instrument; and
- Write call options on a Reference Instrument to generate income from premiums, and in anticipation of a decrease or only limited increase in the value of the Reference Instrument. If the Fund writes a call option on a Reference Instrument that it owns and that call option is exercised, the Fund foregoes any possible profit from an increase in the market price of the Reference Instrument over the exercise price plus the premium received.

Put Options

A put option gives the holder the right to sell the Reference Instrument to the writer of the option. The Fund may use put options in the following ways:

- Buy put options on a Reference Instrument in anticipation of a decrease in the value of the Reference Instrument; and
- Write put options on a Reference Instrument to generate income from premiums, and in anticipation of an increase or only limited decrease in the value of the Reference Instrument. In writing puts, there is a risk that the Fund may be required to take delivery of the Reference Instrument when its current market price is lower than the exercise price.

The Fund may also buy or write options, as needed, to close out existing option positions.

Finally, the Fund may enter into combinations of options contracts in an attempt to benefit from changes in the prices of those options contracts (without regard to changes in the value of the Reference Instrument).

Swap Contracts (A Type of Derivative)

A swap contract (also known as a “swap”) is a type of derivative contract in which two parties agree to pay each other (swap) the returns derived from Reference Instruments. Most swaps do not involve the delivery of the underlying assets by either party, and the parties might not own the Reference Instruments. The payments are usually made on a net basis so that, on any given day, the Fund would receive (or pay) only the amount by which its payment under the contract is less than (or exceeds) the amount of the other party’s payment. Swap agreements are sophisticated instruments that can take many different forms and are known by a variety of names.

Common swap agreements that the Fund may use include:

Interest Rate Swaps

Interest rate swaps are contracts in which one party agrees to make regular payments equal to a fixed or floating interest rate times a stated principal amount (commonly referred to as a “notional principal amount”) in return for payments equal to a different fixed or floating rate times the same principal amount, for a specific period.

Total Return Swaps

A total return swap is an agreement between two parties whereby one party agrees to make payments of the total return from a Reference Instrument (or a basket of such instruments) during the specified period, in return for payments equal to a fixed or floating rate of interest or the total return from another Reference Instrument. Alternately, a total return swap can be structured so that one party will make payments to the other party if the value of a Reference Instrument increases, but receive payments from the other party if the value of that instrument decreases.

Credit Default Swaps

A credit default swap (CDS) is an agreement between two parties whereby one party (the “Protection Buyer”) agrees to make payments over the term of the CDS to the other party (the “Protection Seller”), provided that no designated event of default, restructuring or other credit related event (each a “Credit Event”) occurs with respect to the Reference Instrument that is usually a particular bond, loan or the unsecured credit of an issuer, in general (the “Reference Obligation”). Many CDS are physically settled, which means that if a Credit Event occurs, the Protection Seller must pay the Protection Buyer the full notional value, or “par value,” of the Reference Obligation in exchange for delivery by the Protection Buyer of the Reference Obligation or another similar obligation issued by the issuer of the Reference Obligation (the “Deliverable Obligation”). The Counterparties agree to the characteristics of the Deliverable Obligation at the time that they enter into the CDS. Alternately, a CDS can be “cash settled,” which means that upon the occurrence of a Credit Event, the Protection Buyer will receive a payment from the Protection Seller equal to the difference between the par amount of the Reference Obligation and its market value at the time of the Credit Event. The Fund may be either the Protection Buyer or the Protection Seller in a CDS. If the Fund is a Protection Buyer and no Credit Event occurs, the Fund will lose its entire investment in the CDS (i.e., an amount equal to the payments made to the Protection Seller over the term of the CDS). However, if a Credit Event occurs, the Fund (as Protection Buyer) will deliver the Deliverable Obligation and receive a payment equal to the full notional value of the Reference Obligation, even though the Reference Obligation may have little or no value. If the Fund is the Protection Seller and no Credit Event occurs, the Fund will receive a fixed rate of income throughout the term of the CDS. However, if a Credit Event occurs, the Fund (as

Protection Seller) will pay the Protection Buyer the full notional value of the Reference Obligation and receive the Deliverable Obligation from the Protection Buyer. A CDS may involve greater risks than if the Fund invested directly in the Reference Obligation. For example, a CDS may increase credit risk since the Fund has exposure to both the issuer of the Reference Obligation and the Counterparty to the CDS.

Currency Swaps

Currency swaps are contracts which provide for interest payments in different currencies. The parties might agree to exchange the notional principal amounts of the currencies as well (commonly called a “foreign exchange swap”).

Caps and Floors (A Type of Swap Contract)

Caps and Floors are contracts in which one party agrees to make payments only if an interest rate or index goes above (Cap) or below (Floor) a certain level in return for a fee from the other party.

OTHER INVESTMENTS, TRANSACTIONS, TECHNIQUES

Repurchase Agreements

Repurchase agreements are transactions in which the Fund buys a security from a dealer or bank and agrees to sell the security back at a mutually agreed-upon time and price. The repurchase price exceeds the sale price, reflecting the Fund’s return on the transaction. This return is unrelated to the interest rate on the underlying security. The Fund will enter into repurchase agreements only with banks and other recognized financial institutions, such as securities dealers, deemed creditworthy by the Adviser.

The Fund’s custodian or subcustodian will take possession of the securities subject to repurchase agreements. The Adviser or subcustodian will monitor the value of the underlying security each day to ensure that the value of the security always equals or exceeds the repurchase price.

Repurchase agreements are subject to credit risks.

Reverse Repurchase Agreements

Reverse repurchase agreements (which are considered a type of special transaction for asset segregation or asset coverage purposes) are repurchase agreements in which the Fund is the seller (rather than the buyer) of the securities, and agrees to repurchase them at an agreed upon time and price. A reverse repurchase agreement may be viewed as a type of borrowing by the Fund. Reverse repurchase agreements are subject to credit risks. In addition, reverse repurchase agreements create leverage risks because the Fund must repurchase the underlying security at a higher price, regardless of the market value of the security at the time of repurchase.

Hybrid Instruments

Hybrid instruments combine elements of two different kinds of securities or financial instruments (such as a derivative contract). Frequently, the value of a hybrid instrument is determined by reference to changes in the value of a Reference Instrument (that is a designated security, commodity, currency, index, or other asset or instrument including a derivative contract). Hybrid instruments can take on many forms including, but not limited to, the following forms. First, a common form of a hybrid instrument combines elements of a derivative contract with those of another security (typically a fixed-income security). In this case all or a portion of the interest or principal payable on a hybrid security is determined by reference to changes in the price of a Reference Instrument. Second, a hybrid instrument may also combine elements of a fixed-income security and an equity security. Third, hybrid instruments may include convertible securities with conversion terms related to a Reference Instrument.

Depending on the type and terms of the hybrid instrument, its risks may reflect a combination of the risks of investing in the Reference Instrument with the risks of investing in other securities, currencies and derivative contracts. Thus, an investment in a hybrid instrument may entail significant risks in addition to those associated with traditional securities or the Reference Instrument. Hybrid instruments are also potentially more volatile than traditional securities or the Reference Instrument. Moreover, depending on the structure of the particular hybrid, it may expose the Fund to leverage risks or carry liquidity risks.

Credit Linked Note (A Type of Hybrid Instrument)

A credit linked note (CLN) is a type of hybrid instrument in which a special purpose entity issues a structured note (the “Note Issuer”) with respect to which the Reference Instrument is a single bond, a portfolio of bonds, or the unsecured credit of an issuer, in general (each a “Reference Credit”). The purchaser of the CLN (the “Note Purchaser”) invests a par amount and receives a payment during the term of the CLN that equals a fixed or floating rate of interest equivalent to a high rated funded asset (such as a bank certificate of deposit) plus an additional premium that relates to taking on the credit risk of the Reference Credit. Upon maturity of the CLN, the Note Purchaser will receive a payment equal to: (i) the original par amount paid to the Note Issuer, if there is no occurrence of a designated event of default, restructuring or other credit event (each a “Credit Event”) with respect to the issuer of the Reference Credit; or (ii) the market value of the Reference Credit, if a Credit Event has occurred.

Depending upon the terms of the CLN, it is also possible that the Note Purchaser may be required to take physical delivery of the Reference Credit in the event of a Credit Event. Most credit linked notes use a corporate bond (or a portfolio of corporate bonds) as the Reference Credit. However, almost any type of fixed-income security (including foreign government securities), index or derivative contract (such as a credit default swap) can be used as the Reference Credit.

Equity Linked Note (A Type of Hybrid Instrument)

An equity linked note (ELN) is a type of hybrid instrument that provides the noteholder with exposure to a single equity security, a basket of equity securities, or an equity index (the "Reference Equity Instrument"). Typically, an ELN pays interest at agreed rates over a specified time period and, at maturity, either converts into shares of a Reference Equity Instrument or returns a payment to the noteholder based on the change in value of a Reference Equity Instrument.

Short Sales

As a non-principal strategy, the Fund has the ability to make short sales. Short sales are transactions where the Fund sells securities it does not own in anticipation of a decline in the market value of the securities. The Fund must borrow the security to deliver it to the buyer. The Fund is then obligated to replace the security borrowed at the market price at the time of replacement. Until the security is replaced, the Fund is required to pay the lender any dividends or interest which accrues on the security during the loan period. To borrow the security, the Fund also may be required to pay a premium, which would increase the cost of the security sold. To the extent necessary to meet margin requirements, the broker will retain proceeds of the short sale until the short position is closed out. The Adviser anticipates that the frequency of short sales will vary substantially under different market conditions and the Fund does not intend that any significant amount of its assets, as a matter of practice, will be in short sales, if any.

In addition to the short sales discussed above, the Fund also has the ability to make short sales "against the box," a transaction in which the Fund enters into a short sale of a security owned by such Fund. A broker holds the proceeds of the short sale until the settlement date, at which time the Fund delivers the security to close the short position. The Fund receives the net proceeds from the short sale.

When the Fund's portfolio manager anticipates that the price of a security will decline, the portfolio manager may sell the security short and borrow the same security from a broker or other institution to complete the sale. The Fund may make a profit or incur a loss depending upon whether the market price of the security decreases or increases between the date of the short sale and the date on which the Fund must replace the borrowed security. An increase in the value of a security sold short by the Fund over the price at which it was sold short will result in a loss to the Fund, and there can be no assurance that the Fund will be able to close out the position at any particular time or at an acceptable price. Use of short sales by the Fund may have the effect of providing the Fund with investment leverage.

Securities Lending

The Fund may lend portfolio securities to borrowers that the Adviser deems creditworthy. In return, the Fund receives cash or liquid securities from the borrower as collateral. The borrower must furnish additional collateral if the market value of the loaned securities increases. Also, the borrower must pay the Fund the equivalent of any dividends or interest received on the loaned securities.

The Fund will reinvest cash collateral in securities that qualify as an acceptable investment for the Fund. However, the Fund must pay interest to the borrower for the use of cash collateral. An acceptable investment into which the Fund may reinvest cash collateral includes, among other acceptable investments, securities of affiliated money market funds (including affiliated institutional prime money market funds with a "floating" net asset value that can impose redemption fees and liquidity gates, impose certain operational impediments to investing cash collateral, and, if net asset value decreases, result in the Fund having to cover the decrease in the value of the cash collateral).

Loans are subject to termination at the option of the Fund or the borrower. The Fund will not have the right to vote on securities while they are on loan. However, the Fund will attempt to terminate a loan in an effort to reacquire the securities in time to vote on matters that are deemed to be material by the Adviser. There can be no assurance that the Fund will have sufficient notice of such matters to be able to terminate the loan in time to vote thereon. The Fund may pay administrative and custodial fees in connection with a loan and may pay a negotiated portion of the interest earned on the cash collateral to a securities lending agent or broker.

Securities lending activities are subject to interest rate risks and credit risks. These transactions create leverage risks.

Derivatives Regulation and Asset Coverage

The regulation of the U.S. and non-U.S. derivatives markets has undergone substantial change in recent years and such change may continue. In addition, effective August 19, 2022, Rule 18f-4 (the “Derivatives Rule”) under the Investment Company Act of 1940, as amended (the “1940 Act”), replaced the asset segregation framework previously used by funds to comply with limitations on leverage imposed by the 1940 Act. The Derivatives Rule generally mandates that a fund either limit derivatives exposure to 10% or less of its net assets, or in the alternative implement: (i) limits on leverage calculated based value-at-risk (VAR); and (ii) a written derivatives risk management program (DRMP) administered by a derivatives risk manager appointed by the Fund’s Board, including a majority of the independent Board members, that is periodically reviewed by the Board.

As the Fund’s derivative exposure, if any, is 10% or less of its net assets, excluding certain currency and interest rate hedging transactions, the Fund is classified as a limited derivatives user under the Derivatives Rule and will not be subject to the full requirements of the Derivatives Rule as noted above, including VAR testing and stress testing and certain Board reporting requirements. However, the Fund is still required to implement written compliance policies and procedures reasonably designed to manage its derivatives risks and monitor its derivatives exposure daily.

In accordance with the requirements of Section 18 of the 1940 Act, any borrowings by the Fund will be made only to the extent the value of its assets, less its liabilities other than borrowings, is equal to at least 300% of all of its borrowings (the “300% Asset Coverage Ratio”). The Derivatives Rule permits the Fund to enter into reverse repurchase agreements and similar financing transactions, notwithstanding limitations on the issuance of senior securities under Section 18 of the 1940 Act, provided that the Fund either (i) treats these transactions as derivatives transactions under the Derivatives Rule, or (ii) ensures that the 300% Asset Coverage Ratio with respect to such transactions and any other borrowings in the aggregate. While reverse repurchase agreements or similar financing transactions aggregated with other indebtedness do not need to be included in the calculation of whether a fund satisfies the Limited Derivatives Users exception, for funds subject to the VAR testing requirement, reverse repurchase agreements and similar financing transactions must be included for purposes of such testing whether treated as derivatives transactions or not. See “Borrowing Money and Issuing Senior Securities” and “Additional Information” below.

Delayed Delivery Transactions

Delayed delivery transactions, including when-issued transactions, are arrangements in which the Fund buys securities for a set price, with payment and delivery of the securities scheduled for a future time. During the period between purchase and settlement, no payment is made by the Fund to the issuer and no interest accrues to the Fund. The Fund records the transaction when it agrees to buy the securities and reflects their value in determining the price of its Shares. Settlement dates may be a month or more after entering into these transactions so that the market values of the securities bought may vary from the purchase prices. Therefore, delayed delivery transactions create interest rate risks for the Fund. Delayed delivery transactions also involve credit risks in the event of a counterparty default.

Investing in Securities of Other Investment Companies

The Fund may invest its assets in securities of other investment companies, including the securities of affiliated money market funds, as an efficient means of implementing its investment strategies, managing its uninvested cash and/or other investment reasons consistent with the Fund’s investment objective and investment strategies. These other investment companies are managed independently of the Fund and incur additional fees and/or expenses which would, therefore, be borne indirectly by the Fund in connection with any such investment. These investments also can create conflicts of interests for the Adviser to the Fund and the investment adviser to the acquired fund. For example, a conflict of interest can arise due to the possibility that the Adviser to the Fund could make a decision to redeem the Fund’s investment in the acquired fund. In the case of an investment in an affiliated fund, a conflict of interest can arise if, because of the Fund’s investment in the acquired fund, the acquired fund is able to garner more assets, thereby growing the acquired fund and increasing the management fees received by the investment adviser to the acquired fund, which would either be the Adviser or an affiliate of the Adviser. However, the Adviser believes that the benefits and efficiencies of making investments in other investment companies should outweigh the potential additional fees and/or expenses and resulting conflicts of interest.

Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies. The Fund intends to limit its investments in other investment companies, including private funds, to 10% or less. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1) subject to certain terms and conditions set forth in SEC rules. In order for a registered investment company to invest in shares of the Fund beyond the limitations of Section 12(d)(1), the registered investment company must enter into an agreement with the Fund.

Hedging

Hedging transactions are intended to reduce specific risks. For example, to protect the Fund against circumstances that would normally cause the Fund’s portfolio securities to decline in value, the Fund may buy or sell a derivative contract that would normally increase in value under the same circumstances. The Fund may also attempt to hedge by using combinations of different derivative contracts, or derivative contracts and securities. The Fund’s ability to hedge may be limited by the costs of the derivative contracts. The Fund may attempt to lower the cost of hedging by entering into transactions that provide only

limited protection, including transactions that: (1) hedge only a portion of its portfolio; (2) use derivative contracts that cover a narrow range of circumstances; or (3) involve the sale of derivative contracts with different terms. Consequently, hedging transactions will not eliminate risk even if they work as intended. In addition, hedging strategies are not always successful, and could result in increased expenses and losses to the Fund.

Investing in Exchange-Traded Funds

The Fund may invest in exchange-traded funds (ETFs) as an efficient means of carrying out its investment strategies. As with traditional mutual funds, ETFs charge asset-based fees, although these fees tend to be relatively low. ETFs are traded on stock exchanges or on the over-the-counter market. ETFs do not charge initial sales charges or redemption fees and investors pay only customary brokerage fees to buy and sell ETF shares.

INVESTMENT RATINGS FOR INVESTMENT-GRADE SECURITIES

The Adviser will determine whether a security is investment grade based upon the credit ratings given by one or more NRSROs. For example, Standard & Poor's, an NRSRO, assigns ratings to investment-grade securities (AAA, AA, A and BBB including modifiers, sub-categories and gradations) based on their assessment of the likelihood of the issuer's inability to pay interest or principal (default) when due on each security. Lower credit ratings correspond to higher credit risk. If a security has not received a rating, the Fund must rely entirely upon the Adviser's credit assessment that the security is comparable to investment grade. The presence of a ratings modifier, sub-category, or gradation (for example, a (+) or (-)) is intended to show relative standing within the major rating categories and does not affect the security credit rating for purposes of the Fund's investment parameters. If a security is downgraded below the minimum quality grade discussed above, the Adviser will reevaluate the security, but will not be required to sell it.

INVESTMENT RATINGS FOR NON-INVESTMENT-GRADE SECURITIES

Noninvestment-grade securities are rated below BBB- by an NRSRO. These bonds have greater economic, credit and liquidity risks than investment-grade securities.

Portfolio Turnover

The Fund actively trades its portfolio securities in an attempt to achieve its investment objective. Active trading will cause the Fund to have an increased portfolio turnover rate and increase the Fund's trading costs, which may have an adverse impact on the Fund's performance. An active trading strategy will likely result in the Fund generating more short-term capital gains or losses. Short-term gains are generally taxed at a higher rate than long-term gains. Any short-term losses are used first to offset short-term gains.

INTER-FUND BORROWING AND LENDING ARRANGEMENTS

Inter-Fund Borrowing

The Securities and Exchange Commission (SEC) has granted an exemption that permits the Fund and all other funds ("Federated Hermes funds") advised by subsidiaries of Federated Hermes, Inc. ("Federated Hermes," formerly, Federated Investors, Inc.) to lend and borrow money for certain temporary purposes directly to and from other Federated Hermes funds. Participation in this inter-fund lending program is voluntary for both borrowing and lending Federated Hermes funds, and an inter-fund loan is only made if it benefits each participating Federated Hermes fund. Federated Hermes administers the program according to procedures approved by the Fund's Board, and the Board monitors the operation of the program. Any inter-fund loan must comply with certain conditions set out in the exemption, which are designed to assure fairness and protect all participating Federated Hermes funds.

For example, inter-fund lending is permitted only: (a) to meet shareholder redemption requests; (b) to meet commitments arising from "failed" trades; and (c) for other temporary purposes. All inter-fund loans must be repaid in seven days or less. The Fund's participation in this program must be consistent with its investment policies and limitations, and must meet certain percentage tests. Inter-fund loans may be made only when the rate of interest to be charged is more attractive to the lending Federated Hermes fund than market-competitive rates on overnight repurchase agreements ("Repo Rate") and more attractive to the borrowing Federated Hermes fund than the rate of interest that would be charged by an unaffiliated bank for short-term borrowings ("Bank Loan Rate"), as determined by the Board. The interest rate imposed on inter-fund loans is the average of the Repo Rate and the Bank Loan Rate.

LIQUIDITY RISK MANAGEMENT PROGRAM

The Fund has adopted and implemented a written liquidity risk management program (LRMP) and related procedures to assess and manage the liquidity risk of the Fund in accordance with Section 22(e) of the 1940 Act and Rule 22e-4 thereunder. The Board has designated the Adviser, together with Federated Hermes, Inc.'s ("Federated Hermes," formerly, Federated Investors, Inc.) other affiliated registered investment advisory subsidiaries that serve as investment advisers to other Federated Hermes funds, to collectively serve as the administrator of the LRMP and the related procedures (the "Administrator"). Rule 22e-4 defines "liquidity risk" as the risk that the Fund will be unable to meet requests to redeem Shares issued by the Fund without significant dilution of the remaining investors' interests in the Fund. As a part of the LRMP, the Administrator is responsible for classifying the liquidity of the Fund's portfolio investments in accordance with Rule 22e-4. As part of the LRMP, the Administrator is also responsible for assessing, managing and periodically reviewing the Fund's liquidity risk, for making periodic reports to the Board and the SEC regarding the liquidity of the Fund's investments, and for notifying the Board and the SEC of certain liquidity events specified in Rule 22e-4. The liquidity of the Fund's portfolio investments is determined based on relevant market, trading and investment-specific considerations under the LRMP.

Investment Risks

There are many risk factors which may affect an investment in the Fund. The Fund's principal risks are described in its Prospectus. The following information is either additional information in respect of a principal risk factor referenced in the Prospectus or information in respect of a non-principal risk factor applicable to the Fund (in which case there is no related disclosure in the Prospectus).

EXCHANGE-TRADED FUNDS RISK

An investment in an exchange-traded fund (ETF) generally presents the same primary risks as an investment in a conventional fund (i.e., one that is not exchange-traded) that has the same investment objectives, strategies and policies. The price of an ETF can fluctuate up or down, and the Fund could lose money investing in an ETF if the prices of the securities owned by the ETF go down. In addition, ETFs may be subject to the following risks that do not apply to conventional funds: (i) the market price of an ETF's shares may trade above or below its net asset value; (ii) an active trading market for an ETF's shares may not develop or be maintained; or (iii) trading of an ETF's shares may be halted if the listing exchange's officials deem such action appropriate, the shares are delisted from the exchange or the activation of market-wide "circuit breakers" (which are tied to large decreases in stock prices) halts stock trading generally.

CREDIT RISK

Credit risk includes the possibility that a party to a transaction (such as a derivative contract) involving the Fund will fail to meet its obligations. This could cause the Fund to lose money or to lose the benefit of the transaction or prevent the Fund from selling or buying other securities to implement its investment strategy.

LIQUIDITY RISK

Trading opportunities are more limited for equity securities that are not widely held. This may make it more difficult to sell or buy a security at a favorable price or time. Consequently, the Fund may have to accept a lower price to sell a security, sell other securities to raise cash or give up an investment opportunity, any of which could have a negative effect on the Fund's performance. Infrequent trading of securities may also lead to an increase in their price volatility.

Liquidity risk also refers to the possibility that the Fund may not be able to sell a security or close out a derivative contract when it wants to. If this happens, the Fund will be required to continue to hold the security or keep the position open, and the Fund could incur losses.

OTC derivative contracts generally carry greater liquidity risk than exchange-traded contracts. This risk may be increased in times of financial stress, if the trading market for OTC derivative contracts becomes restricted.

LEVERAGE RISK

Leverage risk is created when an investment, which includes, for example, an investment in a derivative contract, exposes the Fund to a level of risk that exceeds the amount invested. Changes in the value of such an investment magnify the Fund's risk of loss and potential for gain. Investments can have these same results if their returns are based on a multiple of a specified index, security or other benchmark.

INTEREST RATE RISK

Prices of fixed-income securities rise and fall in response to changes in interest rates. Generally, when interest rates rise, prices of fixed-income securities fall. However, market factors, such as the demand for particular fixed-income securities, may cause the price of certain fixed-income securities to fall while the prices of other securities rise or remain unchanged.

The longer the duration of a fixed-income security, the more susceptible it is to interest rate risk. The duration of a fixed-income security may be equal to or shorter than the stated maturity of a fixed-income security. Recent and potential future changes in monetary policy made by central banks and/or their governments are likely to affect the level of interest rates. Duration measures the price sensitivity of a fixed-income security given a change in interest rates. For example, if a fixed-income security has an effective duration of three years, a 1% increase in general interest rates would be expected to cause the security's value to decline about 3%, while a 1% decrease in general interest rates would be expected to cause the security's value to increase about 3%.

CALL RISK

Call risk is the possibility that an issuer may redeem a fixed-income security before maturity (a "call") at a price below its current market price. An increase in the likelihood of a call may reduce the security's price.

If a fixed-income security is called, the Fund may have to reinvest the proceeds in other fixed-income securities with lower interest rates, higher credit risks, or other less favorable characteristics.

PREPAYMENT AND EXTENSION RISK

Unlike traditional fixed-income securities, which pay a fixed rate of interest until maturity (when the entire principal amount is due) payments on mortgage-backed securities include both interest and a partial payment of principal. Partial payment of principal may be comprised of scheduled principal payments as well as unscheduled payments from the voluntary prepayment, refinancing, or foreclosure of the underlying loans. These unscheduled prepayments of principal create risks that can adversely affect the Fund holding mortgage-backed securities.

For example, when interest rates decline, the values of mortgage-backed securities generally rise. However, when interest rates decline, unscheduled prepayments can be expected to accelerate, and the Fund would be required to reinvest the proceeds of the prepayments at the lower interest rates then available. Unscheduled prepayments would also limit the potential for capital appreciation on mortgage-backed securities.

Conversely, when interest rates rise, the values of mortgage-backed securities generally fall. Since rising interest rates typically result in decreased prepayments, this could lengthen the average lives of mortgage-backed securities, and cause their value to decline more than traditional fixed-income securities.

Generally, mortgage-backed securities compensate for the increased risk associated with prepayments by paying a higher yield. The additional interest paid for risk is measured by the difference between the yield of a mortgage-backed security and the yield of a U.S. Treasury security with a comparable maturity (the "spread"). An increase in the spread will cause the price of the mortgage-backed security to decline. Spreads generally increase in response to adverse economic or market conditions. Spreads may also increase if the security is perceived to have an increased prepayment risk or is perceived to have less market demand.

ASSET-BACKED SECURITIES (ABS) RISK

The value of asset-backed securities (ABS) may be affected by certain factors such as interest rate risk, the availability of information concerning the pool of underlying assets and its structure, the creditworthiness of the servicing agent for the pool or the originator of the underlying assets and the ability of the servicing agent to service the underlying collateral. Under certain market conditions, ABS may be less liquid and may be difficult to value. Movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain types of ABS. Unscheduled prepayments of ABS may result in a loss of income if the proceeds are invested in lower-yielding securities. Conversely, in a rising interest rate environment, a declining prepayment rate will extend the average life of many ABS, which increases the risk of depreciation due to future increases in market interest rates. ABS can also be subject to the risk of default on the underlying assets.

RISK RELATED TO INVESTING FOR VALUE

Due to their relatively low valuations, value stocks are typically less volatile than growth stocks. For instance, the price of a value stock may experience a smaller increase on a forecast of higher earnings, a positive fundamental development, or positive market development. Further, value stocks tend to have higher dividends than growth stocks. This means they depend less on price changes for returns and may lag behind growth stocks in an up market.

RISK OF FOREIGN INVESTING

Foreign securities pose additional risks because foreign economic or political conditions may be less favorable than those of the United States. Securities in foreign markets may also be subject to taxation policies that reduce returns for U.S. investors.

Foreign companies may not provide information (including financial statements) as frequently or to as great an extent as companies in the United States. Foreign companies may also receive less coverage than U.S. companies by market analysts and the financial press. In addition, foreign countries may lack uniform accounting, auditing and financial reporting standards or regulatory requirements comparable to those applicable to U.S. companies. These factors may prevent the Fund and its Adviser from obtaining information concerning foreign companies that is as frequent, extensive and reliable as the information available concerning companies in the United States.

Foreign countries may have restrictions on foreign ownership of securities or may impose exchange controls, capital flow restrictions or repatriation restrictions which could adversely affect the liquidity of the Fund's investments.

CURRENCY RISK

Exchange rates for currencies fluctuate daily. The combination of currency risk and market risks tends to make securities traded in foreign markets more volatile than securities traded exclusively in the United States. The Adviser attempts to manage currency risk by limiting the amount the Fund invests in securities denominated in a particular currency. However, diversification will not protect the Fund against a general increase in the value of the U.S. dollar relative to other currencies.

Investing in currencies or securities denominated in a foreign currency, entails risk of being exposed to a currency that may not fully reflect the strengths and weaknesses of the economy of the country or region utilizing the currency. Currency risk includes both the risk that currencies in which the Fund's investments are traded, or currencies in which the Fund has taken an active investment position, will decline in value relative to the U.S. dollar and, in the case of hedging positions, that the U.S. dollar will decline in value relative to the currency being hedged. In addition, it is possible that a currency (such as, for example, the euro) could be abandoned in the future by countries that have already adopted its use, and the effects of such an abandonment on the applicable country and the rest of the countries utilizing the currency are uncertain but could negatively affect the Fund's investments denominated in the currency. If a currency used by a country or countries is replaced by another currency, the Fund's Adviser would evaluate whether to continue to hold any investments denominated in such currency, or whether to purchase investments denominated in the currency that replaces such currency, at the time. Such investments may continue to be held, or purchased, to the extent consistent with the Fund's investment objective and permitted under applicable law.

Many countries rely heavily upon export-dependent businesses and any strength in the exchange rate between a currency and the U.S. dollar or other currencies can have either a positive or a negative effect upon corporate profits and the performance of investments in the country or region utilizing the currency. Adverse economic events within such country or region may increase the volatility of exchange rates against other currencies, subjecting the Fund's investments denominated in such country's or region's currency to additional risks. In addition, certain countries, particularly emerging market countries, may impose foreign currency exchange controls or other restrictions on the transferability, repatriation or convertibility of currency.

EUROPEAN UNION AND EUROZONE RELATED RISK

A number of countries in the European Union (EU), including certain countries within the EU that have adopted the euro (Eurozone), have experienced, and may continue to experience, severe economic and financial difficulties. Additional countries within the EU may also fall subject to such difficulties. These events could negatively affect the value and liquidity of the Fund's investments in euro-denominated securities and derivatives contracts, securities of issuers located in the EU or with significant exposure to EU issuers or countries. If the euro is dissolved entirely, the legal and contractual consequences for holders of euro-denominated obligations and derivative contracts would be determined by laws in effect at such time. Such investments may continue to be held, or purchased, to the extent consistent with the Fund's investment objective(s) and permitted under applicable law. These potential developments, or market perceptions concerning these and related issues, could adversely affect the value of the Shares.

Certain countries in the EU have had to accept assistance from supra-governmental agencies such as the International Monetary Fund, the European Stability Mechanism (the "ESM") or other supra-governmental agencies. The European Central Bank has also been intervening to purchase Eurozone debt in an attempt to stabilize markets and reduce borrowing costs. There can be no assurance that these agencies will continue to intervene or provide further assistance and markets may react adversely to any expected reduction in the financial support provided by these agencies. Responses to the financial problems by European governments, central banks and others including austerity measures and reforms, may not work, may result in social unrest and may limit future growth and economic recovery or have other unintended consequences.

In addition, one or more countries may withdraw from the EU, and one or more countries within the Eurozone may abandon the euro. The impact of these actions, especially if they occur in a disorderly fashion, could be significant and far-reaching. On January 31, 2020, the United Kingdom (UK) left the EU, commonly referred to as “Brexit,” and there commenced a transition period during which the EU and UK negotiated and agreed on the nature of their future relationship, with such agreements becoming effective on December 31, 2020. There is significant market uncertainty regarding Brexit’s ramifications, and the range and potential implications of possible political, regulatory, economic and market outcomes are difficult to predict. This long-term uncertainty may affect other countries in the EU and elsewhere and may cause volatility within the EU, triggering prolonged economic downturns in certain countries within the EU. In addition, Brexit may create additional and substantial economic stresses for the UK, including a contraction of the UK economy and price volatility in UK stocks, decreased trade, capital outflows, devaluation of the British pound, wider corporate bond spreads due to uncertainty and declines in business and consumer spending as well as foreign direct investment. Brexit may also adversely affect UK-based financial firms, including certain sub-advisers to the Federated Hermes Funds, that have counterparties in the EU or participate in market infrastructure (trading venues, clearinghouses, settlement facilities) based in the EU. These events and the resulting market volatility may have an adverse effect on the performance of the Fund.

RISK OF INVESTING IN EMERGING MARKET COUNTRIES

Securities issued or traded in emerging markets generally entail greater risks than securities issued or traded in developed markets. For example, their prices may be significantly more volatile than prices in developed countries. Emerging market economies may also experience more severe downturns (with corresponding currency devaluations) than developed economies.

Emerging market countries may have relatively unstable governments and may present the risk of nationalization of businesses, expropriation, confiscatory taxation or, in certain instances, reversion to closed market, centrally planned economies.

RISK OF INVESTING IN ADRS AND DOMESTICALLY TRADED SECURITIES OF FOREIGN ISSUERS

Because the Fund may invest in ADRs and other domestically traded securities of foreign companies, the Fund’s share price may be more affected by foreign economic and political conditions, taxation policies and accounting and auditing standards than would otherwise be the case. Foreign companies may not provide information as frequently or to as great an extent as companies in the United States. Foreign companies may also receive less coverage than U.S. companies by market analysts and the financial press. In addition, foreign companies may lack uniform accounting, auditing and financial reporting standards or regulatory requirements comparable to those applicable to U.S. companies. These factors may prevent the Fund and its Adviser from obtaining information concerning foreign companies that is as frequent, extensive and reliable as the information concerning companies in the United States.

RISK ASSOCIATED WITH NONINVESTMENT-GRADE SECURITIES

Securities rated below investment grade, also known as junk bonds, generally entail greater economic, credit and liquidity risks than investment-grade securities. For example, their prices are more volatile, economic downturns and financial setbacks may affect their prices more negatively, and their trading market may be more limited. These securities are considered speculative with respect to the issuer’s ability to pay interest and repay principal.

SHORT SELLING RISK

A short sale by the Fund involves borrowing securities from a lender which are then sold in the open market. At a future date, the securities are repurchased by the Fund and returned to the lender. While the securities are borrowed, the proceeds from the sale are deposited with the lender and the Fund pays interest to the lender. If the value of the securities declines between the time that the Fund borrows the securities and the time it repurchases and returns the securities to the lender, the Fund makes a profit on the difference (less any interest the Fund is required to pay the lender). Short selling involves risk. There is no assurance that securities will decline in value during the period of the short sale and make a profit for the Fund. Securities sold short may instead appreciate in value creating a loss for the Fund. The Fund also may experience difficulties repurchasing and returning the borrowed securities if a liquid market for the securities does not exist. The lender may also recall borrowed securities at any time. The lender from whom the Fund has borrowed securities may go bankrupt and the Fund may lose the collateral it has deposited with the lender. The Fund will adhere to controls and limits that are intended to offset these risks by short selling only liquid securities and by limiting the amount of exposure for short sales.

EXCHANGE-TRADED FUNDS RISK

An investment in an exchange-traded fund (ETF) generally presents the same primary risks as an investment in a conventional fund (i.e., one that is not exchange traded) that has the same investment objectives, strategies and policies. The price of an ETF can fluctuate up or down, and the Fund could lose money investing in an ETF if the prices of the securities owned by the ETF go down. In addition, ETFs may be subject to the following risks that do not apply to conventional funds: (i) the market price of an ETF's shares may trade above or below their net asset value; (ii) an active trading market for an ETF's shares may not develop or be maintained; or (iii) trading of an ETF's shares may be halted if the listing exchange's officials deem such action appropriate, the shares are delisted from the exchange or the activation of market-wide "circuit breakers" (which are tied to large decreases in stock prices) halts stock trading generally.

RISK OF INVESTING IN DERIVATIVE CONTRACTS AND HYBRID INSTRUMENTS

The Fund's exposure to derivative contracts and hybrid instruments (either directly or through its investment in another investment company) involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. First, changes in the value of the derivative contracts and hybrid instruments in which the Fund invests may not be correlated with changes in the value of the underlying Reference Instruments or, if they are correlated, may move in the opposite direction than originally anticipated. Second, while some strategies involving derivatives may reduce the risk of loss, they may also reduce potential gains or, in some cases, result in losses by offsetting favorable price movements in portfolio holdings. Third, there is a risk that derivative contracts and hybrid instruments may be erroneously priced or improperly valued and, as a result, the Fund may need to make increased cash payments to the counterparty. Fourth, exposure to derivative contracts and hybrid instruments may have tax consequences to the Fund and its shareholders. For example, derivative contracts and hybrid instruments may cause the Fund to realize increased ordinary income or short-term capital gains (which are treated as ordinary income for Federal income tax purposes) and, as a result, may increase taxable distributions to shareholders. In addition, under certain circumstances certain derivative contracts and hybrid instruments may cause the Fund to: (a) incur an excise tax on a portion of the income related to those contracts and instruments; and/or (b) reclassify, as a return of capital, some or all of the distributions previously made to shareholders during the fiscal year as dividend income. Fifth, a common provision in OTC derivative contracts permits the counterparty to terminate any such contract between it and the Fund, if the value of the Fund's total net assets declines below a specified level over a given time period. Factors that may contribute to such a decline (which usually must be substantial) include significant shareholder redemptions and/or a marked decrease in the market value of the Fund's investments. Any such termination of the Fund's OTC derivative contracts may adversely affect the Fund (for example, by increasing losses and/or costs, and/or preventing the Fund from fully implementing its investment strategies). Sixth, the Fund may use a derivative contract to benefit from a decline in the value of a Reference Instrument. If the value of the Reference Instrument declines during the term of the contract, the Fund makes a profit on the difference (less any payments the Fund is required to pay under the terms of the contract). Any such strategy involves risk. There is no assurance that the Reference Instrument will decline in value during the term of the contract and make a profit for the Fund. The Reference Instrument may instead appreciate in value creating a loss for the Fund. Seventh, a default or failure by a CCP or an FCM (also sometimes called a "futures broker"), or the failure of a contract to be transferred from an Executing Dealer to the FCM for clearing, may expose the Fund to losses, increase its costs, or prevent the Fund from entering or exiting derivative positions, accessing margin or fully implementing its investment strategies. The central clearing of a derivative and trading of a contract over a SEF could reduce the liquidity in, or increase costs of entering into or holding, any contracts. Finally, derivative contracts and hybrid instruments may also involve other risks described herein or in the Fund's prospectus, such as stock market, interest rate, credit, currency, liquidity and leverage risks.

RISK ASSOCIATED WITH THE INVESTMENT ACTIVITIES OF OTHER ACCOUNTS

Investment decisions for the Fund are made independently from those of other accounts managed by the Adviser and accounts managed by affiliates of the Adviser. Therefore, it is possible that investment-related actions taken by such other accounts could adversely impact the Fund with respect to, for example, the value of Fund portfolio holdings, and/or prices paid to or received by the Fund on its portfolio transactions, and/or the Fund's ability to obtain or dispose of portfolio securities. Related considerations are discussed elsewhere in this SAI under "Brokerage Transactions and Investment Allocation."

LARGE SHAREHOLDER RISK

A significant percentage of the Fund's shares may be owned or controlled by a large shareholder, such as other funds or accounts, including those of which the Adviser or an affiliate of the Adviser may have investment discretion. Accordingly, the Fund can be subject to the potential for large scale inflows and outflows as a result of purchases and redemptions made by significant shareholders. These inflows and outflows could be significant and, if frequently occurring, could negatively affect the Fund's net asset value and performance and could cause the Fund to buy or sell securities at inopportune times in order to

meet purchase or redemption requests. Investments in the Fund by other investment companies also can create conflicts of interests for the Adviser to the Fund and the investment adviser to the acquiring fund. For example, a conflict of interest can arise due to the possibility that the investment adviser to the acquiring fund could make a decision to redeem the acquiring fund's investment in the Fund. In the case of an investment by an affiliated fund, a conflict of interest can arise if, because of the acquiring fund's investment in the Fund, the Fund is able to garner more assets from third-party investors, thereby growing the Fund and increasing the management fees received by the Adviser, which could also be the investment adviser to the acquiring fund.

CYBERSECURITY AND OPERATIONAL RISK

Like other funds and business enterprises, Federated Hermes' business relies on the security and reliability of information and communications technology, systems and networks. Federated Hermes uses digital technology, including, for example, networked systems, email and the Internet, as well as mobile devices and "cloud"-based service offerings, to conduct business operations and engage clients, customers, employees, products, accounts, shareholders and relevant service providers, among others. Federated Hermes, as well as its funds and certain service providers, also generate, compile and process information for purposes of preparing and making filings or reports to governmental agencies, or providing reports or statements to customers, and a cybersecurity attack or incident that impacts that information, or the generation and filing processes, can prevent required regulatory filings and reports from being made, or reports or statements from being delivered, or cause the inadvertent release of confidential information (possibly resulting in the violation of applicable privacy laws). The use of the Internet and other electronic media and technology exposes the Fund, the Fund's shareholders, and the Fund's service providers, and their respective operations, to potential risks from cybersecurity attacks or incidents (collectively, "cyber-events"). The work-from-home environment necessitated by the novel coronavirus ("COVID-19") pandemic has increased the risk of cyber incidents given the increase in cyber attack surface stemming from the use of personal devices and non-office or personal technology.

Cyber-events can result from intentional (or deliberate) attacks or unintentional events by insiders (e.g., employees) or third parties, including cybercriminals, competitors, nation-states and "hacktivists," among others. Cyber-events can include, for example, phishing, credential harvesting or use of stolen access credentials, unauthorized access to systems, networks or devices (such as, for example, through "hacking" activity), structured query language attacks, infection from or spread of malware, ransomware, computer viruses or other malicious software code, corruption of data, exfiltration of data to malicious sites, the dark web or other locations or threat actors, and attacks (including, but not limited to, denial of service attacks on websites) which shut down, disable, slow, impair or otherwise disrupt operations, business processes, technology, connectivity or website or Internet access, functionality or performance. Like other funds and business enterprises, the Fund and its service providers have experienced, and will continue to experience, cyber-events on a daily basis. In addition to intentional cyber-events, unintentional cyber-events can occur, such as, for example, the inadvertent release of confidential information. Cyber-events can also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on the service providers' systems or websites rendering them unavailable to intended users or via "ransomware" that renders the systems inoperable until appropriate actions are taken. To date, cyber-events have not had a material adverse effect on the Fund's business operations or performance.

Cyber-events can affect, potentially in a material way, Federated Hermes' relationships with its customers, employees, products, accounts, shareholders and relevant service providers. Any cyber-event could adversely impact the Fund and its shareholders and cause the Fund to incur financial loss and expense, as well as face exposure to regulatory penalties, reputational damage, damage to employee perceptions of the company, and additional compliance costs associated with corrective measures and credit monitoring for impacted individuals. A cyber-event can cause the Fund, or its service providers, to lose proprietary information, suffer data corruption, lose operational capacity (such as, for example, the loss of the ability to process transactions, generate or make filings or deliver reports or statements, calculate the Fund's NAV, or allow shareholders to transact business or other disruptions to operations), and/or fail to comply with applicable privacy and other laws. Among other potentially harmful effects, cyber-events also can result in theft, unauthorized monitoring and failures in the physical infrastructure or operating systems that support the Fund and its service providers. In addition, cyber-events affecting issuers in which the Fund invests could cause the Fund's investments to lose value.

The Fund's Adviser and its relevant affiliates have established risk management systems reasonably designed to seek to reduce the risks associated with cyber-events. The Fund's Adviser employs various measures aimed at mitigating cybersecurity risk, including, among others, use of firewalls, system segmentation, system monitoring, virus scanning, periodic penetration testing, employee phishing training and an employee cybersecurity awareness campaign. Among other service provider management efforts, Federated Hermes also conducts due diligence on key service providers relating to cybersecurity. Federated Hermes has established a committee to oversee Federated Hermes' information security and data governance efforts, and updates on cyber-events and risks are reviewed with relevant committees, as well as Federated Hermes' and the Fund's Boards of Directors

or Trustees (or a committee thereof), on a periodic (generally quarterly) basis (and more frequently when circumstances warrant) as part of risk management oversight responsibilities. However, there is no guarantee that the efforts of Federated Hermes, the Fund's Adviser or its affiliates, or other service providers, will succeed, either entirely or partially as there are limits on Federated Hermes' and the Fund's ability to prevent, detect or mitigate cyber-events. Among other reasons, the cybersecurity landscape is constantly evolving, the nature of malicious cyber-events is becoming increasingly sophisticated and the Fund's Adviser, and its relevant affiliates, cannot control the cyber systems and cybersecurity systems of issuers or third-party service providers.

The Fund can be exposed to operational risk arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties, or other third parties, failed or inadequate processes and technology or system failures. In addition, other disruptive events, including, but not limited to, natural disasters and public health crises (such as the COVID-19 pandemic), can adversely affect the Fund's ability to conduct business, in particular if the Fund's employees or the employees of its service providers are unable or unwilling to perform their responsibilities as a result of any such event. Even if the Fund's employees and the employees of its service providers are able to work remotely, those remote work arrangements could result in the Fund's business operations being less efficient than under normal circumstances, could lead to delays in its processing of transactions, and could increase the risk of cyber-events.

Investment Objective (and Policies) and Investment Limitations

The Fund's investment objective is seeking long-term capital appreciation by investing primarily in common stocks of large-sized U.S. growth companies. The investment objective may be changed by the Fund's Board without shareholder approval.

INVESTMENT LIMITATIONS

Borrowing Money and Issuing Senior Securities

The Fund will not issue senior securities, except as permitted under the 1940 Act, the rules, regulations and interpretations thereunder, and any applicable exemptive relief. The Fund will not borrow money, except as permitted under the 1940 Act, the rules, regulations and interpretations thereunder, and any applicable exemptive relief.

Diversification

The Fund is a "non-diversified" investment company, as defined in the 1940 Act, which means that it is permitted to invest its assets in a more limited number of issuers than "diversified" investment companies. A diversified company may not, with respect to 75% of its total assets, invest more than 5% of its total assets in the securities of any one issuer and may not own more than 10% of the outstanding voting securities of any one issuer.

Investing in Commodities

The Fund will not purchase or sell physical commodities, except to the extent acquired as a result of ownership of securities or other instruments or enforcement of rights thereunder or permitted under the 1940 Act, the rules, regulations and interpretations thereunder, and any applicable exemptive relief. This limitation does not prevent the Fund from purchasing or selling options and futures contracts, from purchasing securities of companies that deal in commodities or from investing in securities or other instruments backed by physical commodities.

Underwriting

The Fund will not underwrite securities issued by other persons, except to the extent permitted under the 1940 Act, the rules, regulations and interpretations thereunder, and any applicable exemptive relief.

Lending

The Fund will not lend any security or make any other loan except as permitted under the 1940 Act, the rules, regulations and interpretations thereunder, and any applicable exemptive relief. This limitation does not apply to purchases of debt obligations or securities, to the lending of assets to broker-dealers or institutional investors, to repurchase agreements, or to acquisitions of loans, loan participations, assignments of loans or participations, or other forms of debt instruments permissible under the Fund's investment policies.

Concentration

The Fund will not concentrate its investments (i.e., hold more than 25% of its total assets) in any industry or group of related industries. For purposes of this limitation, securities of the U.S. government (including its agencies and instrumentalities), investment companies, repurchase agreements collateralized by U.S. government securities, bank instruments, and tax-exempt (or municipal) securities of state or municipal governments and their political subdivisions are not considered to be issued by members of any industry.

Investing in Real Estate

The Fund will not purchase or sell real estate, except to the extent acquired as a result of ownership of securities or other instruments or enforcement of rights thereunder or permitted under the 1940 Act, the rules, regulations and interpretations thereunder, and any applicable exemptive relief. This limitation does not prevent the Fund from investing in securities or other instruments secured or backed by real estate or interests therein, real estate investment trusts or securities of companies engaged in transactions in real estate, or interests therein, or the real estate business.

The above limitations are fundamental and cannot be changed unless authorized by the Board and by the “vote of a majority of the Fund’s outstanding voting securities,” as defined by the 1940 Act, which means the lesser of (a) 67% of the shares of the Fund present or represented by proxy at a meeting if the holders of more than 50% of the outstanding shares are present or represented at the meeting or (b) more than 50% of outstanding shares of the Fund. The following limitations, however, may be changed by the Board without shareholder approval. Shareholders will be notified before any material change in these limitations becomes effective.

Additional Information

As a matter of non-fundamental investment policy regarding certain of the Fund’s investment restrictions, please note the following additional information.

For purposes of the above limitations, the Fund considers certificates of deposit and demand and time deposits issued by a U.S. branch of a domestic bank or savings association having capital, surplus and undivided profits in excess of \$100,000,000 at the time of investment to be “cash items and “bank instruments.”

Except with respect to borrowing money, if a percentage limitation is adhered to at the time of investment, a later increase or decrease in percentage resulting from any change in value or net assets will not result in a violation of such limitation.

“Senior securities” are defined as fund obligations that have a priority over the fund’s shares with respect to the payment of dividends or the distribution of fund assets. The 1940 Act prohibits a fund from issuing any class of senior securities or selling any senior securities of which it is the issuer, except that the Fund is permitted to borrow from a bank, subject to certain limitations. In applying the borrowing limitation, in accordance with Section 18(f)(1) of the 1940 Act and current SEC rules and guidance, the Fund is permitted to borrow money, directly or indirectly, provided that immediately after any such borrowing, the Fund has asset coverage of at least 300% for all of the Fund’s borrowings.

Under the federal securities and commodities laws, certain financial instruments such as futures contracts and options thereon, including currency futures, stock index futures or interest rate futures, and certain swaps, including currency swaps, interest rate swaps, swaps on broad-based securities indices, and certain credit default swaps, may, under certain circumstances, also be considered to be commodities. Nevertheless, the 1940 Act does not prohibit investments in physical commodities or contracts related to physical commodities. The Fund is permitted to invest in futures contracts and related options on these and other types of commodity contracts for hedging purposes, to implement tax or cash management strategies, or to enhance returns.

In applying the Fund’s underwriting restriction, the Fund may engage in the business of underwriting securities issued by others to the extent that the Fund may be deemed to be an underwriter in connection with the disposition of portfolio securities.

Although the 1940 Act does not prohibit a fund from making loans, SEC staff interpretations currently prohibit funds from lending more than one-third of their total assets, except through the purchase of debt obligations or the use of repurchase agreements. The Fund is also authorized to lend portfolio securities under the conditions and restrictions described in the Fund’s Prospectus and/or SAI.

In applying the concentration restriction, the Fund will adhere to the requirements of the 1940 Act which limits investments in a particular industry or group of industries to no more than 25% of the value of the Fund’s total assets. Further, in applying the Fund’s concentration restriction: (a) utility companies will be divided according to their services, for example, gas, gas transmission, electric and telephone will each be considered a separate industry; (b) financial service companies will be classified according to the end users of their services, for example, automobile finance, bank finance and diversified finance will each be considered a separate industry; and (c) asset-backed securities will be classified according to the underlying assets securing such securities. To conform to the current view of the SEC staff that only domestic deposit instruments may be excluded from industry concentration limitations, as a matter of non-fundamental policy, the Fund will not exclude foreign bank instruments from industry concentration limitation tests as long as the policy of the SEC remains in effect. In addition, investments in bank instruments, and investments in certain industrial development bonds funded by activities in a single industry, will be deemed to constitute investment in an industry, except when held for temporary defensive purposes. Private activity municipal debt securities whose principal and interest payments are derived principally from the assets and revenues of a nongovernmental entity will be deemed to constitute investment in an industry. The Fund will consider the investments of underlying investment companies when determining compliance with its own concentration policy to the extent that the Fund has sufficient information about such investments.

Investing in Securities of Other Investment Companies

The Fund is prohibited from investing in other registered investment companies in reliance on Section 12(d)(1)(F) or (G) of the 1940 Act.

NON-FUNDAMENTAL NAMES RULE POLICY

The Fund will invest its assets so that at least 80% of its net assets (plus any borrowings for investment purposes) are invested in a mix of large-cap and growth investments. For purposes of this policy, large-cap investments will be defined as companies with market capitalizations within the range of companies in the Russell 1000[®] Growth Index, and growth investments will be defined as companies with growth characteristics that meet the applicable parameters for inclusion in the Russell 1000[®] Growth Index. The Fund will notify shareholders at least 60 days in advance of any change in its investment policies to normally invest less than 80% of its net assets (plus any borrowings for investment purposes) in a mix of large-cap and growth investments.

CONTINUOUS OFFERING

The method by which Creation Units of shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of shares are issued and sold by a Fund on an ongoing basis, at any point a “distribution,” as such term is used in the Securities Act, may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Fund’s Distributor, breaks them down into constituent shares, and sells such shares directly to customers, or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in shares, whether or not participating in the distribution of shares, generally are required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act.

What Do Shares Cost?

Because the Fund is an exchange-traded fund, individual Fund Shares may only be purchased and sold on a national securities exchange through a broker-dealer and may not be purchased or redeemed directly with the Fund. When buying on or through the exchange, the price of Fund Shares is based on a market price, which may be more or less than the Fund’s net asset value. The Fund only sells and redeems Shares at net asset value with Authorized Participants (defined below) in Creation Units.

DETERMINING NET ASSET VALUE

A Share’s net asset value (NAV) is determined as of the end of regular trading on the New York Stock Exchange (NYSE) (normally 4:00 p.m. Eastern time) each day the NYSE is open. The Fund calculates the NAV of the Fund by valuing the Fund’s assets, subtracting the Fund’s liabilities and dividing the balance by the number of Fund Shares outstanding. The NAV is calculated to the nearest whole cent per Share.

In calculating its NAV, the Fund generally values investments as follows:

- Equity securities listed on a U.S. securities exchange or traded through the U.S. national market system are valued at their last reported sale price or official closing price in their principal exchange or market. If a price is not readily available, such equity securities are valued based upon the mean of closing bid and ask quotations from one or more dealers.
- Other equity securities traded primarily in the United States are valued based upon the mean of closing bid and ask quotations from one or more dealers.
- Equity securities traded primarily through securities exchanges and regulated market systems outside the United States are valued at their last reported sale price or official closing price in their principal exchange or market. These prices may be adjusted for significant events occurring after the closing of such exchanges or market systems as described below. If a price is not readily available, such equity securities are valued based upon the mean of closing bid and ask quotations from one or more dealers.
- Fixed-income securities are fair valued using price evaluations provided by a pricing service approved by the Adviser. The methods used by pricing services to determine such price evaluations are described below.

- Futures contracts listed on exchanges are valued at their reported settlement price. Option contracts listed on exchanges are valued based upon the mean of closing bid and ask quotations reported by the exchange or from one or more futures commission merchants.
- OTC derivative contracts are fair valued using price evaluations provided by a pricing service approved by the Adviser. The methods used by pricing services to determine such price evaluations are described below. If a price evaluation from a pricing service is not readily available, such derivative contracts may be fair valued based upon price evaluations from one or more dealers or using a recognized pricing model for the contract.
- Shares of other mutual funds or nonexchange-traded investment companies are valued based upon their reported NAVs. The prospectuses for these mutual funds explain the circumstances under which they will use fair value pricing and the effects of using fair value pricing.

If any price, quotation, price evaluation or other pricing source is not readily available when the NAV is calculated, if the Fund cannot obtain price evaluations from a pricing service or from more than one dealer for an investment within a reasonable period of time as set forth in the Adviser's valuation policies and procedures, or if information furnished by a pricing service, in the opinion of the Valuation Committee, is deemed not representative of the fair value of such security, the Fund will use the fair value of the investment determined in accordance with the procedures described below. There can be no assurance that the Fund could purchase or sell an investment at the price used to calculate the Fund's NAV. The Fund will not use a pricing service or dealer who is an affiliated person of the Adviser to value investments.

Noninvestment assets and liabilities are valued in accordance with U.S. Generally Accepted Accounting Principles (GAAP). The NAV calculation includes expenses, dividend income, interest income, other income and realized and unrealized investment gains and losses through the date of the calculation. Changes in holdings of investments and in the number of outstanding Shares are included in the calculation not later than the first business day following such change. Any assets or liabilities denominated in foreign currencies are converted into U.S. dollars using an exchange rate obtained from a third party.

The Fund follows procedures that are common in the mutual fund industry regarding errors made in the calculation of its NAV. This means that, generally, the Fund will not correct errors of less than one cent per Share.

Fair Valuation and Significant Events Procedures

Pursuant to Rule 2a-5 under the Investment Company Act of 1940, as amended, the Board has designated the Adviser as the Fund's valuation designee to perform the fair value determination for securities and other assets held by the Fund. The Adviser, acting through its "Valuation Committee," is responsible for determining the fair value of investments for which market quotations are not readily available. The Valuation Committee is comprised of officers of the Adviser and certain of the Adviser's affiliated companies and determines fair value and oversees the calculation of the NAV. The Valuation Committee is also authorized to use pricing services to provide price evaluations of the current fair value of certain investments for purposes of calculating the NAV. The Valuation Committee is subject to Board oversight and certain reporting and other requirements intended to provide the Board the information it needs to oversee the Adviser's fair value determinations.

Pricing Service Valuations. The Valuation Committee, subject to Board oversight, is authorized to use pricing services that provide daily fair value evaluations of the current value of certain investments, primarily fixed-income securities and OTC derivatives contracts. Different pricing services may provide different price evaluations for the same security because of differences in their methods of evaluating market values. Factors considered by pricing services in evaluating an investment include the yields or prices of investments of comparable quality, coupon, maturity, call rights and other potential prepayments, terms and type, reported transactions, indications as to values from dealers and general market conditions. A pricing service may find it more difficult to apply these and other factors to relatively illiquid or volatile investments, which may result in less frequent or more significant changes in the price evaluations of these investments. If a pricing service determines that it does not have sufficient information to use its standard methodology, it may evaluate an investment based on the present value of what investors can reasonably expect to receive from the issuer's operations or liquidation.

Special valuation considerations may apply with respect to the Fund's "odd-lot" positions, if any, as the Fund may receive lower prices when it sells such positions than it would receive for sales of institutional round lot positions. Typically, these securities are valued assuming orderly transactions of institutional round lot sizes, but the Fund may hold or, from time to time, transact in such securities in smaller, odd lot sizes.

The Valuation Committee oversees the Fund's pricing services, which includes, among other things, monitoring significant or unusual price fluctuations above predetermined tolerance levels from the prior day, back-testing of pricing services' prices against actual sale transactions, conducting periodic due diligence meetings and reviews, and periodically reviewing the inputs, assumptions and methodologies used by these pricing services. If information furnished by a pricing service is not readily available or, in the opinion of the Valuation Committee, is deemed not representative of the fair value of such security, the security will be fair valued by the Valuation Committee in accordance with procedures established by the Adviser as discussed below in "Fair Valuation Procedures."

Some pricing services provide a single price evaluation reflecting the bid-side of the market for an investment (a "bid" evaluation). Other pricing services offer both bid evaluations and price evaluations indicative of a price between the bid and ask prices for the investment (a "mid" evaluation). The Fund normally uses bid evaluations for all fixed-income securities. The Fund normally uses mid evaluations for OTC derivative contracts.

Fair Valuation Procedures. The Adviser has established procedures for determining the fair value of investments for which price evaluations from pricing services or dealers and market quotations are not readily available. The procedures define an investment's "fair value" as the price that the Fund might reasonably expect to receive upon its current sale. The procedures assume that any sale would be made to a willing buyer in the ordinary course of trading. The procedures require consideration of factors that vary based on the type of investment and the information available. Factors that may be considered in determining an investment's fair value include: (1) the last reported price at which the investment was traded; (2) information provided by dealers or investment analysts regarding the investment or the issuer; (3) changes in financial conditions and business prospects disclosed in the issuer's financial statements and other reports; (4) publicly announced transactions (such as tender offers and mergers) involving the issuer; (5) comparisons to other investments or to financial indices that are correlated to the investment; (6) with respect to fixed-income investments, changes in market yields and spreads; (7) with respect to investments that have been suspended from trading, the circumstances leading to the suspension; and (8) other factors that might affect the investment's value.

The Valuation Committee is responsible for the day-to-day implementation of these procedures subject to the oversight of the Board. The Valuation Committee may also authorize the use of a financial valuation model to determine the fair value of a specific type of investment. The Board periodically reviews the fair valuations made by the Valuation Committee. The Board has also approved the Adviser's fair valuation procedures and significant events procedures as part of the Fund's compliance program and will review any changes made to the procedures.

Using fair value to price investments may result in a value that is different from an investment's most recent closing price and from the prices used by other registered funds to calculate their NAVs. The application of the fair value procedures to an investment represents a good faith determination of such investment's fair value. There can be no assurance that the Fund could obtain the fair value assigned to an investment if it sold the investment at approximately the time at which the Fund determines its NAV per share, and the actual value could be materially different.

Significant Events. The Adviser has adopted procedures requiring an investment to be priced at its fair value whenever the Adviser determines that a significant event affecting the value of the investment has occurred between the time as of which the price of the investment would otherwise be determined and the time as of which the NAV is computed. An event is considered significant if there is both an affirmative expectation that the investment's value will change in response to the event and a reasonable basis for quantifying the resulting change in value. Examples of significant events that may occur after the close of the principal market on which a security is traded, or after the time of a price evaluation provided by a pricing service or a dealer, include:

- Political or other developments affecting the economy or markets in which an issuer conducts its operations or its securities are traded; and
- Announcements concerning matters such as acquisitions, recapitalizations or litigation developments, or a natural disaster affecting the issuer's operations or regulatory changes or market developments affecting the issuer's industry.

The fair valuation of securities following a significant event can serve to reduce arbitrage opportunities for short-term traders to profit at the expense of long-term investors in the Fund. For example, such arbitrage opportunities may exist when the market on which portfolio securities are traded closes before the Fund calculates its NAV, which is typically the case with Asian and European markets. However, there is no assurance that these significant event procedures will prevent dilution of the NAV by short-term traders.

For other significant events, the Fund may seek to obtain more current quotations or price evaluations from alternative pricing sources. If a reliable alternative pricing source is not available, the fair value of the investment is determined using the methods discussed above in "Fair Valuation Procedures." The Board periodically reviews fair valuations made in response to significant events.

How is the Fund Bought and Sold?

Under the Distributor's Contract with the Fund, the Distributor ("Federated Securities Corp.") offers Shares on a continuous, best-efforts basis.

CREATION AND REDEMPTION OF CREATION UNITS

The Trust issues and redeems Shares of the Fund only in Creation Units on a continuous basis through the Distributor, without a sales load but subject to the transaction fees described below, at the NAV next determined after receipt, on any Business Day (as defined below), of an order in proper form. A "Business Day," as used herein, is any day on which the New York Stock Exchange (NYSE) is open for business. As of the date of this SAI, the NYSE observes the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

Currently, the number of Shares that constitutes a Creation Unit is 15,000 Shares. The Board, or the Adviser pursuant to delegated authority from the Board, may change the number of Shares constituting a Creation Unit. In addition, the Board reserves the right to declare a split or a consolidation in the number of Shares outstanding of the Fund, including in the event that the per share price in the secondary market rises (or declines) to an amount that falls outside the range deemed desirable by the Board.

Creation Units may be purchased and redeemed only by or through a clearing agency that has entered into an Authorized Participant Agreement with the Distributor (an "Authorized Participant"). Such Authorized Participant will agree, pursuant to the terms of such Authorized Participant Agreement and on behalf of itself or any investor on whose behalf it will act, to certain conditions. Investors who are not Authorized Participants must make appropriate arrangements with an Authorized Participant to purchase or redeem Creation Units. Investors should be aware that their particular broker may not be an Authorized Participant and that Creation Unit orders may have to be placed by the investor's broker through an Authorized Participant, which may result in additional charges to such investor. A list of current Authorized Participants may be obtained from the Distributor.

Investors who are not Authorized Participants may purchase and sell Shares of the Fund in any amount on the secondary market.

Because the portfolio securities of the Fund may trade on days that the Exchange is closed or are otherwise not Business Days for the Fund, shareholders may not be able to transact in Shares of the Fund on days when the NAV of the Fund could be significantly affected by events in the relevant non-U.S. markets.

Purchases of Creation Units

The consideration for the purchase of Creation Units of the Fund consists of an in-kind deposit of a designated portfolio of securities (or cash for all or any portion of such securities ("Deposit Cash")) (collectively, the "Deposit Securities") and the Cash Component, which is an amount equal to the difference between the aggregate NAV of a Creation Unit and the Deposit Securities. Together, the Deposit Securities and the Cash Component constitute the "Fund Deposit."

The Custodian or the Administrator expects to make available through the National Securities Clearing Corporation (NSCC) on each Business Day, prior to the opening of regular trading on the Exchange, the list of names and the required number of Shares of each Deposit Security and Deposit Cash, as applicable, and the estimated amount of the Cash Component to be included in the current Fund Deposit for that Business Day. The identity and number of Shares of the Deposit Securities may change pursuant to, among other matters, changes in the composition of the Fund's portfolio and as rebalancing adjustments and corporate action events are reflected from time to time and when Custom Baskets (defined below) are used. Cash purchases of Creation Units will be effected in essentially the same manner as in-kind purchases. The Authorized Participant will pay the cash equivalent of the Deposit Securities as Deposit Cash plus or minus the same Cash Component.

The means by which the Deposit Securities and Cash Component are to be delivered by the Authorized Participant to the Fund are set forth in the Authorized Participant Agreement, except to the extent the Distributor and the Authorized Participant otherwise agree. Fund Shares will be settled through the DTC system.

Placement of Purchase Orders

To initiate an order for a Creation Unit, an Authorized Participant must submit to the Distributor an irrevocable order in proper form to purchase Shares of the Fund on a Business Day generally before the time as of which that day's NAV is calculated. For a purchase order to be processed based on the NAV calculated on a particular Business Day, the purchase order must be received in proper form and accepted by the Trust prior to the time as of which the applicable NAV is calculated and the order window, as

established for the Fund, is closed (“Cutoff Time”). Investors who are not Authorized Participants and seek to place a purchase order for a Creation Unit through an Authorized Participant should allow sufficient time to permit proper submission of the purchase order to the Distributor by the Cutoff Time on such Business Day. Custom Orders must be received in proper form and accepted by the Trust at least two hours prior to Cutoff Time.

The Authorized Participant Agreement sets forth the different methods whereby Authorized Participants can submit purchase orders. A purchase order is considered to be in “proper form” if a request in a form satisfactory to the Fund is (1) received by the Distributor from an Authorized Participant on behalf of itself or another person within the time period set above, and (2) all the procedures and other requirements applicable to the method used by the Authorized Participant to submit the purchase order, such as, in the case of purchase orders submitted through the applicable order portal, the completion of all required fields, and otherwise set forth in the Authorized Participant Agreement are properly followed.

Creation Unit orders must be transmitted by an Authorized Participant through the applicable order portal, by telephone or other transmission method acceptable to the Distributor. Economic or market disruptions or changes, or telephone or other communication failure, may impede transmissions between the Distributor and an Authorized Participant. Orders to create Shares of the Fund that are submitted on the Business Day immediately preceding a holiday or a day (other than a weekend) when the securities markets in a foreign market in which the Fund may invest are closed may not be accepted or may be charged the maximum transaction fee. A Purchase order, if accepted by the Trust, will be processed based on the NAV as of the next Cutoff Time.

Acceptance of Orders for and Issuance of Creation Units

All questions as to whether an order has been submitted in proper form and the number of Shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Fund and the Fund’s determination shall be final and binding.

The Fund reserves the right to reject or revoke acceptance of a creation order for any reason, provided that such action does not result in a suspension of sales of creation units in contravention of Rule 6c-11 and the SEC’s positions thereunder. For example, the Fund may reject or revoke acceptance of a creation order, including, but not limited to, when (i) the order is not in proper form; (ii) the investor(s), upon obtaining the Shares ordered, would own 80% or more of the currently outstanding Shares of the Fund; (iii) the Deposit Securities delivered do not conform to the identity and number of Shares specified; (iv) acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; or (v) circumstances outside the control of the Fund, the Distributor and Federated Hermes make it impracticable to process purchase orders. The Distributor shall notify a prospective purchaser of a Creation Unit and/or the Authorized Participant acting on behalf of such purchaser of the rejection or revocation of acceptance of such order. The Fund, the Custodian, any subcustodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits nor shall any of them incur any liability for failure to give such notification.

Except as provided in the following paragraph, a Creation Unit will not be issued until the transfer of good title to the Fund of the Deposit Securities and the payment of the Cash Component, Deposit Cash and creation transaction fees have been completed. In this regard, the Custodian will require, prior to the issuance of a Creation Unit, that any sub-custodian confirm to the Custodian that the Deposit Securities have been delivered to the account of the Fund at the sub-custodian(s). If the Fund does not receive the foregoing by the time specified the Creation Unit may not be delivered or the purchase order may ultimately be rejected.

The Fund may issue Creation Units to an Authorized Participant, notwithstanding the fact that all Deposit Securities have not been received, in reliance on the undertaking of the Authorized Participant to deliver the missing Deposit Securities as soon as possible, which undertaking shall be secured by such Authorized Participant’s delivery and maintenance of collateral having a value of up to 105% of the value of the missing Deposit Securities. The only collateral that is acceptable is cash in U.S. dollars. Such cash collateral must be delivered no later than 2:00 p.m., Eastern Time on the contractual settlement date of the Creation Unit(s). The Fund may buy the missing Deposit Securities at any time, and the Authorized Participant will be liable for any shortfall between the cost to the Fund of purchasing such securities and the cash collateral. In addition, the cash collateral may be invested at the risk of the Authorized Participant, and any income on invested cash collateral will be paid to that Authorized Participant. Information concerning the Fund’s current procedures for collateralization of missing Deposit Securities is available from the Distributor.

In certain cases, an Authorized Participant may create and redeem Creation Units on the same trade date. In these instances, the Fund reserves the right to settle these transactions on a net basis or require a representation from the Authorized Participant that the creation and redemption transactions are for separate Beneficial Owners.

Once the Fund has accepted a purchase order, upon the next determination of the NAV of the Shares, the Fund may confirm the issuance of a Creation Unit, against receipt of payment, at such NAV. The Distributor will then transmit a confirmation of acceptance to the Authorized Participant that placed the order. Creation Units typically are settled on a “T+1 basis” (i.e., one Business Day after trade date), subject to certain exceptions. However, the Fund reserves the right to settle Creation Unit transactions on a basis other than T+1, including in order to accommodate non-U.S. market holiday schedules, closures and settlement cycles, and to account for different treatment among non-U.S. and U.S. markets of dividend record dates and ex-dividend dates.

Creation Transaction Fees

A standard creation transaction fee is imposed to offset transfer and other costs associated with the issuance of Creation Units. The standard creation transaction fee is charged to the Authorized Participant on the day such Authorized Participant creates a Creation Unit, and is the same regardless of the number of Creation Units purchased by the Authorized Participant on the applicable Business Day.

The Authorized Participant may also be required to pay a variable transaction fee (up to the maximum amount shown in the table below) to cover certain brokerage, tax, foreign exchange, execution, market impact and other costs and expenses. Authorized Participants will also bear the costs of transferring the Deposit Securities, including any stamp duty or other similar fees and expenses. Investors who use the services of a broker or other financial intermediary may be charged a fee for such services.

The standard creation transaction fee and maximum variable transaction fee for a Creation Unit are set forth below:

Fund	Standard Transaction Fee	Maximum Variable Transaction Fee*
Federated Hermes MDT Large Cap Growth ETF	\$450	2%

* As a percentage of the Creation Unit(s) purchased.

The Adviser may adjust the transactions fees from time to time based on actual experience.

To the extent that the Adviser, on behalf of the Fund, may need to convert subscriptions that are made in whole or in part in cash into a foreign currency prior to purchasing investments denominated in foreign currencies at the applicable exchange rate and subject to the applicable spread, Creation Unit purchasers bear the risk associated with changes in the currency exchange rate and security value between the time they place their order and the time that the Fund converts any cash received into foreign investments.

Redemptions of Creation Units

The consideration paid by the Fund for the redemption of Creation Units consists of an in-kind basket of a designated portfolio of securities (or cash for all or any portion of such securities (“Redemption Cash”)) (collectively, the “Fund Securities”) and the Cash Component, which is an amount equal to the difference between the aggregate NAV of a Creation Unit and the Fund Securities. Together, the Fund Securities and the Cash Component constitute the “Fund Redemption.” Redemptions of Shares for Fund Securities will be subject to compliance with applicable U.S. federal and state securities laws and the Fund (whether or not it otherwise permits cash redemptions) reserves the right to redeem Creation Units for cash to the extent that the Fund cannot lawfully deliver specific Fund Securities upon redemptions or cannot do so without first registering the Fund Security under such laws.

The composition of the Fund Securities may not be the same as the Deposit Securities. In addition, the identity and number of Shares of the Fund Securities may change pursuant to, among other matters, changes in the composition of the Fund’s portfolio and as rebalancing adjustments and corporate action events are reflected from time to time and when Custom Baskets (defined below) are used. Cash redemptions of Creation Units will be effected in essentially the same manner as in-kind redemptions. The Authorized Participant will receive the cash equivalent of the Fund Securities as Redemption Cash plus or minus the same Cash Component.

The means by which the Fund Securities and Cash Component are to be delivered to the Authorized Participant by the Fund are set forth in the Authorized Participant Agreement, except to the extent the Distributor and the Authorized Participant otherwise agree. The delivery of Fund Shares will be settled through the DTC system.

Placement of Redemption Orders

To initiate a redemption order for a Creation Unit, an Authorized Participant must submit to the Distributor an irrevocable order in proper form to redeem Shares of the Fund on a Business Day generally before the time as of which that day's NAV is calculated. For a redemption order to be processed based on the NAV calculated on a particular Business Day, the order must be received in proper form and accepted by the Trust prior to the Cutoff Time. Investors who are not Authorized Participants and seek to place a redemption order for a Creation Unit through an Authorized Participant should allow sufficient time to permit proper submission of the redemption order to the Distributor by the Cutoff Time on such Business Day. Custom Orders must be received in proper form and accepted by the Trust at least two hours prior to Cutoff Time.

The Authorized Participant Agreement sets forth the different methods whereby Authorized Participants can submit redemption orders. A redemption request is considered to be in "proper form" if a request in a form satisfactory to the Fund is (1) received by the Distributor from an Authorized Participant on behalf of itself or another person within the time period set above, and (2) all the procedures and other requirements applicable to the method used by the Authorized Participant to submit the redemption order, such as, in the case of redemption orders submitted through the applicable order portal, the completion of all required fields, and otherwise set forth in the Authorized Participant Agreement are properly followed.

Creation Unit orders must be transmitted by an Authorized Participant through the applicable order portal, by telephone or other transmission method acceptable to the Distributor. Economic or market disruptions or changes, or telephone or other communication failure, may impede transmissions between the Distributor and an Authorized Participant. Orders to redeem Shares of the Fund that are submitted on the Business Day immediately preceding a holiday or a day (other than a weekend) when the securities markets in a foreign market in which the Fund may invest are closed may be charged the maximum transaction fee. A redemption request, if accepted by the Trust, will be processed based on the NAV as of the next Cutoff Time.

Acceptance of Orders for and Redemption of Creation Units

All questions as to whether an order has been submitted in proper form and the requisite number of Fund Shares and transaction fees have been delivered shall be determined by the Fund and the Fund's determination shall be final and binding.

The Fund reserves the absolute right to reject a redemption order if the order is not in proper form. In addition, the right of redemption may be suspended or the date of payment postponed with respect to the Fund (i) for any period during which the NYSE is closed (other than customary weekend and holiday closings), (ii) for any period during which trading on the NYSE is suspended or restricted, (iii) for any period during which an emergency exists as a result of which disposal of the Shares of the Fund's portfolio securities or determination of its NAV is not reasonably practicable; or (iv) in such other circumstance as is permitted by the SEC. The Fund or Distributor will normally notify the Authorized Participant of such rejection, but neither shall be liable for any failure to give such notification.

Except as provided in the following paragraph, the payment by the Fund of the Fund Securities, including Redemption Cash, and Cash Component will not be issued until the transfer of the Creation Unit(s) and the applicable redemption transaction fees have been completed. If the Transfer Agent does not receive the redeeming investor's Shares through DTC's facilities and the applicable redemption transaction fees by the required time, the redemption request may be rejected. Further, a redeeming Beneficial Owner or Authorized Participant acting on behalf of such Beneficial Owner must maintain appropriate security arrangements with a qualified broker-dealer, bank or other custody providers in each jurisdiction where Fund Securities are customarily traded and will be delivered. If neither the redeeming Beneficial Owner nor the Authorized Participant acting on behalf of such redeeming Beneficial Owner has appropriate arrangements to take delivery of Fund Securities in the applicable non-U.S. jurisdiction, and it is not possible to make such arrangements, or if it is not possible to effect deliveries of Fund Securities in such jurisdiction, the Trust in its sole discretion may determine to redeem Shares in Redemption Cash, and the redeeming Beneficial Owner will be required to receive its redemption proceeds as Redemption Cash.

To the extent contemplated by the Participant Agreement, in the event the Authorized Participant has submitted a redemption request in proper form but is unable to transfer all or part of the Creation Unit to be redeemed to the Fund's Transfer Agent, the Transfer Agent will nonetheless accept the redemption request in reliance on the undertaking by the Authorized Participant to deliver the missing Shares as soon as possible. Such undertaking shall be secured by the Authorized Participant's delivery and maintenance of collateral consisting of cash having a value (marked to market daily) of up to 105%, which the Trust may change from time to time, of the value of the missing Shares. The current procedures for collateralization of missing Shares require, among other things, that any cash collateral shall be in the form of U.S. dollars in immediately available funds and shall be held by the Custodian and marked to market daily, and that the fees of the Custodian and any sub-custodians in respect of the delivery, maintenance and redelivery of the cash collateral shall be payable by the Authorized Participant. The Participant Agreement will permit the Trust, on behalf of the Fund, to purchase the missing Shares and will subject the Authorized Participant to liability for any shortfall between the cost to the Trust of purchasing such Shares and the value of the collateral.

Once the Fund has accepted a redemption order, upon the next determination of the NAV of the Shares, the Fund may confirm the redemption of a Creation Unit, against receipt of Shares, at such NAV. The Distributor will then transmit a confirmation of acceptance to the Authorized Participant that placed the order. Deliveries of redemption proceeds by the Fund typically are settled on a “T+1 basis” (i.e., one Business Day after trade date), but may be made up to seven days later, particularly in stressed market conditions. Further, the Fund reserves the right to settle redemption transactions on another basis to accommodate non-U.S. market holiday schedules (see below for further information), closures and settlement cycles, to account for different treatment among non-U.S. and U.S. markets of dividend record dates and dividend ex-dates (i.e., the last date the holder of a security can sell the security and still receive dividends payable on the security sold), and in certain other circumstances.

In certain cases, an Authorized Participant may create and redeem Creation Units on the same trade date. In these instances, the Fund reserves the right to settle these transactions on a net basis or require a representation from the Authorized Participant that the creation and redemption transactions are for separate Beneficial Owners.

Redemption Transaction Fees

A standard redemption transaction fee is imposed to offset transfer and other costs associated with the redemption of Creation Units. The standard redemption transaction fee is charged to the Authorized Participant on the day such Authorized Participant redeems a Creation Unit, and is the same regardless of the number of Creation Units redeemed by an Authorized Participant on the applicable Business Day.

The Authorized Participant may also be required to pay a variable transaction fee (up to the maximum amount shown in the table below) to cover certain brokerage, tax, foreign exchange, execution, market impact and other costs and expenses. Authorized Participants will also bear the costs of transferring the Fund Securities, including any stamp duty or other similar fees and expenses. Investors who use the services of a broker or other financial intermediary may be charged a fee for such services.

The standard redemption transaction fee and maximum variable transaction fee for a Creation Unit are set forth below:

Fund	Standard Transaction Fee	Maximum Variable Transaction Fee*
Federated Hermes MDT Large Cap Growth ETF	\$450	2%

* As a percentage of the Creation Unit(s) redeemed.

The Adviser may adjust the transactions fees from time to time based on actual experience.

To the extent that the Adviser, on behalf of the Fund, may need to sell investments denominated in foreign currencies prior to converting such proceeds into U.S. dollars at the applicable exchange rate and subject to the applicable spread for redemptions that are made in whole or in part for cash, those redeeming Creation Units will bear the risk associated with changes in the currency exchange rate and securities value between the time they place their redemption order and the time that the Fund converts any foreign currency-denominated investments into U.S. dollars.

Custom Baskets

The baskets of securities comprising a Fund Deposit and a Fund Redemption may be representative of the Fund’s portfolio holdings; or the Fund may utilize Custom Baskets provided that certain conditions are met. A “Custom Basket” is (i) a basket that is composed of a non-representative selection of the Fund’s portfolio holdings, or (ii) a representative basket that is different from the initial basket used in transactions on the same business day, and (iii) a basket that contains bespoke cash and/or security substitutions, including for a single Authorized Participant. The Trust has adopted policies and procedures that govern the construction and acceptance of baskets, including heightened requirements for Custom Baskets. Such policies and procedures provide detailed parameters for the construction and acceptance of Custom Baskets, establish processes for revisions to, or deviations from, such parameters, and specify the titles and roles of the employees of the Adviser who are required to review each Custom Basket for compliance with those parameters. In connection with the construction and acceptance of Custom Baskets, the Adviser may consider various factors, including, but not limited to: (1) whether the securities, assets and other positions comprising a basket are consistent with the Fund’s investment objective, policies and disclosure; (2) whether the securities, assets and other positions can legally and readily be acquired, transferred and held by the Fund and/or Authorized Participant(s), as applicable; (3) whether to utilize cash, either in lieu of securities or other instruments or as a cash balancing amount; (4) whether the use of Custom Baskets may reduce costs, increase (tax) efficiency and improve trading; and (5) with respect to index-based strategies, whether the securities, assets and other positions aid the Fund to track its underlying index. Although the policies and procedures are designed to mitigate against potential overreaching by an Authorized Participant, there is no guarantee that such policies and procedures will be effective.

Regular Holidays

For every occurrence of one or more intervening holidays in the applicable non-U.S. market that are not holidays observed in the U.S. equity market, the redemption settlement cycle will be extended by the number of such intervening holidays. In addition to holidays, other unforeseeable closings in a non-U.S. market due to emergencies may also prevent the Trust from delivering securities within normal settlement period. The securities delivery cycles currently practicable for transferring portfolio securities to redeeming investors, coupled with non-U.S. market holiday schedules, will require a delivery process longer than seven calendar days, in certain circumstances, but in no event longer than fifteen calendar days.

RULE 12b-1 PLAN

The Fund has adopted a Distribution Plan applicable to the Fund's Shares. Under the Distribution Plan, the Distributor, or designated service providers, may receive up to 0.25% of the Fund's assets attributable to Shares as compensation for distribution services pursuant to Rule 12b-1 of the 1940 Act. Distribution services may include: (i) services in connection with distribution assistance, or (ii) payments to financial institutions and other financial intermediaries, such as broker-dealers, fund "supermarkets" and the Distributor's affiliates and subsidiaries, as compensation for services or reimbursement of expenses incurred in connection with distribution assistance. The Distributor may, at its discretion, retain a portion of such payments to compensate itself for distribution services and distribution related expenses such as the costs of preparation, printing, mailing or otherwise disseminating sales literature, advertising, and prospectuses (other than those furnished to current shareholders of the Fund), promotional and incentive programs, and such other marketing expenses that the Distributor may incur. The plan is a compensation plan, which means that the Distributor is compensated regardless of its expenses, as opposed to a reimbursement plan which reimburses only for expenses incurred.

No distribution fees are currently charged to the Fund and there are currently no plans to impose these fees. The Plan was adopted in order to permit the implementation of the Fund's method of distribution. In the event that 12b-1 fees are charged in the future, because the Fund pays these fees out of assets on an ongoing basis, over time these fees may cost you more than other types of sales charges and will increase the cost of your investment in the Fund.

The Plan will remain in effect for a period of one year and is renewable from year to year with respect to the Fund, so long as its continuance is approved at least annually (1) by the vote of a majority of the Trustees and (2) by a vote of the majority of those Independent Trustees who have no direct or indirect financial interest in the Plan ("Rule 12b-1 Trustees"). The Plan may not be amended to increase materially the amount of fees that may be paid by the Fund under the Plan unless such amendment is approved by a 1940 Act majority vote of the outstanding Shares and by the Fund's Trustees in the manner described above. The Plan is terminable with respect to the Fund at any time by a vote of a majority of the Rule 12b-1 Trustees or by a 1940 Act majority vote of the outstanding Shares.

Payments To Financial Intermediaries

The Distributor may pay out of its own resources amounts to certain financial intermediaries, including broker-dealers, banks, registered investment advisers, independent financial planners and retirement plan administrators. In some cases, such payments may be made by, or funded from the resources of, companies affiliated with the Distributor (including the Adviser). While Financial Industry Regulatory Authority, Inc. (FINRA) regulations limit the sales charges that you may bear, there are no limits with regard to the amounts that the Distributor may pay out of its own resources. In addition to the payments which are generally described herein and in the Prospectus, the financial intermediary also may receive payments under the Rule 12b-1 Plan. In connection with these payments, the financial intermediary may elevate the prominence or profile of the Fund and/or other Federated Hermes funds within the financial intermediary's organization by, for example, placement on a list of preferred or recommended funds and/or granting the Distributor preferential or enhanced opportunities to promote the funds in various ways within the financial intermediary's organization. The same financial intermediaries may receive payments under more than one or all categories. These payments assist in the Distributor's efforts to support the sale of Shares. These payments are negotiated and may be based on such factors as: the number or value of Shares that the financial intermediary sells or may sell; the value of client assets invested; the level and types of services or support furnished by the financial intermediary; or the Fund's and/or other Federated Hermes funds' relationship with the financial intermediary. Not all financial intermediaries receive such payments and the amount of compensation may vary by intermediary. You should ask your financial intermediary for information about any payments it receives from the Distributor or the Federated Hermes funds and any services it provides, as well as the fees and/or commissions it charges.

The categories of payments are described below.

Processing Support Payments

The Distributor may make payments to certain financial intermediaries that offer Federated Hermes investment companies to help offset their costs associated with client account maintenance support, statement processing and transaction processing. The types of payments that the Distributor may make under this category include, but are not limited to: payment of ticket charges on a per-transaction basis; payment of networking fees; and payment for ancillary services such as setting up funds on the financial intermediary's mutual fund trading system.

Marketing Support Payments

From time to time, the Distributor, at its expense, may provide additional compensation to financial intermediaries that sell or arrange for the sale of Shares. Such compensation, provided by the Distributor, may include reimbursement of transaction costs, and financial assistance to financial intermediaries that enable the Distributor to participate in or present at conferences or seminars, sales or training programs for invited registered representatives and other employees, client entertainment, client and investor events and other financial intermediary-sponsored events. The Distributor may also provide additional compensation to financial intermediaries for services rendered in connection with technology and programming set-up, platform development and maintenance or similar services and for the provision of sales-related data to the Adviser and/or its affiliates.

The Distributor also may hold or sponsor, at its expense, sales events, conferences and programs for employees or associated persons of financial intermediaries and may pay the travel and lodging expenses of attendees. The Distributor also may provide, at its expense, meals and entertainment in conjunction with meetings with financial intermediaries. Other compensation may be offered to the extent not prohibited by applicable federal or state law or regulations, or the rules of any self-regulatory agency, such as FINRA. These payments may vary depending on the nature of the event or the relationship.

For the year ended December 31, 2023, the following is a list of FINRA member firms that received additional payments from the Distributor or an affiliate. Additional payments may also be made to certain other financial intermediaries that are not FINRA member firms that sell Federated Hermes fund shares or provide services to the Federated Hermes funds and shareholders. These firms are not included in this list. Any additions, modifications or deletions to the member firms identified in this list that have occurred since December 31, 2023, are not reflected. You should ask your financial intermediary for information about any additional payments it receives from the Distributor.

Book Entry Only System

The Depository Trust Company (DTC) acts as securities depository for the Fund's shares. Shares of the Fund are represented by securities registered in the name of the DTC or its nominee, Cede & Co., and deposited with, or on behalf of, the DTC.

The DTC, a limited-purpose trust company, was created to hold securities of its participants ("DTC Participants") and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities' certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own the DTC. More specifically, the DTC is owned by a number of its DTC Participants and by the Exchange, and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (the "Indirect Participants").

Beneficial ownership of shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in shares (owners of such beneficial interests are referred to herein as "Beneficial Owners") is shown on, and the transfer of ownership is effected only through, records maintained by the DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and

Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of shares. The laws of some jurisdictions may require that certain purchasers of securities take physical delivery of such securities in definitive form. Such laws may impair the ability of certain investors to acquire beneficial interests in shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to the Depositary Agreement between the Trust and the DTC, the DTC is required to make available to the Trust upon request and for a fee to be charged to the Trust a listing of the shares of the Fund held by each DTC Participant. The Trust shall inquire of each such DTC Participant as to the number of Beneficial Owners holding shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to the DTC or its nominee, Cede & Co., as the registered holder of all shares. The DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants' accounts with payments in amounts proportionate to their respective beneficial interests in shares of the Fund as shown on the records of the DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a "street name," and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspect of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests, or for any other aspect of the relationship between the DTC and DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

The DTC may decide to discontinue providing its service with respect to shares at any time by giving reasonable notice to the Trust and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Trust shall take action to find a replacement for the DTC to perform its functions at a comparable cost.

Delaware Statutory Trust Law

The Fund is an organization of the type commonly known as a "Delaware statutory trust." The Fund's Declaration of Trust provides that the Trustees and officers of the Fund, in their capacity as such, will not be personally liable for errors of judgment or mistakes of fact or law; but nothing in the Declaration of Trust protects a Trustee against any liability to the Fund or its shareholders to which he would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence, or reckless disregard of the duties involved in the conduct of his office. Voting rights are not cumulative, which means that the holders of more than 50% of the Shares voting for the election of Trustees can elect 100% of the Trustees.

In the unlikely event a shareholder is held personally liable for the Trust's obligations, the Trust is required by the Declaration of Trust to use its property to protect or compensate the shareholder. On request, the Trust will defend any claim made and pay any judgment against a shareholder for any act or obligation of the Trust. Therefore, financial loss resulting from liability as a shareholder will occur only if the Trust itself cannot meet its obligations to indemnify shareholders and pay judgments against them.

The Fund's Declaration of Trust also places limitations on the forum in which claims against the Trust may be heard and includes a waiver of a jury trial. Other than federal securities law claims, claims against the Trust are required to be brought in the Court of Chancery of the State of Delaware to the extent there is subject matter jurisdiction in such court for the claims asserted or, if not, then in the Superior Court of the State of Delaware. Accordingly, shareholders may be required to bring claims in an inconvenient or less favorable forum.

Account and Share Information

VOTING RIGHTS

The Trust is not required to hold annual meetings of shareholders and does not intend to hold such meetings. In the event that a meeting of shareholders is held, each Share of the Trust will be entitled to one vote on all matters presented to shareholders including the election of Trustees. However, to the extent required by the Act or otherwise determined by the Trustees, series and classes of the Trust will vote separately from each other. Meetings of shareholders of the Trust, or any series, may be called by the Trustees, certain officers or upon the written request of holders of 25% or more of the shares entitled to vote at such

meetings. The Trustees will call a special meeting of shareholders for the purpose of electing Trustees, if, at any time, less than a majority of Trustees holding office at the time were elected by shareholders. The shareholders of the Trust will have voting rights only with respect to the limited number of matters specified in the Declaration of Trust and such other matters as the Trustees may determine or may be required by law.

Control Persons and Principal Holders of Securities

The Fund has not yet commenced operations as of the date of this SAI, and, therefore, there were no public shareholders of the Fund as of the date of this SAI.

Tax Information

FEDERAL INCOME TAX

The Fund intends to meet requirements of Subchapter M of the Internal Revenue Code (the “Code”) applicable to regulated investment companies. If these requirements are not met, it will not receive special tax treatment and will be subject to federal corporate income tax.

The Fund will be treated as a single, separate entity for federal income tax purposes so that income earned and capital gains and losses realized by the Trust’s other portfolios will be separate from those realized by the Fund.

TAX BASIS INFORMATION

The Fund’s Transfer Agent and/or your financial intermediary is required to provide you with the cost basis information on the sale of any of your Shares in the Fund, subject to certain exceptions.

FOREIGN INVESTMENTS

If the Fund purchases foreign securities, its investment income may be subject to foreign withholding or other taxes that could reduce the return on these securities. Tax treaties between the United States and foreign countries, however, may reduce or eliminate the amount of foreign taxes to which the Fund would be subject. The effective rate of foreign tax cannot be predicted since the amount of Fund assets to be invested within various countries is uncertain. However, the Fund intends to operate so as to qualify for treaty-reduced tax rates when applicable.

Distributions from the Fund may be based on estimates of book income for the year. Book income generally consists solely of the income generated by the securities in the portfolio, whereas tax-basis income includes, in addition, gains or losses attributable to currency fluctuation. Due to differences in the book and tax treatment of fixed-income securities denominated in foreign currencies, it is difficult to project currency effects on an interim basis. Therefore, to the extent that currency fluctuations cannot be anticipated, a portion of distributions to shareholders could later be designated as a return of capital, rather than income, for income tax purposes, which may be of particular concern to certain trusts.

Certain foreign corporations may qualify as Passive Foreign Investment Companies (PFIC). There are special rules prescribing the tax treatment of such an investment by the Fund, which could subject the Fund to federal income tax.

If more than 50% of the value of the Fund’s assets at the end of the tax year is represented by stock or securities of foreign corporations, the Fund will qualify for certain Code provisions that allow its shareholders to claim a foreign tax credit or deduction on their U.S. income tax returns. The Code may limit a shareholder’s ability to claim a foreign tax credit. Shareholders who elect to deduct their portion of the Fund’s foreign taxes rather than take the foreign tax credit must itemize deductions on their income tax returns.

TAXATION ON CREATION AND REDEMPTIONS OF CREATION UNITS

An Authorized Participant generally will recognize either gain or loss upon the exchange of Deposit Securities for Creation Units. This gain or loss will generally equal the difference between (i) the sum of the market value of the Creation Units at the time of the exchange and any net amount of cash received by the Authorized Participant in the exchange and (ii) the sum of the Authorized Participant’s aggregate basis in the Deposit Securities exchanged and any net amount of cash paid for the Creation Units. However, the U.S. Internal Revenue Service may apply the wash sales rules to determine that any loss realized upon the exchange of Deposit Securities for Creation Units is not currently deductible. Authorized Participants should consult their own tax advisers.

Current U.S. federal tax laws dictate that capital gain or loss realized from the redemption of Creation Units will generally create long-term capital gain or loss if the Authorized Participant holds the Creation Units for more than one year, or short-term capital gain or loss if the Creation Units were held for one year or less, if the Creation Units are held as capital assets.

Who Manages and Provides Services to the Fund?

BOARD OF TRUSTEES

The Board of Trustees is responsible for managing the Trust’s business affairs and for exercising all the Trust’s powers except those reserved for the shareholders. The following tables give information about each Trustee and the senior officers of the Fund. Where required, the tables separately list Trustees who are “interested persons” of the Fund (i.e., “Interested” Trustees) and those who are not (i.e., “Independent” Trustees). Unless otherwise noted, the address of each person listed is 1001 Liberty Avenue, Pittsburgh, PA 15222-3779. The address of all Independent Trustees listed is 4000 Ericsson Drive, Warrendale, PA 15086-7561; Attention: Federated Hermes ETF Trust Board. As of December 31, 2023, the Trust comprised four portfolios, and the Federated Hermes Complex consisted of 33 investment companies (comprising 101 portfolios). Unless otherwise noted, each Officer is elected annually. Unless otherwise noted, each Trustee oversees all portfolios in the Federated Hermes Complex and serves for an indefinite term.

QUALIFICATIONS OF INDEPENDENT TRUSTEES

Individual Trustee qualifications are noted in the “Independent Trustees Background and Compensation” chart. In addition, the following characteristics are among those that were considered for each existing Trustee and will be considered for any Nominee Trustee.

- Outstanding skills in disciplines deemed by the Independent Trustees to be particularly relevant to the role of Independent Trustee and to the Federated Hermes funds, including legal, accounting, business management, the financial industry generally and the investment industry particularly.
- Desire and availability to serve for a substantial period of time, taking into account the Board’s current mandatory retirement age of 75 years.
- No conflicts which would interfere with qualifying as independent.
- Appropriate interpersonal skills to work effectively with other Independent Trustees.
- Understanding and appreciation of the important role occupied by Independent Trustees in the regulatory structure governing regulated investment companies.
- Diversity of background.

Prior to joining Federated Hermes, Mr. Clark served as Managing Director of Legg Mason's ETF products and Head of ETF Capital Markets with the Vanguard Group. Mr. Clark received his B.A. in Economics from the University of Pittsburgh.

* Officers do not receive any compensation from the Fund.

In addition, the Fund has appointed an Anti-Money Laundering Compliance Officer.

DIRECTOR/TRUSTEE EMERITUS PROGRAM

The Board has created a position of Director/Trustee Emeritus, whereby an incumbent Director/Trustee who has attained the age of 75 and completed a minimum of five years of service as a director/trustee, may, in the sole discretion of the Committee of Independent Directors/Trustees ("Committee"), be recommended to the full Board of Directors/Trustees of the Fund to serve as Director/Trustee Emeritus.

A Director/Trustee Emeritus that has been approved as such receives an annual fee in an amount equal to a percent of the annual base compensation paid to a Director/Trustee. In the case of a Director/Trustee Emeritus who had previously served at least five years but less than 10 years as a Director/Trustee, the percent will be 10%. In the case of a Director/Trustee Emeritus who had previously served at least 10 years as a Director/Trustee, the percent will be 20%. The Director/Trustee Emeritus will be reimbursed for any expenses incurred in connection with their service, including expenses of travel and lodging incurred in

attendance at Board meetings. Director/Trustee Emeritus will continue to receive relevant materials concerning the Funds, will be expected to attend at least one regularly scheduled quarterly meeting of the Board of Directors/Trustees each year and will be available to consult with the Committees or its representatives at reasonable times as requested by the Chairman; however, a Director/Trustee Emeritus does not have any voting rights at Board meetings and is not subject to election by shareholders of the Funds.

The Director/Trustee Emeritus will be permitted to serve in such capacity at the pleasure of the Committee, but the annual fee will cease to be paid at the end of the calendar year during which he or she has attained the age of 80 years, thereafter the position will be honorary.

The following table shows the fees paid to each Director/Trustee Emeritus for the Fund's most recently ended fiscal period and the portion of that fee paid by the Fund or Corporation/Trust.¹

EMERITUS TRUSTEES AND COMPENSATION

Director/Trustee Emeritus	Compensation From the Fund (past fiscal year)	Total Compensation Paid to Director/Trustee Emeritus ¹ (past calendar year)
John T. Collins ²	\$0.00	\$ 0.00
Charles F. Mansfield, Jr.	\$0.00	\$60,000

1 The fees paid to a Director/Trustee are allocated among the funds that were in existence at the time the Director/Trustee elected Emeritus status, based on each fund's net assets at that time.

2 John T. Collins retired from the Federated Hermes Funds Board of Directors/Trustees on December 31, 2023. Mr. Collins was appointed as Emeritus Director/Trustee on February 15, 2024, to become retroactively effective as of January 1, 2024. Until December 31, 2023, Mr. Collins was compensated as a Director/Trustee of the Fund and was paid \$385,000 for his service to the Federated Hermes Funds for the calendar year ended December 31, 2023.

BOARD LEADERSHIP STRUCTURE

As required under the terms of certain regulatory settlements, the Chairman of the Board is not an interested person of the Fund and neither the Chairman, nor any firm with which the Chairman is affiliated, has a prior relationship with Federated Hermes or its affiliates or (other than his position as a Trustee) with the Fund.

COMMITTEES OF THE BOARD

Board Committee	Committee Members	Committee Functions	Meetings Held During Last Fiscal Year
Executive	J. Christopher Donahue G. Thomas Hough John S. Walsh	In between meetings of the full Board, the Executive Committee generally may exercise all the powers of the full Board in the management and direction of the business and conduct of the affairs of the Trust in such manner as the Executive Committee shall deem to be in the best interests of the Trust. However, the Executive Committee cannot elect or remove Board members, increase or decrease the number of Trustees, elect or remove any Officer, declare dividends, issue shares or recommend to shareholders any action requiring shareholder approval.	One
Audit	Maureen Lally-Green Thomas M. O'Neill P. Jerome Richey John S. Walsh	The purposes of the Audit Committee are to oversee the accounting and financial reporting process of the Fund, the Fund's internal control over financial reporting and the quality, integrity and independent audit of the Fund's financial statements. The Committee also oversees or assists the Board with the oversight of compliance with legal requirements relating to those matters, approves the engagement and reviews the qualifications, independence and performance of the Fund's independent registered public accounting firm, acts as a liaison between the independent registered public accounting firm and the Board and reviews the Fund's internal audit function. Board Committee	Committee Members	Committee Functions	Meetings Held During Last Fiscal Year
Nominating	John G. Carson G. Thomas Hough Maureen Lally-Green Thomas M. O'Neill Madelyn A. Reilly P. Jerome Richey John S. Walsh	The Nominating Committee, whose members consist of all Independent Trustees, selects and nominates persons for election to the Fund's Board when vacancies occur. The Committee will consider candidates recommended by shareholders, Independent Trustees, officers or employees of any of the Fund's agents or service providers and counsel to the Fund. Any shareholder who desires to have an individual considered for nomination by the Committee must submit a recommendation in writing to the Secretary of the Fund, at the Fund's address appearing on the back cover of this SAI. The recommendation should include the name and address of both the shareholder and the candidate and detailed information concerning the candidate's qualifications and experience. In identifying and evaluating candidates for consideration, the Committee shall consider such factors as it deems appropriate. Those factors will ordinarily include: integrity, intelligence, collegiality, judgment, diversity, skill, business and other experience, qualification as an "Independent Trustee," the existence of material relationships which may create the appearance of a lack of independence, financial or accounting knowledge and experience and dedication and willingness to devote the time and attention necessary to fulfill Board responsibilities.	Two

BOARD'S ROLE IN RISK OVERSIGHT

The Board's role in overseeing the Fund's general risks includes receiving performance reports for the Fund and risk management reports from Federated Hermes' Chief Risk Officer at each regular Board meeting. The Chief Risk Officer is responsible for enterprise risk management at Federated Hermes, which includes risk management committees for investment management and for investor services. The Board also receives regular reports from the Fund's Chief Compliance Officer regarding significant compliance risks.

On behalf of the Board, the Audit Committee plays a key role overseeing the Fund's financial reporting and valuation risks. The Audit Committee meets regularly with the Fund's Principal Financial Officer and outside auditors, as well as with Federated Hermes' Chief Audit Executive to discuss financial reporting and audit issues, including risks relating to financial controls.

INVESTMENT ADVISER

The Adviser conducts investment research and makes investment decisions for the Fund.

The Adviser is a wholly owned subsidiary of Federated Hermes.

The Adviser shall not be liable to the Trust or any Fund shareholder for any losses that may be sustained in the purchase, holding or sale of any security or for anything done or omitted by it, except acts or omissions involving willful misfeasance, bad faith, gross negligence or reckless disregard of the duties imposed upon it by its contract with the Trust.

In December 2017, Federated Investors, Inc., now Federated Hermes, became a signatory to the Principles for Responsible Investment (PRI). The PRI is an investor initiative in partnership with the United Nations Environment Programme Finance Initiative and the United Nations Global Compact. Commitments made as a signatory to the PRI are not legally binding, but are voluntary and aspirational. They include efforts, where consistent with our fiduciary responsibilities, to incorporate environmental, social and corporate governance (ESG) issues into investment analysis and investment decision making, to be active owners and incorporate ESG issues into our ownership policies and practices, to seek appropriate disclosure on ESG issues by the entities in which we invest, to promote acceptance and implementation of the PRI within the investment industry, to enhance our effectiveness in implementing the PRI, and to report on our activities and progress towards implementing the PRI. Being a signatory to the PRI does not obligate Federated Hermes to take, or not take, any particular action as it relates to investment decisions or other activities.

In July 2018, Federated Investors, Inc., now Federated Hermes, acquired a majority interest in Federated Hermes Limited (FHL) (formerly, Hermes Fund Managers Limited), a pioneer of integrated ESG investing. Federated Hermes now owns 100% of FHL. FHL’s experience with ESG issues contributes to Federated Hermes’ understanding of material risks and opportunities these issues may present.

EOS at Federated Hermes, which was established as Hermes Equity Ownership Services Limited (EOS) in 2004 as an affiliate of FHL and Hermes Investment Management Limited, is a 50+ member engagement and stewardship team that conducts long-term, objectives-driven dialogue with board and senior executive level representatives of approximately 1,000 unique issuers annually. It seeks to address the most material ESG risks and opportunities through constructive and continuous discussions with the goal of improving long-term results for investors. Engagers’ deep understanding across sectors, themes and regional markets, along with language and cultural expertise, allows EOS to provide insights to companies on the merits of addressing ESG risks and the positive benefits of capturing opportunities. Federated Hermes investment management teams have access to the insights gained from understanding a company’s approach to these long-term strategic matters as an additional input to improve portfolio risk/return characteristics.

Portfolio Manager Information

As a general matter, certain conflicts of interest may arise in connection with a portfolio manager’s management of a fund’s investments, on the one hand, and the investments of other funds/pooled investment vehicles or accounts (collectively, including the Fund, as applicable, “accounts”) for which the portfolio manager is responsible, on the other. For example, it is possible that the various accounts managed could have different investment strategies that, at times, might conflict with one another to the possible detriment of the Fund. Alternatively, to the extent that the same investment opportunities might be desirable for more than one account, possible conflicts could arise in determining how to allocate them. Other potential conflicts can include, for example, conflicts created by specific portfolio manager compensation arrangements (including, for example, the allocation or weighting given to the performance of the Fund or other accounts or activities for which the portfolio manager is responsible in calculating the portfolio manager’s compensation), and conflicts relating to selection of brokers or dealers to execute Fund portfolio trades and/or specific uses of commissions from Fund portfolio trades (for example, research or “soft dollars”). The Adviser has adopted policies and procedures and has structured the portfolio managers’ compensation in a manner reasonably designed to safeguard the Fund from being negatively affected as a result of any such potential conflicts.

The following information about the Fund’s Portfolio Managers is provided as of the end of the Fund’s most recently completed fiscal period unless otherwise indicated.

The following information about the Fund’s Portfolio Managers is provided as of May 31, 2024.

Daniel Mahr, Portfolio Manager

Types of Accounts Managed by Daniel Mahr	Total Number of Additional Accounts Managed/Total Assets*	Additional Accounts/Assets Managed that are Subject to Advisory Fee Based on Account Performance
Registered Investment Companies	8/\$7.0 billion	0/\$0
Other Pooled Investment Vehicles	0/\$0	0/\$0
Other Accounts	172/\$3.0 billion	1/\$113.8 million

* None of the Accounts has an advisory fee that is based on the performance of the account.

Dollar value range of shares owned in the Fund: None.

Daniel Mahr is paid a fixed base salary and a variable annual incentive. Base salary is determined within a market competitive, position-specific salary range, based on the portfolio manager’s experience and performance. The annual incentive amount is determined based primarily on Investment Product Performance (IPP) and may also include a discretionary component based on a variety of factors deemed relevant, such as financial measures and performance and may be paid entirely in cash, or in a combination of cash and restricted stock of Federated Hermes, Inc. (“Federated Hermes”). The total combined annual incentive opportunity is intended to be competitive in the market for this portfolio manager role.

IPP is calculated based on certain other accounts managed by the portfolio manager. IPP is measured on a rolling one calendar year period, typically, on a pre-tax gross total return basis versus a designated benchmark and versus a designated peer group of comparable accounts. Performance periods are adjusted if a portfolio manager has been managing an account for less than five years; accounts with less than one year of performance history under a portfolio manager may be excluded.

The allocation or weighting given to the other accounts for which Mr. Mahr is responsible when his compensation is calculated may be equal or can vary. For purposes of calculating the annual incentive amount, each account managed by the portfolio manager is categorized into multiple designated sub-groups, which may be further broken down by Strategies (which may be adjusted periodically). The annual incentive amount is based on the composite investment performance of each Strategy, which is measured against the Strategy’s designated benchmark and a designated peer group of comparable accounts.

As noted above, Mr. Mahr is also the portfolio manager for other accounts in addition to the Fund. Such other accounts may be categorized as reflecting different Strategies, which may have different benchmarks. Although the performance of each Strategy composite is considered in calculating the annual incentive amount, their relative weightings differ (and may be adjusted periodically). A portion of the bonus tied to the IPP score may be adjusted based on management’s assessment of overall contributions to fund performance and any other factors as deemed relevant.

Any individual allocations from the discretionary pool may be determined, by executive management on a discretionary basis using various factors, such as, for example, on a product, strategy or asset class basis, and considering overall contributions and any other factors deemed relevant (and may be adjusted periodically).

In addition, Mr. Mahr was awarded a grant of restricted Federated Hermes stock. Awards of restricted stock are discretionary and are made in variable amounts based on the subjective judgment of Federated Hermes’ senior management.

Damien Zhang, Portfolio Manager

Types of Accounts Managed by Damien Zhang	Total Number of Additional Accounts Managed/Total Assets*	Additional Accounts/Assets Managed that are Subject to Advisory Fee Based on Account Performance
Registered Investment Companies	8/\$7.0 billion	0/\$0
Other Pooled Investment Vehicles	0/\$0	0/\$0
Other Accounts	172/\$3.0 billion	1/\$113.8 million

* None of the Accounts has an advisory fee that is based on the performance of the account.

Dollar value range of shares owned in the Fund: None.

Damien Zhang is paid a fixed base salary and a variable annual incentive. Base salary is determined within a market competitive, position-specific salary range, based on the portfolio manager’s experience and performance. The annual incentive amount is determined based primarily on Investment Product Performance (IPP) and may also include a discretionary component based on a variety of factors deemed relevant, such as financial measures and performance and may be paid entirely in cash, or in a combination of cash and restricted stock of Federated Hermes, Inc. (“Federated Hermes”). The total combined annual incentive opportunity is intended to be competitive in the market for this portfolio manager role.

IPP is measured on a rolling one calendar year period, typically, on a pre-tax gross total return basis versus a designated benchmark and versus a designated peer group of comparable accounts. Performance periods are adjusted if a portfolio manager has been managing an account for less than five years; accounts with less than one year of performance history under a portfolio manager may be excluded.

The allocation or weighting given to the other accounts for which Mr. Konopka is responsible when his compensation is calculated may be equal or can vary. For purposes of calculating the annual incentive amount, each account managed by the portfolio manager is categorized into multiple designated sub-groups, which may be further broken down by Strategies (which may be adjusted periodically). The annual incentive amount is based on the composite investment performance of each Strategy, which is measured against the Strategy’s designated benchmark and a designated peer group of comparable accounts.

As noted above, Mr. Konopka is also the portfolio manager for other accounts in addition to the Fund. Such other accounts may be categorized as reflecting different Strategies, which may have different benchmarks. Although the performance of each Strategy composite is considered in calculating the annual incentive amount, their relative weightings differ (and may be adjusted periodically). A portion of the bonus tied to the IPP score may be adjusted based on management’s assessment of overall contributions to fund performance and any other factors as deemed relevant.

Any individual allocations from the discretionary pool may be determined, by executive management on a discretionary basis using various factors, such as, for example, on a product, strategy or asset class basis, and considering overall contributions and any other factors deemed relevant (and may be adjusted periodically).

John Paul Lewicke, Portfolio Manager

Types of Accounts Managed by John Paul Lewicke	Total Number of Additional Accounts Managed/Total Assets*	Additional Accounts/Assets Managed that are Subject to Advisory Fee Based on Account Performance
Registered Investment Companies	8/\$7.0 billion	0/\$0
Other Pooled Investment Vehicles	0/\$0	0/\$0
Other Accounts	172/\$3.0 billion	1/\$113.8 million

* None of the Accounts has an advisory fee that is based on the performance of the account.

Dollar value range of shares owned in the Fund: None.

John Paul Lewicke is paid a fixed base salary and a variable annual incentive. Base salary is determined within a market competitive, position-specific salary range, based on the portfolio manager's experience and performance. The annual incentive amount is determined based primarily on Investment Product Performance (IPP) and may also include a discretionary component based on a variety of factors deemed relevant, such as financial measures and performance and may be paid entirely in cash, or in a combination of cash and restricted stock of Federated Hermes, Inc. ("Federated Hermes"). The total combined annual incentive opportunity is intended to be competitive in the market for this portfolio manager role.

IPP is calculated based on certain other accounts managed by the portfolio manager. IPP is measured on a rolling one calendar year period, typically, on a pre-tax gross total return basis versus a designated benchmark and versus a designated peer group of comparable accounts. Performance periods are adjusted if a portfolio manager has been managing an account for less than five years; accounts with less than one year of performance history under a portfolio manager may be excluded.

The allocation or weighting given to the other accounts for which Mr. Lewicke is responsible when his compensation is calculated may be equal or can vary. For purposes of calculating the annual incentive amount, each account managed by the portfolio manager is categorized into multiple designated sub-groups, which may be further broken down by Strategies (which may be adjusted periodically). The annual incentive amount is based on the composite investment performance of each Strategy, which is measured against the Strategy's designated benchmark and a designated peer group of comparable accounts.

As noted above, Mr. Lewicke is also the portfolio manager for other accounts in addition to the Fund. Such other accounts may be categorized as reflecting different Strategies, which may have different benchmarks. Although the performance of each Strategy composite is considered in calculating the annual incentive amount, their relative weightings differ (and may be adjusted periodically). A portion of the bonus tied to the IPP score may be adjusted based on management's assessment of overall contributions to fund performance and any other factors as deemed relevant.

Any individual allocations from the discretionary pool may be determined, by executive management on a discretionary basis using various factors, such as, for example, on a product, strategy or asset class basis, and considering overall contributions and any other factors deemed relevant (and may be adjusted periodically).

Services Agreement

Federated Advisory Services Company, an affiliate of the Adviser, provides certain support services to the Adviser. The fee for these services is paid by the Adviser and not by the Fund.

Other Related Services

Affiliates of the Adviser may, from time to time, provide certain electronic equipment and software to institutional customers in order to facilitate the purchase of Fund Shares offered by the Distributor.

CODE OF ETHICS RESTRICTIONS ON PERSONAL TRADING

As required by Rule 17j-1 of the Investment Company Act of 1940 and Rule 204A-1 under the Investment Advisers Act (as applicable), the Fund, its Adviser and its Distributor have adopted codes of ethics. These codes govern securities trading activities of investment personnel, Fund Trustees and certain other employees. Although they do permit these people to trade in securities, including those that the Fund could buy, as well as Shares of the Fund, they also contain significant safeguards designed to protect the Fund and its shareholders from abuses in this area, such as requirements to obtain prior approval for, and to report, particular transactions.

VOTING PROXIES ON FUND PORTFOLIO SECURITIES

The Board has delegated to the Adviser authority to vote proxies on the securities held in the Fund's portfolio. The Board has also approved the Adviser's policies and procedures for voting the proxies, which are described below.

Proxy Voting Policies

As an investment adviser with a fiduciary duty to the Fund and its shareholders, the Adviser's general policy is to cast proxy votes in favor of management proposals and shareholder proposals that the Adviser anticipates will enhance the long-term value of the securities being voted in a manner that is consistent with the investment objectives of the Fund. Generally, this will mean voting for proposals that the Adviser believes will improve the management of a company, increase the rights or preferences of the voted securities, or increase the chance that a premium offer would be made for the company or for the voted securities. This approach to voting proxy proposals will be referred to hereafter as the "General Policy."

The Adviser generally votes consistently on the same matter when securities of an issuer are held by multiple client portfolios. However, the Adviser may vote differently if a client's investment objectives differ from those of other clients or if a client explicitly instructs the Adviser to vote differently.

The following examples illustrate how the General Policy may apply to the most common management proposals and shareholder proposals. However, whether the Adviser supports or opposes a proposal will always depend on a thorough understanding of the Fund's investment objectives and the specific circumstances described in the proxy statement and other available information.

Corporate Governance

On matters related to the board of directors, generally, the Adviser will vote to elect nominees to the board in uncontested elections except in certain circumstances, such as where the director: (1) had not attended at least 75% of the board meetings during the previous year; (2) serves as the company's chief financial officer, unless the company is headquartered in the UK where this is market practice; (3) has become overboarded (more than five boards for retired executives and more than two boards for CEOs); (4) is a non-independent, non-executive director on the board of a U.S. domestic issuer where less than two-thirds of the directors are independent; (5) is a non-independent, non-executive director on the board of a foreign issuer where less than half of the directors are independent; (6) is a non-independent member of the audit committee; (7) is the chair of the nominating or governance committee when the roles of chairman of the board and CEO are combined and there is no lead independent director; (8) served on the compensation committee during a period in which compensation appears excessive relative to performance and peers; or (9) served on a board that did not implement a shareholder proposal that the Adviser supported and received more than 50% shareholder support the previous year.

In addition, the Adviser will generally vote in favor of: (10) a full slate of directors, where the directors are elected as a group and not individually, unless more than half of the nominees are not independent; (11) shareholder proposals to declassify the board of directors; (12) shareholder proposals to require a majority voting standard in the election of directors; (13) shareholder proposals to separate the roles of chairman of the board and CEO; (14) a proposal to require a company's audit committee to be comprised entirely of independent directors; and (15) shareholder proposals to eliminate supermajority voting requirements in company bylaws.

On other matters of corporate governance, generally, the Adviser will vote: (1) in favor of proposals to grant shareholders the right to call a special meeting if owners of at least 10% of the outstanding stock agree; (2) on a case-by-case basis for shareholder proposals to grant shareholders the right to act by written consent when the company does not already grant shareholders the right to call a special meeting; (3) on a case-by-case basis for proposals to adopt or amend shareholder rights plans (also known as "poison pills"); and (4) in favor of shareholder proposals calling for "Proxy Access," that is, a bylaw change allowing shareholders owning at least 3% of the outstanding common stock for at least three years to nominate candidates for election to the board of directors.

Generally, the Adviser will vote every shareholder proposal of an environmental or social nature on a case-by-case basis. The quality of these shareholder proposals varies widely across markets. Similarly, company disclosures of their business practices related to environmental and social risks are not always adequate for investors to make risk assessments. Thus, the Adviser places great importance on company-specific analyses to determine how to vote. Above all, the Adviser will vote in a manner that would enhance the long-term value of the investment within the framework of the client's investment objectives.

Shareholder Proposals on Environmental and Social Issues

The Adviser's general approach to analyzing these proposals calls for considering the language of the written proposal, the financial materiality of the proposal's objective and the practices followed by industry peers. This analysis utilizes research reports from the Adviser's proxy advisors, company filings, as well as reports published by the company and other outside organizations.

With respect to specific categories of proposals:

Environmental

The Adviser will generally support proposals calling for enhanced reporting on the company's business practices, including policies, strategic initiatives and oversight mechanisms, related to environmental risks. To reach a final voting decision, we will take into consideration:

- The company's current level of publicly available disclosure.
- Whether the company has formally committed to implementation of a reporting program based on frameworks such as the SASB materiality standards or the TCFD recommendations.
- Whether the company's current level of disclosure is comparable to that of industry peers; and
- Whether there are significant controversies or litigation associated with the company's environmental performance.

Social

The Adviser will generally support resolutions in the social category when they call for measures to enhance disclosure that would enable investors to make better risk assessments of the company's social issues, such as their human capital management practices. We will generally oppose proposals calling for a change in the company's product line or methods of distribution.

Political Activities

The Adviser will generally support enhanced disclosure of policies, practices and oversight of corporate political activity when the current level of disclosure falls short of disclosure provided by industry peers. We will oppose proposals prohibiting the company's participation in any part of the political process, such as making political contributions and joining trade associations.

Capital Structure

On matters of capital structure, generally, the Adviser will vote proxies for U.S. issuers on a case-by-case basis for proposals to authorize the issuance of new shares if not connected to an M&A transaction and the potential dilution is more than 10%, against proposals to create multiple-class voting structures where one class has superior voting rights to the other classes, in favor of proposals to authorize reverse stock splits unless the amount of authorized shares is not also reduced proportionately. Generally, the Adviser will vote proxies for non-U.S. issuers in favor of proposals to authorize issuance of shares with and without pre-emptive rights unless the size of the authorities would threaten to unreasonably dilute existing shareholders.

Executive Compensation

Votes on executive compensation come in many forms, including advisory votes on U.S. executive compensation plans ("Say On Pay"), advisory and binding votes on the design or implementation of non-U.S. executive remuneration plans and votes to approve new equity plans or amendments to existing plans. Generally, the Adviser will support compensation arrangements that are aligned with the client's long-term investment objectives.

With respect to specific categories of proposals:

Say on Pay

The Adviser will generally vote in favor of these proposals unless the plan has failed to align executive compensation with corporate performance, or the design of the plan is likely to lead to misalignment in the future. We support the principle of an annual shareholder vote on executive pay and will generally vote accordingly on proposals which set the frequency of the Say On Pay vote.

Remuneration Policy

In some markets, shareholders are provided a vote on the remuneration policy, which sets out the structural elements of a company's executive compensation plan on a forward-looking basis. The Adviser will generally support these proposals unless:

- The design of the remuneration policy fails to appropriately link executive compensation with corporate performance.
- Total compensation appears excessive relative to the company's industry peer group considering local market dynamics; or
- There is insufficient disclosure to enable an informed judgment, particularly as it relates to the disclosure of the maximum amounts of compensation that may be awarded.

Remuneration Report

Markets with remuneration policy proposals typically also have proposals asking shareholders to approve the annual remuneration report. The remuneration report provides shareholders with details concerning the implementation in the previous year of the remuneration policy. The Adviser will generally support these proposals unless the level of disclosure is not sufficient to permit an evaluation of the company's pay practices in the period covered by the report. A vote against the remuneration policy, which in most markets is not an annual voting item, would not necessarily result in votes against the remuneration report at subsequent shareholder meetings.

Equity Plans

The Adviser will generally vote in favor of equity plan proposals unless they:

- Result in unreasonable dilution to existing shareholders.
- Permit replacement of "underwater" options with new options on more favorable terms for the recipient; or
- Omit the criteria for determining the granting or vesting of awards.

M&A Activity

On matters relating to corporate transactions, the Adviser will generally vote in favor of mergers, acquisitions, and sales of assets if the Adviser's analysis of the proposed business strategy and the transaction price would have a positive impact on the total return for shareholders.

Contested Elections

If a shareholders meeting is contested – that is, shareholders are presented with a set of director candidates nominated by company management and a set of director candidates nominated by a dissident shareholder – the Adviser will study the proposed business strategies of both groups and vote in a way that maximizes expected total return for the Fund.

Cost/Benefit Analysis

In addition, the Adviser will not vote any proxy if it determines that the consequences or costs of voting outweigh the potential benefit of voting. For example, if a foreign market requires shareholders voting proxies to retain the voted shares until the meeting date (thereby rendering the shares “illiquid” for some period), the Adviser will not vote proxies for such shares. In addition, the Adviser is not obligated to incur any expense to send a representative to a shareholder meeting or to translate proxy materials into English.

Securities Lending Recall

To the extent that the Adviser is permitted to loan securities, the Adviser does not have the right to vote on securities while they are on loan. However, the Adviser will take all reasonable steps to recall shares prior to the record date when the meeting raises issues that the Adviser believes materially affect shareholder value, provided that the Adviser considers that the benefits of voting on the securities are greater than the associated costs, including the opportunity cost of the lost revenue that would otherwise be generated by the loan. However, there can be no assurance that the Adviser will have sufficient notice of such matters to be able to terminate the loan in time to vote thereon.

Issuer Feedback

The Adviser will consider feedback from issuers on the voting recommendations of the Adviser’s proxy advisory firm if the feedback is provided at least five days before the voting cut-off date. In certain circumstances, primarily those where the Adviser’s voting policy is absolute and without exception, issuer feedback will not be part of the voting decision. For example, it is the Adviser’s policy to always support a shareholder proposal to separate the roles of chairman of the board and CEO. Thus, any comments from the issuer opposing this proposal would not be considered.

Best Efforts

If proxies are not delivered in a timely or otherwise appropriate basis, the Adviser may not be able to vote a particular proxy.

For an Adviser that employs a quantitative investment strategy for certain funds or accounts that does not make use of qualitative research (“Non-Qualitative Accounts”), the Adviser may not have the kind of research to make decisions about how to vote proxies for them. Therefore, the Adviser will vote the proxies of these Non-Qualitative Accounts as follows: (a) in accordance with the Standard Voting Instructions (defined below); (b) if the Adviser is casting votes for the same proxy on behalf of a regular qualitative account and a Non-Qualitative Account, the Non-Qualitative Account would vote in the same manner as the regular qualitative account; (c) if neither of the first two conditions apply, as the proxy advisory firm is recommending; and (d) if none of the previous conditions apply, as recommended by the Proxy Voting Committee.

Proxy Voting Procedures

The Adviser has established a Proxy Voting Committee (“Proxy Committee”), to exercise all voting discretion granted to the Adviser by the Board in accordance with the proxy voting policies. To assist it in carrying out the day-to-day operations related to proxy voting, the Proxy Committee has created the Proxy Voting Management Group (PVMG). The day-to-day operations related to proxy voting are carried out by the Proxy Voting Operations Team (PVOT) and overseen by the PVMG. Besides voting the proxies, this work includes engaging with investee companies on corporate governance matters, managing the proxy advisory firm, soliciting voting recommendations from the Adviser’s investment professionals, bringing voting recommendations to the Proxy Committee for approval, filing with regulatory agencies any required proxy voting reports, providing proxy voting reports to clients and investment companies as they are requested from time to time and keeping the Proxy Committee informed of any issues related to corporate governance and proxy voting.

The Adviser has compiled a list of specific voting instructions based on the General Policy (the “Standard Voting Instructions”). The Standard Voting Instructions and any modifications to them are approved by the Proxy Committee. The Standard Voting Instructions sometimes call for an investment professional to review the ballot question and provide a voting recommendation to the Proxy Committee (a “case-by-case vote”). The foregoing notwithstanding, the Proxy Committee always has the authority to determine a final voting decision.

The Adviser has hired a proxy advisory firm to perform various proxy voting related administrative services such as ballot reconciliation, vote processing and recordkeeping functions. The Proxy Committee has supplied the proxy advisory firm with the Standard Voting Instructions. The Proxy Committee retains the right to modify the Standard Voting Instructions at any time or to vote contrary to them at any time to cast proxy votes in a manner that the Proxy Committee believes is in accordance with the

General Policy. The proxy advisory firm may vote any proxy as directed in the Standard Voting Instructions without further direction from the Proxy Committee. However, if the Standard Voting Instructions require case-by-case handling for a proposal, the PVOT will work with the investment professionals and the proxy advisory firm to develop a voting recommendation for the Proxy Committee and to communicate the Proxy Committee's final voting decision to the proxy advisory firm. Further, if the Standard Voting Instructions require the PVOT to analyze a ballot question and make the final voting decision, the PVOT will report such votes to the Proxy Committee on a quarterly basis for review.

Conflicts of Interest

The Adviser has adopted procedures to address situations where a matter on which a proxy is sought may present a potential conflict between the interests of the Fund (and its shareholders) and those of the Adviser or Distributor. This may occur where a significant business relationship exists between the Adviser (or its affiliates) and a company involved with a proxy vote.

A company that is a proponent, opponent, or the subject of a proxy vote, and which to the knowledge of the Proxy Committee has this type of significant business relationship, is referred to below as an "Interested Company."

The Adviser has implemented the following procedures to avoid concerns that the conflicting interests of the Adviser or its affiliates have influenced proxy votes. Any employee of the Adviser or its affiliates who is contacted by an Interested Company regarding proxies to be voted by the Adviser must refer the Interested Company to a member of the Proxy Committee and must inform the Interested Company that the Proxy Committee has exclusive authority to determine how the proxy will be voted. Any Proxy Committee member contacted by an Interested Company must report it to the full Proxy Committee and provide a written summary of the communication. This requirement includes engagement meetings with investee companies and does not include communications with proxy solicitation firms. Under no circumstances will the Proxy Committee or any member of the Proxy Committee make a commitment to an Interested Company regarding the voting of proxies or disclose to an Interested Company how the Proxy Committee has directed such proxies to be voted. If the Standard Voting Instructions already provide specific direction on the proposal in question, the Proxy Committee shall not alter or amend such directions. If the Standard Voting Instructions require the Proxy Committee to provide further direction, the Proxy Committee shall do so in accordance with the proxy voting policies, without regard for the interests of the Adviser with respect to the Interested Company. If the Proxy Committee provides any direction as to the voting of proxies relating to a proposal affecting an Interested Company, it must disclose annually to the Fund's Board information regarding: the significant business relationship; any material communication with the Interested Company; the matter(s) voted on; and how, and why, the Adviser voted as it did. In certain circumstances it may be appropriate for the Adviser to vote in the same proportion as all other shareholders, to not affect the outcome beyond helping to establish a quorum at the shareholders' meeting. This is referred to as "proportional voting." If the Fund owns shares of another Federated Hermes mutual fund, generally the Adviser will proportionally vote the client's proxies for that fund or seek direction from the Board or the client on how the proposal should be voted. If the Fund owns shares of an unaffiliated mutual fund, the Adviser may proportionally vote the Fund's proxies for that fund depending on the size of the position. If the Fund owns shares of an unaffiliated exchange-traded fund, the Adviser will proportionally vote the Fund's proxies for that fund.

Downstream Affiliates

If the Proxy Committee gives further direction, or seeks to vote contrary to the Standard Voting Instructions, for a proxy relating to a portfolio company in which the Fund owns more than 10% of the portfolio company's outstanding voting securities at the time of the vote ("Downstream Affiliate"), the Proxy Committee must first receive guidance from counsel to the Proxy Committee as to whether any relationship between the Adviser and the portfolio company, other than such ownership of the portfolio company's securities, gives rise to an actual conflict of interest. If counsel determines that an actual conflict exists, the Proxy Committee must address any such conflict with the executive committee of the board of directors or trustees of any investment company client prior to taking any action on the proxy at issue.

Proxy Advisers' Conflicts of Interest

Proxy advisory firms may have significant business relationships with the subjects of their research and voting recommendations. For example, a significant vendor for a proxy advisory firm may be a public company with an upcoming shareholders' meeting and the proxy advisory firm has published a research report with voting recommendations. In another example, a proxy advisory firm consulting client may be a public company for which the proxy advisory firm will write a research report. These and similar situations give rise to an actual or apparent conflict of interest.

To avoid concerns that the conflicting interests of proxy advisory firms have influenced their proxy voting recommendations, the Adviser will take the following steps:

- A due diligence team made up of employees of the Adviser and/or its affiliates will meet with its primary proxy advisor on an annual basis and determine through a review of their policies and procedures and through inquiry that they have established a system of internal controls that provide reasonable assurance that their voting recommendations are not influenced by their various conflicts of interest.
- On an annual basis the Director of Proxy Voting will examine a sample of a proxy advisory firm's research reports for that firm's institutional consulting clients and determine if evidence of bias in recommendations exists. If such evidence is found, the results of the examination will be presented to the Proxy Management Group and a decision would be made as to the further use of that advisory firm's research reports.
- Whenever the standard voting guidelines call for voting a proposal in accordance with a proxy advisory firm's recommendation and the proxy advisory firm has disclosed that they have a conflict of interest with respect to that issuer, the PVOT will take the following steps: (a) the PVOT will obtain a copy of the research report published by a proxy advisory firm for that issuer; (b) the Director of Proxy Voting, or their designee, will review proxy advisory firm reports and determine what vote will be cast. The PVOT will report all proxies voted in this manner to the Proxy Committee on a quarterly basis. Alternatively, the PVOT may seek direction from the Committee on how the proposal shall be voted.

Proxy Voting Report

A report on "Form N-PX" of how the Fund voted any proxies during the most recent 12-month period ended June 30 is available via the Proxy Voting Record (Form N-PX) link associated with the Fund and share class name at FederatedHermes.com/us/FundInformation. Form N-PX filings are also available (i) without charge, upon request, by calling the Fund at 1-800-341-7400, Option #4; and (ii) on the SEC's website at sec.gov.

PORTFOLIO HOLDINGS INFORMATION

On each Business Day, prior to the opening of regular trading on its primary listing exchange, the Fund discloses on FederatedHermes.com/us the portfolio holdings that will form the basis of the Portfolio's next NAV per share calculation as required by Rule 6c-11. The Fund also expects to make available through the facilities of the NSCC prior to the opening of trading on each Business Day, a basket composition file, which includes the names and share quantities of the Fund's portfolio holdings.

Summary portfolio composition information as of the close of each month is posted on FederatedHermes.com/us 15 days (or the next business day) after month-end and remains posted until replaced by the information for the succeeding month. The summary portfolio composition information may include: identification of the Fund's top 10 holdings, recent purchase and sale transactions and percentage breakdowns of the portfolio by sector and credit quality. In addition, portfolio holdings information may also be made available to certain entities, including Trust service providers and institutional market participants, as described below.

You may also access portfolio information as of the end of the Fund's fiscal quarters via the link to the Fund at FederatedHermes.com/us. The Fund's Form N-CSR contains complete listings of the Fund's portfolio holdings as of the end of the Fund's second and fourth fiscal quarters. Fiscal quarter information is made available on the website within 70 days after the end of the fiscal quarter. This information is also available in reports filed with the SEC at the SEC's website at sec.gov.

Each fiscal quarter, the Fund will file with the SEC a complete schedule of its monthly portfolio holdings on "Form N-PORT." The Fund's holdings as of the end of the third month of every fiscal quarter, as reported on Form N-PORT, will be publicly available on the SEC's website at sec.gov within 60 days of the end of the fiscal quarter upon filing. You may also access this information via the link to the Fund and share class name at FederatedHermes.com/us.

The disclosure policy of the Fund and the Adviser prohibits the disclosure of portfolio holdings information to any investor or intermediary before the same information is made available to other investors. Employees of the Adviser or its affiliates who have access to nonpublic information concerning the Fund's portfolio holdings are prohibited from trading securities on the basis of this information. Such persons must report all personal securities trades and obtain pre-clearance for all personal securities trades other than mutual fund shares.

Firms that provide administrative, custody, financial, accounting, legal or other services to the Fund may receive nonpublic information about Fund portfolio holdings for purposes relating to their services. The Fund may also provide portfolio holdings information to publications that rate, rank or otherwise categorize investment companies. Traders or portfolio managers may provide "interest" lists to facilitate portfolio trading if the list reflects only that subset of the portfolio for which the trader or portfolio manager is seeking market interest. A list of service providers, publications and other third parties who may receive nonpublic portfolio holdings information appears in the Appendix to this SAI.

Except as provided below, the furnishing of nonpublic portfolio holdings information to any third party (other than authorized governmental or regulatory personnel) requires the prior approval of the President of the Adviser and of the Chief Compliance Officer of the Fund. The President of the Adviser and the Chief Compliance Officer will approve the furnishing of nonpublic portfolio holdings information to a third party only if they consider the furnishing of such information to be in the best interests of the Fund and its shareholders. In that regard, and to address possible conflicts between the interests of Fund shareholders and those of the Adviser and its affiliates, the following procedures apply. No consideration may be received by the Fund, the Adviser, any affiliate of the Adviser or any of their employees in connection with the disclosure of portfolio holdings information. Before information is furnished, the third party must sign a written agreement that it will safeguard the confidentiality of the information, will use it only for the purposes for which it is furnished and will not use it in connection with the trading of any security. Persons approved to receive nonpublic portfolio holdings information will receive it as often as necessary for the purpose for which it is provided. Such information may be furnished as frequently as daily and often with no time lag between the date of the information and the date it is furnished. The Board receives and reviews annually a list of the persons who receive nonpublic portfolio holdings information and the purposes for which it is furnished.

In addition, Authorized Participants may obtain information about the securities the Fund is willing to accept for a creation, and securities that the Fund is willing to provide on a redemption. When they do so, under the Participant Agreement, they must treat the information as material non-public information subject to their own codes of ethics.

Finally, the Adviser's employees may also discuss portfolio holdings-related information with brokers and dealers, in connection with executing and/or settling the Fund's transactions, as may be necessary to conduct business in the ordinary course. When they do so, they are under a regulatory obligation not to trade on it in a manner that may adversely affect the Fund.

BROKERAGE TRANSACTIONS AND INVESTMENT ALLOCATION

Equity securities may be traded in the over-the-counter market through broker/dealers acting as principal or agent, or in transactions directly with other investors. Transactions may also be executed on a securities exchange or through an electronic communications network. The Adviser seeks to obtain best execution of trades in equity securities by balancing the costs inherent in trading, including opportunity costs, market impact costs and commissions. As a general matter, the Adviser seeks to add value to its investment management by using market information to capitalize on market opportunities, actively seek liquidity and discover price. The Adviser continually monitors its trading results in an effort to improve execution. Fixed-income securities are generally traded in an over-the-counter market on a net basis (i.e., without commission) through dealers acting as principal or in transactions directly with the issuer. Dealers derive an undisclosed amount of compensation by offering securities at a higher price than they bid for them. Some fixed-income securities may have only one primary market maker. The Adviser seeks to use dealers it believes to be actively and effectively trading the security being purchased or sold, but may not always obtain the lowest purchase price or highest sale price with respect to a fixed-income security. The Adviser's receipt of research services (as described below) may also be a factor in the Adviser's selection of brokers and dealers. The Adviser may also direct certain portfolio trades to a broker that, in turn, pays a portion of the Fund's operating expenses. The Adviser makes decisions on portfolio transactions and selects brokers and dealers subject to review by the Fund's Board.

Investment decisions for the Fund are made independently from those of other accounts managed by the Adviser and accounts managed by affiliates of the Adviser. Except as noted below, when the Fund and one or more of those accounts invests in, or disposes of, the same security, available investments or opportunities for sales will be allocated among the Fund and the account(s) in a manner believed by the Adviser to be equitable. While the coordination and ability to participate in volume transactions may benefit the Fund, it is possible that this procedure could adversely impact the price paid or received and/or the position obtained or disposed of by the Fund. Investments for Federated Hermes Kaufmann Fund and other accounts managed by that fund's portfolio managers in initial public offerings (IPO) are made independently from any other accounts, and much of their non-IPO trading may also be conducted independently from other accounts. Trading and allocation of investments, including IPOs, for accounts managed by Federated MDTA LLC are also made independently from the Fund. Investment decisions and trading for certain separately managed or wrap-fee accounts, and other accounts, of the Adviser and/or certain investment adviser affiliates of the Adviser also are generally made and conducted independently from the Fund. It is possible that such independent trading activity could adversely impact the prices paid or received and/or positions obtained or disposed of by the Fund.

Brokerage and Research Services

Brokerage services include execution of trades and products and services that relate to the execution of trades, including communications services related to trade execution, clearing and settlement, trading software used to route orders to market centers, software that provides algorithmic trading strategies and software used to transmit orders to direct market access (DMA) systems. Research services may include: advice as to the advisability of investing in securities; security analysis and reports; economic studies; industry studies; receipt of quotations for portfolio evaluations; and similar services. Research services assist

the Adviser and its affiliates in terms of their overall investment responsibilities to funds and investment accounts for which they have investment discretion. However, particular brokerage and research services received by the Adviser and its affiliates may not be used to service every fund or account, and may not benefit the particular funds and accounts that generated the brokerage commissions. In addition, brokerage and research services paid for with commissions generated by the Fund may be used in managing other funds and accounts. To the extent that receipt of these services may replace services for which the Adviser or its affiliates might otherwise have paid, it would tend to reduce their expenses. The Adviser and its affiliates exercise reasonable business judgment in selecting brokers to execute securities transactions where receipt of research services is a factor. They determine in good faith that commissions charged by such persons are reasonable in relationship to the value of the brokerage and research services provided.

Because the Fund had not commenced operations as of the date of the SAI, the Fund did not own any securities of its “regular broker-dealers.”

ADMINISTRATOR

Federated Administrative Services (FAS), a subsidiary of Federated Hermes, provides administrative personnel and services, including certain legal, compliance and financial administrative services (“Administrative Services”), necessary for the operation of the Fund. FAS provides Administrative Services for a fee based upon the rates set forth below paid on the average daily net assets of the Fund. For purposes of determining the appropriate rate breakpoint, “Investment Complex” is defined as all of the Federated Hermes funds subject to a fee under the Administrative Services Agreement with FAS. FAS is also entitled to reimbursement for certain out-of-pocket expenses incurred in providing Administrative Services to the Fund.

Administrative Services Fee Rate	Average Daily Net Assets of the Investment Complex
0.100%	on assets up to \$50 billion
0.075%	on assets over \$50 billion

CUSTODIAN

The Bank of New York Mellon, New York, New York, is custodian for the securities and cash of the Fund.

TRANSFER AGENT AND DIVIDEND DISBURSING AGENT

The Bank of New York Mellon, New York, New York, the Fund’s registered transfer agent, maintains all necessary shareholder records.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The independent registered public accounting firm for the Fund, KPMG LLP, conducts its audits in accordance with the standards of the Public Company Accounting Oversight Board (United States), which require it to plan and perform its audits to provide reasonable assurance about whether the Fund’s financial statements and financial highlights are free of material misstatement.

SECURITIES LENDING ACTIVITIES

The services provided to the Fund by Citibank, N.A. as securities lending agent may include the following: selecting securities previously identified by the Fund as available for loan to be loaned; locating borrowers identified in the securities lending agency agreement; negotiating loan terms; monitoring daily the value of the loaned securities and collateral; requiring additional collateral as necessary; marking to market non-cash collateral; instructing the Fund’s custodian with respect to the transfer of loaned securities; indemnifying the Fund in the event of a borrower default; and arranging for return of loaned securities to the Fund at loan termination.

As a new fund, the Fund has not yet completed its first fiscal year and cannot yet report on any securities lending activities for the most recently completed fiscal year.

Financial Information

The Fund became effective on July 26, 2024 and its first fiscal year will end on February 28, 2025. Accordingly, no financial information is yet available for the Fund.
