This report describes changes to the Fund that occurred during the reporting period.

What were the Fund costs for the last year?

(Based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class R6 Shares	\$61	0.57%

Management's Discussion of Fund Performance

The following discussion compares the performance of the Fund to the ICE BofA Global High Yield Constrained USD Hedged Index to show how the Fund's performance compares to the returns of similar investments for the reporting period. See the Average Annual Total Returns table below for the returns of the Fund and related indexes, including the Bloomberg Global Aggregate Index, which represents the overall global investment-grade debt market. The Fund seeks to provide current income and long-term capital appreciation alongside positive societal impact.

Top Contributors to Performance

- From a sector allocation perspective, the Fund's overweight positioning in Banking, Utility and Basic Industry were top contributors to its relative performance.
- The Fund's overweight exposure to European and UK Banks contributed to returns with Natwest, Barclays and BNP Paribas recording strong returns over the period.
- From a regional perspective, the Fund's overweight positioning in Western Europe and the UK contributed to relative performance.
- Performance was positively affected during the reporting period by the Fund's use of credit default swap index contracts as a proxy for market beta. The Fund also made use of U.S. Treasury notes and short government bond futures to manage performance-at-risk that can arise from changes in interest rates. As such, contribution from Fund performance attributed to interest rate duration was additive to the performance of these securities.

Top Detractors from Performance

- From a sector allocation perspective, the Fund's underweight positioning in the more cyclical sectors such as Leisure and Energy detracted the most from performance.
- At the individual holdings level, the Fund's lack of exposure to Charter Communications (Media) and Petroleos Mexicanos (Energy) as well as its overweight exposure to Ardagh (Capital Goods) detracted the most from performance.
- From a ratings standpoint, the Fund's underweight positioning in lower quality-rated securities (B-rated and below) detracted the most as these outperformed over the period.

Fund Performance

Keep in mind that the Fund's past performance is not a good predictor of how the Fund will perform in the future. The graph and table do not reflect the deduction of taxes that a shareholder would pay on fund distributions or redemption of fund shares.

Cumulative Performance: September 26, 2019 through August 31, 2024

Initial Investment of \$10,000

Average Annual Total Returns

	1 Year	Since Inception
Class R6 Shares ¹	12.91%	3.88%
Bloomberg Global Aggregate Index ²	6.90%	-1.21%
ICE BofA Global High Yield Constrained USD Hedged Index	13.39%	3.91%
Lipper Global High Yield Funds	12.05%	3.55%

¹ The Fund's Class R6 Shares commenced operations on June 11, 2021. For the periods prior to the commencement of operations of the Fund's Class R6 Shares, the performance information shown is for the Fund's Institutional Shares, which commenced operations on September 26, 2019. The performance of the Institutional Shares has not been adjusted to reflect the expenses of the Class R6 Shares, since the Class R6 Shares have a lower expense ratio than the Institutional Shares.

² The Fund has designated the Bloomberg Global Aggregate Index as its new broad-based securities market index in accordance with the SEC's revised definition for such an index.
