Federated Hermes Short Duration Corporate ETF

A Portfolio of Federated Hermes ETF Trust

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus and other information about the Fund, including the Statement of Additional Information and most recent reports to shareholders, online at FederatedHermes.com/us/FundInformation. You can also get this information at no cost by calling 1-800-341-7400, by sending an email request via Contact Us on FederatedHermes.com/us, or from a financial intermediary through which Shares of the Fund may be bought or sold. The Fund's Prospectus and Statement of Additional Information, both dated June 30, 2024, are incorporated by reference into this Summary Prospectus.

A fund seeking to provide current income by investing in a diversified portfolio of investment-grade, fixed-income securities.

As with all funds, the Securities and Exchange Commission (SEC) has not approved or disapproved these securities or passed upon the adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

Not FDIC Insured • May Lose Value • No Bank Guarantee

Fund Summary Information

Federated Hermes Short Duration Corporate ETF (the "Fund")

RISK/RETURN SUMMARY: INVESTMENT OBJECTIVE

The Fund's investment objective is to seek current income.

RISK/RETURN SUMMARY: FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold and sell the Fund's Shares (Shares). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.**

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.39%
Distribution (12b-1) Fee ¹	0.00%
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.39%
Fee Waivers and/or Expense Reimbursements ²	(0.09)%
Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements ...	0.30%

- 1 The Fund has adopted a Distribution (12b-1) Plan pursuant to which the Fund may incur and pay a Distribution (12b-1) Fee of up to a maximum of 0.25%. No such fee is currently incurred and paid by the Fund. The Fund will not incur and pay such a Distribution (12b-1) Fee until such time as approved by the Fund's Board of Trustees ("Trustees").
- 2 The Adviser and certain of its affiliates have agreed to waive certain amounts of their respective fees and/or reimburse expenses. Total annual fund operating expenses (excluding acquired fund fees and expenses, interest expense, taxes, litigation expenses, extraordinary expenses and proxy-related expenses paid by the Fund, if any) paid by the Fund (after the waivers and/or reimbursements) will not exceed 0.29% (the "Fee Limit") up to but not including the later of (the "Termination Date"): (a) July 1, 2025; or (b) the date of the Fund's next effective Prospectus. These arrangements may only be terminated or the Fee Limit increased prior to the Termination Date with the agreement of the Trustees.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 for the time periods indicated and then redeem or hold all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that operating expenses remain the same. The Example does not reflect sales charges (loads) on reinvested dividends. If these sales charges (loads) were included, your costs would be higher. Although your actual costs and returns may be higher or lower, based on these assumptions your costs would be:

1 Year	\$ 40
3 Years	\$125
5 Years	\$219
10 Years	\$493

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 75% of the average value of its portfolio.

RISK/RETURN SUMMARY: INVESTMENTS, RISKS AND PERFORMANCE

What are the Fund’s Main Investment Strategies?

The Fund primarily invests in a diversified portfolio of investment-grade, fixed-income securities consisting primarily of corporate debt securities. Corporate debt securities, including notes, bonds, debentures and commercial paper, are fixed income securities usually issued by businesses to finance their operations. The Fund’s investment adviser (the “Adviser”) seeks to enhance the Fund’s performance by allocating relatively more of its portfolio to the security type that the Adviser expects to offer the best balance between current income and risk. Some of the corporate debt securities in which the Fund invests are considered to be “foreign securities,” which are securities of issuers based outside of the United States. The foreign securities in which the Fund invests will be predominately denominated in U.S. dollars. The Fund may invest up to 10% of its assets in fixed-income securities rated below investment grade. Noninvestment-grade securities may also be referred to as below investment-grade securities (“junk bonds” or high yield securities”). To pursue the Fund’s investment strategy, the Adviser can invest in instruments directly or through investing in other investment companies, including, for example, affiliated funds advised by the Adviser or its affiliates.

The Fund may also invest in U.S. Treasury securities, U.S. government agency securities, (including mortgage-backed securities issued or guaranteed by U.S. government agencies or instrumentalities), mortgage-backed securities (MBS), asset-backed securities and commercial mortgage-backed securities (CMBS).

The Fund may invest in derivative contracts, in particular, futures contracts, option contracts and swap contracts, to implement its investment strategies. For example, the Fund may use derivative contracts to increase or decrease the portfolio's exposure to the investment(s) underlying the derivative in an attempt to benefit from changes in the value of the underlying investment(s). There can be no assurance that the Fund's use of derivative contracts will work as intended. Derivative investments made by the Fund are included within the Fund's 80% policy (as described below) and are calculated at market value. Consistent with the Bloomberg US Corporate 1-5 Year Index, the Fund's benchmark, the Fund may, from time to time, have larger allocations to certain broad market sectors in attempting to achieve its investment objective.

The Adviser may lengthen or shorten duration from time to time based on its interest rate outlook, but, under normal market conditions, the Fund's dollar-weighted average effective duration is expected to be within a range of 1.5 to 3.5 years. Duration measures the price sensitivity of a fixed-income security to changes in interest rates.

The Fund will invest its assets so that at least 80% of its net assets (plus any borrowings for investment purposes) are invested in corporate fixed-income investments. The Fund will notify shareholders at least 60 days in advance of any change in its investment policy that would enable the Fund to invest, under normal circumstances, less than 80% of its net assets in corporate fixed-income investments.

What are the Main Risks of Investing in the Fund?

All funds take investment risks. Therefore, it is possible to lose money by investing in the Fund. The primary factors that may reduce the Fund's returns include:

- **Interest Rate Risk.** Prices of fixed-income securities generally fall when interest rates rise. The longer the duration of a fixed-income security, the more susceptible it is to interest rate risk. Recent and potential future changes in monetary policy made by central banks and/or their governments are likely to affect the level of interest rates.
- **Issuer Credit Risk.** It is possible that interest or principal on securities will not be paid when due. Such non-payment or default may reduce the value of the Fund's portfolio holdings, its share price and its performance.
- **Counterparty Credit Risk.** Credit risk includes the possibility that a party to a transaction involving the Fund will fail to meet its obligations. This could cause the Fund to lose money or to lose the benefit of the transaction or prevent the Fund from selling or buying other securities to implement its investment strategy.

- **Liquidity Risk.** The fixed-income securities in which the Fund invests may be less readily marketable and may be subject to greater fluctuation in price than other securities. Liquidity risk also refers to the possibility that the Fund may not be able to sell a security or close out a derivative contract when it wants to. If this happens, the Fund could incur losses.
- **Risk of Foreign Investing.** Because the Fund invests in securities issued by foreign companies and national governments, the Fund's Share price may be more affected by foreign economic and political conditions, taxation policies and accounting and auditing standards than would otherwise be the case.
- **Call Risk.** The Fund's performance may be adversely affected by the possibility that an issuer of a security held by the Fund may redeem the security prior to maturity at a price below its current market value.
- **Risk Associated with Noninvestment-Grade Securities.** Securities rated below investment grade may be subject to greater interest rate, credit and liquidity risks than investment-grade securities. These securities are considered speculative with respect to the issuer's ability to pay interest and repay principal.
- **Underlying Fund Risk.** The risk that the Fund's performance is closely related to the risks associated with the securities and other investments held by underlying funds and that the ability of a Fund to achieve its investment objective will depend upon the ability of underlying funds to achieve their respective investment objectives. The Fund bears Underlying Fund fees and expenses indirectly.
- **ETF Risk.** As an ETF, the Fund is subject to the following risks:

Authorized Participants Concentration Risk. To the extent that the Fund invests in instruments that trade outside of a collateralized settlement system, it may have a limited number of financial institutions that act as Authorized Participants. To the extent they cannot or are otherwise unwilling to engage in creation and redemption transactions with the Fund and no other Authorized Participant steps in, trading in Shares of the Fund may be significantly diminished, bid-ask spreads may widen, and the market price of Shares may represent a significant discount to net asset value (NAV). Shares may also face delisting from the Exchange.

Premium/Discount Risk. There may be times when the market price of the Fund's Shares is more than the NAV intra-day (i.e., the market price represents a premium to NAV) or less than the NAV intra-day (i.e., the market price represents a discount to NAV) and when bid-ask spreads widen. As a result, shareholders of the Fund may pay more than NAV when purchasing Shares and receive less than NAV when selling Fund Shares. This risk is heightened in times of market volatility and in steep market declines. In addition, a Fund's end-of-day market price may deviate from its NAV to the extent that the Fund invests in foreign securities whose local trading markets close before the U.S. market closes because, although

the Fund may value such securities at their local market closing prices for purposes of calculating NAV, the broader market may assign them a different value, including due to after-hours developments in their local markets, which may be reflected in the market price of Shares.

Secondary Market Trading Risk. Investors buying or selling Shares in the secondary market will normally pay brokerage commissions, which are often a fixed amount and may be a significant proportional cost for investors buying or selling relatively small amounts of Shares. Secondary market trading is subject to bid-ask spreads and trading in Fund Shares may be halted by the Exchange because of market conditions or other reasons. If a trading halt occurs, a shareholder may temporarily be unable to purchase or sell Shares of the Fund. In addition, although the Fund's Shares are listed on the Exchange, there can be no assurance that an active trading market for Shares will develop or be maintained, that bid-ask spreads will be narrow, or that the Fund's Shares will continue to be listed.

Cash Transactions Risk. Like other ETFs, the Fund sells and redeems its Shares only in large blocks called Creation Units and only to Authorized Participants. Unlike most other ETFs, however, the Fund expects to effect its creations and redemptions at least partially or fully for cash, rather than in-kind securities. As a result, an investment in the Fund may incur certain costs, including brokerage costs in connection with investing cash received and may recognize capital gains in connection with cash redemptions, unlike an ETF that effects creations and redemptions only in-kind. In addition, costs could be imposed on the Fund which would have the effect of decreasing the Fund's net asset value to the extent the costs are not offset by a transaction fee payable by an Authorized Participant.

- **Leverage Risk.** Leverage risk is created when an investment exposes the Fund to a level of risk that exceeds the amount invested. Changes in the value of such an investment magnify the Fund's risk of loss and potential for gain.
- **Risk of Investing in Derivative Contracts.** Derivative contracts involve risks different from, or possibly greater than, risks associated with investing directly in securities and other traditional investments. Specific risk issues related to the use of such contracts include valuation and tax issues, increased potential for losses and/or costs to the Fund, and a potential reduction in gains to the Fund. Each of these issues is described in greater detail in this Prospectus. Derivative contracts may also involve other risks described in this Prospectus, such as interest rate, credit, liquidity and leverage risks.
- **Risk Related to the Economy.** The value of the Fund's portfolio may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets. Economic, political and financial conditions, industry or economic trends and developments or public health

risks, such as epidemics or pandemics, may, from time to time, and for varying periods of time, cause the Fund to experience volatility, illiquidity, shareholder redemptions, or other potentially adverse effects.

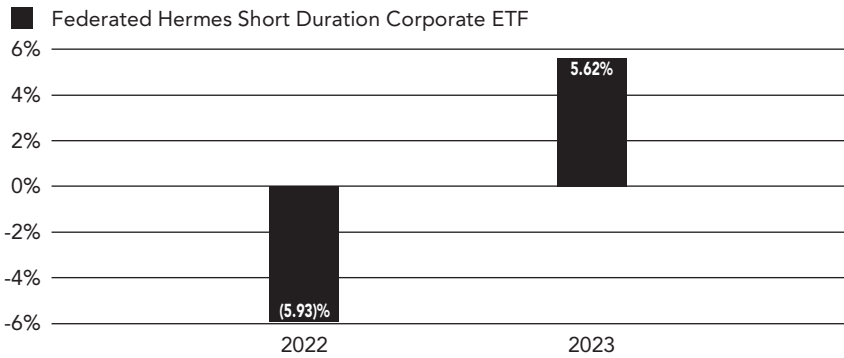

- **Mortgage-Backed Securities (MBS) Risk.** A rise in interest rates may cause the value of MBS held by the Fund to decline. These securities may have exposure to borrowers with weakened credit histories, increasing the potential for default (subprime risk). Certain MBS issued by GSEs are not backed by the full faith and credit of the U.S. government. A non-agency MBS is subject to the risk that the value of such security will decline, because the security is not issued or guaranteed as to principal or interest by the U.S. government or a GSE. The Fund's investments in collateralized mortgage obligations (CMOs) may entail greater market, prepayment and liquidity risks than other MBS. The liquidity of non-agency MBS and CMOs may also change dramatically over time. The non-agency MBS and CMOs in which the Fund invests may be less readily marketable and may be subject to greater fluctuation in price than other securities.
- **Prepayment and Extension Risk.** When homeowners prepay their mortgages in response to lower interest rates, the Fund will be required to reinvest the proceeds at the lower interest rates available. Also, when interest rates fall, the price of mortgage-backed securities may not rise to as great an extent as that of other fixed-income securities. When interest rates rise, homeowners are less likely to prepay their mortgages. A decreased rate of prepayments lengthens the expected maturity of a mortgage-backed security, and the price of mortgage-backed securities may decrease more than the price of other fixed-income securities.
- **Sector Risk.** Because the Fund may allocate relatively more assets to certain industry sectors than others, the Fund's performance may be more susceptible to any developments which affect those sectors emphasized by the Fund.
- **Technology Risk.** The Adviser uses various technologies in managing the Fund, consistent with its investment objective(s) and strategy described in this Prospectus. For example, proprietary and third-party data and systems are utilized to support decision making for the Fund. Data imprecision, software or other technology malfunctions, programming inaccuracies and similar circumstances may impair the performance of these systems, which may negatively affect Fund performance.

The Shares offered by this Prospectus are not deposits or obligations of any bank, are not endorsed or guaranteed by any bank and are not insured or guaranteed by the U.S. government, the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

PERFORMANCE: BAR CHART AND TABLE

Risk/Return Bar Chart

The bar chart and performance table below are intended to help you analyze the Fund's investment risks in light of its historical returns. The bar chart shows the variability of the Fund's total returns on a calendar year-by-year basis. The Average Annual Total Return table shows returns averaged over the stated periods, and includes comparative performance information. The Fund's performance will fluctuate, and past performance (before and after taxes) is not necessarily an indication of future results. Updated performance information for the Fund is available under the "Products" section at FederatedHermes.com/us or by calling 1-800-341-7400.

The Fund's total return for the three-month period from January 1, 2024 to March 31, 2024, was 0.51%.

Within the periods shown in the bar chart, the Fund's highest quarterly return was 3.59% (quarter ended December 31, 2023). Its lowest quarterly return was (3.70)% (quarter ended March 31, 2022).

Average Annual Total Return Table

In addition to Return Before Taxes, Return After Taxes is shown to illustrate the effect of federal taxes on Fund returns. *Actual after-tax returns depend on each investor's personal tax situation, and are likely to differ from those shown.* After-tax returns are calculated using a standard set of assumptions. The stated returns assume the highest historical **federal** income and capital gains tax rates. These after-tax returns do **not** reflect the effect of any applicable **state and local** taxes. After-tax returns are not relevant to investors holding Shares through a 401(k) plan, an Individual Retirement Account or other tax-advantaged investment plan.

(For the Period Ended December 31, 2023)

Fund	1 Year	Since Inception
Inception Date:		12/16/2021
Return Before Taxes	5.62%	(0.29)%
Return After Taxes on Distributions	4.61%	(1.12)%
Return After Taxes on Distributions and Sale of Fund Shares	3.31%	(0.58)%
Bloomberg US Corporate 1-5 Year Index¹ (reflects no deduction for fees, expenses or taxes)	6.20%	0.15%

1 *The Bloomberg US Corporate 1-5 Year Index measures the investment-grade, U.S. dollar-denominated, fixed-rate, taxable corporate and government-related bond markets. The index only includes securities with a maturity between one and five years. It is composed of the Bloomberg US Corporate Index and a non-corporate component that includes foreign agencies, sovereigns, supnationals and local authorities. The Bloomberg US Corporate 1-5 Year Index is not adjusted to reflect sales charges, expenses or other fees that the Securities and Exchange Commission requires to be reflected in the Fund's performance. The index is unmanaged and, unlike the Fund, is not affected by cash flows. It is not possible to invest directly in an index.*

FUND MANAGEMENT

The Fund's Investment Adviser is Federated Investment Management Company.

The Fund's portfolio managers are jointly and primarily responsible for day to day management of the Fund.

John Gentry, CFA, Senior Portfolio Manager, has been the Fund's portfolio manager since its inception in December of 2021.

Robert Matthews, CFA, Portfolio Manager, has been the Fund's portfolio manager since its inception in December of 2021.

PURCHASE AND SALE OF FUND SHARES

The Fund is an exchange-traded fund (ETF). Individual Fund Shares may only be purchased and sold on a national securities exchange through a broker-dealer and may not be purchased or redeemed directly with the Fund. The price of Fund Shares is based on market price, and because ETF shares trade at market prices rather than net asset value (NAV), Shares may trade at a price greater than NAV (a premium) or less than NAV (a discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of a Fund ("bid") and the lowest price a seller is willing to accept for shares ("ask") when buying or selling shares in the secondary market (the "bid-ask spread"). Recent information, including information about the Fund's NAV, market price, premiums and discounts, and bid-ask spreads, is included on the Fund's website at FederatedHermes.com/us.

TAX INFORMATION

The Fund's distributions are taxable as ordinary income or capital gains except when your investment is through a 401(k) plan, an Individual Retirement Account or other tax-advantaged investment plan.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and/or its related companies may pay the intermediary for the sale of Fund Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
