Federated Hermes Short Duration High Yield ETF

A Portfolio of Federated Hermes ETF Trust

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus and other information about the Fund, including the Statement of Additional Information and most recent reports to shareholders, online at FederatedHermes.com/us/FundInformation. You can also get this information at no cost by calling 1-800-341-7400, by sending an email request via Contact Us on FederatedHermes.com/us, or from a financial intermediary through which Shares of the Fund may be bought or sold. The Fund's Prospectus and Statement of Additional Information, both dated April 30, 2024, are incorporated by reference into this Summary Prospectus.

A fund seeking to provide high current income by investing in a diversified portfolio of below investment-grade, fixed-income instruments.

As with all funds, the Securities and Exchange Commission (SEC) has not approved or disapproved these securities or passed upon the adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

Not FDIC Insured • May Lose Value • No Bank Guarantee

Fund Summary Information

Federated Hermes Short Duration High Yield ETF (the "Fund")

RISK/RETURN SUMMARY: INVESTMENT OBJECTIVE

The Fund's investment objective is to seek high current income.

RISK/RETURN SUMMARY: FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold and sell the Fund's Shares (Shares). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.**

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.60%
Distribution (12b-1) Fee ¹	0.00%
Other Expenses	0.00%
Acquired Fund Fees and Expenses	0.01%
Total Annual Fund Operating Expenses	0.61%
Fee Waivers and/or Expense Reimbursements ²	(0.10)%
Total Annual Fund Operating Expenses After Fee Waivers and/or Expense Reimbursements ...	0.51%

- 1 The Fund has adopted a Distribution (12b-1) Plan pursuant to which the Fund may incur and pay a Distribution (12b-1) Fee of up to a maximum of 0.25%. No such fee is currently incurred and paid by the Fund. The Fund will not incur and pay such a Distribution (12b-1) Fee until such time as approved by the Fund's Board of Trustees ("Trustees").
- 2 The Adviser and certain of its affiliates have agreed to waive certain amounts of their respective fees and/or reimburse expenses. Total annual fund operating expenses (excluding Acquired Fund Fees and Expenses, interest expense, taxes, litigation expenses, extraordinary expenses and proxy-related expenses paid by the Fund, if any) paid by the Fund (after the waivers and/or reimbursements) will not exceed 0.50% (the "Fee Limit") up to but not including the later of (the "Termination Date"): (a) July 1, 2025; or (b) the date of the Fund's next effective Prospectus. These arrangements may only be terminated or the Fee Limit increased prior to the Termination Date with the agreement of the Trustees.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 for the time periods indicated and then redeem or hold all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that operating expenses remain the same. Although your actual costs and returns may be higher or lower, based on these assumptions your costs would be:

1 Year	\$ 62
3 Years	\$195
5 Years	\$340
10 Years	\$762

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 94% of the average value of its portfolio.

RISK/RETURN SUMMARY: INVESTMENTS, RISKS AND PERFORMANCE

What are the Fund’s Main Investment Strategies?

The Fund pursues its investment objective by investing primarily in a diversified portfolio of U.S. dollar-denominated, high-yield, fixed-income instruments. Such investments may include high-yield corporate bonds (also known as “junk bonds”) and floating rate term loans, each of which may be issued by U.S. or foreign, including developed and emerging markets, businesses. The Fund may also invest in other loan (and loan-related) instruments, including bank loans, covenant-lite loans, and syndicated loans. The Fund may also invest in collateralized loan obligations (CLOs), a type of asset-backed security. To pursue the Fund’s investment strategy, the Fund’s investment adviser (the “Adviser”) can invest in instruments directly or through investing in other investment companies, including, for example, affiliated funds advised by the Adviser or its affiliates. The Adviser selects instruments, including securities, that it believes have attractive risk-return characteristics. The Adviser’s investment selection process includes an analysis of the issuer’s financial condition, business and product strength, competitive position and management expertise. The Adviser does not limit the Fund’s investments to a particular maturity range. The Adviser may lengthen or shorten duration of the portfolio from time to time based on its interest rate outlook, but, under normal market conditions, the Fund’s dollar-weighted average effective duration is expected to be less than three years.

The Fund may invest in derivative contracts, in particular, futures contracts, option contracts and swap contracts, which may result in leverage, to implement its investment strategies as more fully described in the Fund’s Prospectus. There can be no assurance that the Fund’s use of derivative contracts or hybrid instruments will work as intended. Derivative investments made by the Fund are included within the Fund’s 80% policy (as described below) and are calculated at market value.

The Fund will invest its assets so that at least 80% of its net assets (plus any borrowings for investment purposes) are invested in investments rated below investment grade. The Fund will notify shareholders at least 60 days in advance of any change in its investment policy that would enable the Fund to invest, under normal circumstances, less than 80% of its net assets in investments rated below investment grade.

What are the Main Risks of Investing in the Fund?

All funds take investment risks. Therefore, it is possible to lose money by investing in the Fund. The primary factors that may reduce the Fund's returns include:

- **Risk Associated with Noninvestment-Grade Securities.** Securities rated below investment grade may be subject to greater interest rate, credit and liquidity risks than investment-grade securities. These securities are considered speculative with respect to the issuer's ability to pay interest and repay principal.
- **Issuer Credit Risk.** It is possible that interest or principal on securities will not be paid when due. Such non-payment or default may reduce the value of the Fund's portfolio holdings, its share price and its performance.
- **Counterparty Credit Risk.** Credit risk includes the possibility that a party to a transaction involving the Fund will fail to meet its obligations. This could cause the Fund to lose money or to lose the benefit of the transaction or prevent the Fund from selling or buying other securities to implement its investment strategy.
- **Risk Related to the Economy.** The value of the Fund's portfolio may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets. Economic, political and financial conditions, industry or economic trends and developments or public health risks, such as epidemics or pandemics, may, from time to time, and for varying periods of time, cause the Fund to experience volatility, illiquidity, shareholder redemptions, or other potentially adverse effects. Among other investments, lower-grade bonds and loans may be particularly sensitive to changes in the economy.
- **Liquidity Risk.** Liquidity of individual corporate bonds varies considerably. Low-grade corporate bonds have less liquidity than investment-grade securities, which means that it may be more difficult to sell or buy a security at a favorable price or time.
- **Interest Rate Risk.** Prices of fixed-income securities generally fall when interest rates rise. The longer the duration of a fixed-income security, the more susceptible it is to interest-rate risk. Recent and potential future changes in monetary policy made by central banks and/or their governments are likely to affect the level of interest rates.
- **Risk of Investing in Loans.** In addition to the risks generally associated with debt instruments, such as credit, market, interest rate, liquidity and derivatives risks, bank loans are also subject to the risk that the value of the

collateral securing a loan may decline, be insufficient to meet the obligations of the borrower or be difficult to liquidate. The Fund's access to the collateral may be limited by bankruptcy, other insolvency laws or by the type of loan the Fund has purchased. For example, if the Fund purchases a participation instead of an assignment, it would not have direct access to collateral of the borrower. As a result, a floating rate loan may not be fully collateralized and can decline significantly in value. Additionally, collateral on loan instruments may consist of assets that may not be readily liquidated, and there is no assurance that the liquidation of such assets will satisfy a borrower's obligations under the instrument. Loans generally are subject to legal or contractual restrictions on resale. Loans and other forms of indebtedness may be structured such that they are not securities under securities laws. As such, it is unclear whether loans and other forms of direct indebtedness offer securities law protections, such as those against fraud and misrepresentation. In the absence of definitive regulatory guidance, while there can be no assurance that fraud or misrepresentation will not occur with respect to the loans and other investments in which the Fund invests, the Fund relies on the Adviser's research in an attempt to seek to avoid situations where fraud or misrepresentation could adversely affect the Fund.

- **Agent Insolvency Risk.** In a syndicated loan, the agent bank is the bank that undertakes the bulk of the administrative duties involved in the day-to-day administration of the loan. In the event of the insolvency of an agent bank, a loan could be subject to settlement risk as well as the risk of interruptions in the administrative duties performed in the day to day administration of the loan (such as processing interest rate calculations, processing draws, etc.).
- **Loan Prepayment Risk.** During periods of declining interest rates or for other purposes, borrowers may exercise their option to prepay principal earlier than scheduled which may force the Fund to reinvest in lower-yielding instruments.
- **Loan Liquidity Risk.** Loans generally are subject to legal or contractual restrictions on resale. The liquidity of loans, including the volume and frequency of secondary market trading in such loans, varies significantly over time and among individual loans. For example, if the credit quality of a loan unexpectedly declines significantly, secondary market trading in that loan can also decline for a period of time. During periods of infrequent trading, valuing a loan can be more difficult and buying and selling a loan at an acceptable price can be more difficult and delayed. Difficulty in selling a loan can result in a loss. Loan instruments may not be readily marketable and may be subject to restrictions on resale. In some cases, negotiations involved in disposing of loans may require weeks to complete. Thus, transactions in loan instruments may take longer than seven days to settle and it could take the Fund a significant amount of time to receive its money after selling its investment. This could pose a liquidity risk to the Fund and, if the Fund's exposure to such investments is substantial, could impair the Fund's ability to meet shareholder redemptions in a timely manner. A majority of the

Fund's assets are likely to be invested in assets that are considerably less liquid than debt instruments traded on national exchanges. Market quotations for such assets may be volatile and/or subject to large spreads between bid and ask prices.

- **Covenant-Lite Loans Risk.** The Fund may invest in loans that may be “covenant-lite.” This term typically refers to loans that lack, or contain fewer or contingent, financial maintenance covenants or other provisions intended to provide certain financial protections in favor of lenders as compared to other types of loans. Covenant-lite loans carry greater risks than loans with financial maintenance covenants.
- **Collateralized Loan Obligations Risk.** Collateralized loan obligations (CLOs) bear many of the same risks as other forms of asset-backed securities, including interest rate risk and issuer credit risk. As they are backed solely by pools of loans, CLOs also bear similar risks to investing in loans directly.
- **Call Risk.** Call risk is the possibility that an issuer may redeem a fixed-income security before maturity (a call) at a price below its current market price. An increase in the likelihood of a call may reduce the security's price. If a fixed-income security is called, the Fund may have to reinvest the proceeds in other fixed-income securities with lower interest rates, higher credit risks or other less favorable characteristics.
- **Asset-Backed Securities (ABS) Risk.** The value of asset-backed securities (ABS) may be affected by certain factors such interest rate risk, credit risk, prepayment risk and the availability of information concerning the pool of underlying assets and its structure. Under certain market conditions, ABS may be less liquid and maybe difficult to value. Movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain types of ABS. ABS can also be subject to the risk of default on the underlying assets.
- **Risk of Foreign Investing.** Because the Fund invests in securities issued by foreign companies and national governments, the Fund's Share price may be more affected by foreign economic and political conditions, taxation policies and accounting and auditing standards than could otherwise be the case.
- **Underlying Fund Risk.** The risk that the Fund's performance is closely related to the risks associated with the securities and other investments held by Underlying Funds and that the ability of a Fund to achieve its investment objective will depend upon the ability of Underlying Funds to achieve their respective investment objectives. The Fund bears Underlying Fund fees and expenses indirectly.
- **ETF Risk.** As an ETF, the Fund is subject to the following risks:
 - **Authorized Participants Concentration Risk.** To the extent that the Fund invests in instruments that trade outside of a collateralized settlement system, it may have a limited number of financial institutions that act as Authorized Participants. To the extent they cannot or are otherwise unwilling to engage in creation and redemption transactions with the Fund

and no other Authorized Participant steps in, trading in Shares of the Fund may be significantly diminished, bid-ask spreads may widen, and the market price of Shares may represent a significant discount to net asset value (NAV). Shares may also face delisting from the Exchange.

Premium/Discount Risk. There may be times when the market price of the Fund's Shares is more than the NAV intra-day (i.e., the market price represents a premium to NAV) or less than the NAV intra-day (i.e., the market price represents a discount to NAV) and when bid-ask spreads widen. As a result, shareholders of the Fund may pay more than NAV when purchasing Shares and receive less than NAV when selling Fund Shares. This risk is heightened in times of market volatility and in steep market declines. In addition, a Fund's end-of-day market price may deviate from its NAV to the extent that the Fund invests in foreign securities whose local trading markets close before the U.S. market closes because, although the Fund may value such securities at their local market closing prices for purposes of calculating NAV, the broader market may assign them a different value, including due to after-hours developments in their local markets, which may be reflected in the market price of Shares.

Secondary Market Trading Risk. Investors buying or selling Shares in the secondary market will normally pay brokerage commissions, which are often a fixed amount and may be a significant proportional cost for investors buying or selling relatively small amounts of Shares. Secondary market trading is subject to bid-ask spreads and trading in Fund Shares may be halted by the Exchange because of market conditions or other reasons. If a trading halt occurs, a shareholder may temporarily be unable to purchase or sell Shares of the Fund. In addition, although the Fund's Shares are listed on the Exchange, there can be no assurance that an active trading market for Shares will develop or be maintained, that bid-ask spreads will be narrow, or that the Fund's Shares will continue to be listed.

Cash Transactions Risk. Like other ETFs, the Fund sells and redeems its Shares only in large blocks called Creation Units and only to Authorized Participants. Unlike most other ETFs, however, the Fund expects to effect its creations and redemptions at least partially or fully for cash, rather than in-kind securities. As a result, an investment in the Fund may incur certain costs, including brokerage costs in connection with investing cash received and may recognize capital gains in connection with cash redemptions, unlike an ETF that effects creations and redemptions only in-kind. In addition, costs could be imposed on the Fund which would have the effect of decreasing the Fund's net asset value to the extent the costs are not offset by a transaction fee payable by an Authorized Participant.

- **European Union and Eurozone Related Risk.** A number of countries in the European Union (EU), including certain countries within the EU that have adopted the euro (Eurozone), have experienced, and may continue to experience, severe economic and financial difficulties. Additional countries

within the EU may also fall subject to such difficulties. These events could negatively affect the value and liquidity of the Fund's investments in euro-denominated securities and derivatives contracts, securities of issuers located in the EU or with significant exposure to EU issuers or countries.

- **Leverage Risk.** Leverage risk is created when an investment exposes the Fund to a level of risk that exceeds the amount invested. Changes in the value of such an investment magnify the Fund's risk of loss and potential for gain.
- **Risk of Investing in Emerging Market Countries.** Securities issued or traded in emerging markets generally entail greater risks than securities issued or traded in developed markets. Securities markets within emerging market countries may experience low or non-existent trading volume, resulting in a lack of liquidity and increased volatility in prices for such securities. Political and economic structures in emerging market countries generally lack the social, political and economic stability of developed countries, which may affect the value of the Fund's investments in these countries. There may be less publicly available information about issuers in emerging markets than would be available about issuers in more developed capital markets, and such issuers may not be subject to accounting, auditing, and financial reporting standards comparable to those to which U.S. companies are subject.
- **Risk of Investing in Derivative Contracts and Hybrid Instruments.** Derivative contracts and hybrid instruments involve risks different from, or possibly greater than, risks associated with investing directly in securities and other traditional investments. Specific risk issues related to the use of such contracts and instruments include valuation and tax issues, increased potential for losses and/or costs to the Fund, and a potential reduction in gains to the Fund. Each of these issues is described in greater detail in this Prospectus. Derivative contracts and hybrid instruments may also involve other risks described in this Prospectus, such as interest rate, credit, liquidity and leverage risks.
- **Technology Risk.** The Adviser uses various technologies in managing the Fund, consistent with its investment objective and strategy described in this Prospectus. For example, proprietary and third party data and systems are utilized to support decision making for the Fund. Data imprecision, software or other technology malfunctions, programming inaccuracies and similar circumstances may impair the performance of these systems, which may negatively affect Fund performance.

The Shares offered by this Prospectus are not deposits or obligations of any bank, are not endorsed or guaranteed by any bank and are not insured or guaranteed by the U.S. government, the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

PERFORMANCE: BAR CHART AND TABLE

Risk/Return Bar Chart

The bar chart and performance table below are intended to help you analyze the Fund's investment risks in light of its historical returns. The bar chart shows the variability of the Fund's total returns on a calendar year-by-year basis. The Average Annual Total Return table shows returns averaged over the stated periods, and includes comparative performance information. *The Fund's performance will fluctuate, and past performance (before and after taxes) is not necessarily an indication of future results.* Updated performance information for the Fund is available under the "Products" section at [FederatedInvestors.com](https://www.federatedinvestors.com) or by calling 1-800-341-7400.

The Fund's total return for the three-month period from January 1, 2024 to March 31, 2024, was 1.66%.

Within the periods shown in the bar chart, the Fund's highest quarterly return was 4.24% (quarter ended December 31, 2023). Its lowest quarterly return was (8.05)% (quarter ended June 30, 2022).

Average Annual Total Return Table

In addition to Return Before Taxes, Return After Taxes is shown for the Fund to illustrate the effect of federal taxes on Fund returns. *Actual after-tax returns depend on each investor's personal tax situation, and are likely to differ from those shown.* After-tax returns are calculated using a standard set of assumptions. The stated returns assume the highest historical **federal** income and capital gains tax rates. These after-tax returns do **not** reflect the effect of any applicable **state** and **local** taxes. After-tax returns are not relevant to investors holding Shares through a 401(k) plan, an Individual Retirement Account or other tax-advantaged investment plans.

(For the Period Ended December 31, 2023)

	1 Year	Since Inception
Inception Date:		12/16/2021
Return Before Taxes	11.53%	2.00%
Return After Taxes on Distributions	8.44%	(0.64)%
Return After Taxes on Distributions and Sale of Fund Shares	6.73%	(0.36)%
ICE BofA 0-3 Year Duration-to-Worst US High Yield Constrained Index¹	11.92%	7.10%
ICE BofA 0-5 Year BB/B US High Yield Constrained Index²	11.47%	6.46%

1 Prior to March 1, 2024, the Fund also compared its performance to the ICE BofA 0-3 Year Duration-to-Worst US High Yield Constrained Index. Effective March 1, 2024, the Fund's benchmark index changed from the ICE BofA 0-3 Year Duration-to-Worst US High Yield Constrained Index to the ICE BofA 0-5 Year BB-B US High Yield Constrained Index. The Adviser believes that the ICE BofA 0-5 Year BB-B US High Yield Constrained Index is more reflective of the types of securities in which the Fund invests. The ICE BofA 0-3 Year Duration-to-Worst US High Yield Constrained Index tracks the performance of short-term U.S. dollar-denominated below investment-grade corporate debt publicly issued in the U.S. domestic market. Qualifying securities must have a duration-to-worst less than three years, a remaining to final maturity of at least one month, at least 18 months to final maturity at point of issuance, a below investment-grade rating (based on an average of Moody's, S&P and Fitch), a fixed coupon schedule and a minimum amount outstanding of \$250 million.

2 The ICE BofA 0-5 Year BB-B US High Yield Constrained Index tracks the performance of short-term US dollar denominated below investment grade corporate debt publicly issued and settled in the US domestic market. Qualifying securities must have less than five years remaining term to final maturity, at least 18 months to final maturity at point of issuance, be rated BB1 through B3, inclusive, based on an average of Moody's S&P and Fitch, have a fixed coupon schedule and a minimum amount outstanding of \$250 million.

FUND MANAGEMENT

The Fund's Investment Adviser is Federated Investment Management Company.

Mark E. Durbiano, CFA, Senior Portfolio Manager, has been the Fund's portfolio manager since its inception in December of 2021.

Anthony A. Venturino, CFA, Portfolio Manager, has been the Fund's portfolio manager since its inception in December of 2021.

Braden Rotberg, CFA, Portfolio Manager, has been the Fund's portfolio manager since April of 2024.

PURCHASE AND SALE OF FUND SHARES

The Fund is an exchange-traded fund (ETF). Individual Fund Shares may only be purchased and sold on a national securities exchange through a broker-dealer and may not be purchased or redeemed directly with the Fund. The price of Fund Shares is based on market price, and because ETF shares trade at market prices rather than net asset value (NAV), Shares may trade at a price greater than NAV (a premium) or less than NAV (a discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of a Fund (“bid”) and the lowest price a seller is willing to accept for shares (“ask”) when buying or selling shares in the secondary market (the “bid-ask spread”). Recent information, including information about the Fund’s NAV, market price, premiums and discounts, and bid-ask spreads, is included on the Fund’s website at [FederatedHermes.com/us](https://www.federatedhermes.com/us).

TAX INFORMATION

The Fund’s distributions are taxable as ordinary income or capital gains except when your investment is through a 401(k) plan, an Individual Retirement Account or other tax-advantaged investment plan.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and/or its related companies may pay the intermediary for the sale of Fund Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
