15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis Due to the tax free status of this reorganization, Federated Intermediate Government Fund Inc. shareholders' aggregate basis for the Federated Total Return Government Bond Fund shares received remains the same as the aggregate basis of their Federated Intermediate Government Fund. The per share basis, however, will change due to the differing number of shares received. This change will be calculated based upon the relative fair market value of the two funds as of the date of the reorganization.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ► For each tax lot held in Federated Intermediate Government Fund, Inc., the change in tax basis will be calculated by multiplying its cost basis, as of the date of the reorganization, by an adjustment factor. IS Share Class adjustment factor = 1.09196653; SS Share Class adjustment factor = 1.09196652

The resulting amounts represent the adjusted per share tax basis. The holding period of all shares received includes the period that the exchanged Federated Intermediate Government Fund, Inc. shares were held.
